

Air Battle 10

Bryn Evans

Air Battle Central Europe Alfred Price, 1987
Fifteen NATO officers reveal the awesome strength and secret shortcomings of our most advanced aircraft, including the Linx helicopter, the Harrier jet, the F-4 Phantom, and others. Photographs, illustrations.

The Early Air War in the Pacific Ralph F. Wetterhahn, 2019-11-15 During the first 10 months of the war in the Pacific, Japan achieved air supremacy with its carrier and land-based forces. But after major setbacks at Midway and Guadalcanal, the empire's expansion stalled, in part due to flaws in aircraft design, strategy and command. This book offers a fresh analysis of the air war in the Pacific during the early phases of World War II. Details are included from two expeditions conducted by the author that reveal the location of an American pilot missing in the Philippines since 1942 and clear up a controversial account involving famed Japanese ace Saburo Sakai and U.S. Navy pilot James Pug Southerland.

One Day in a Long War Jeffrey L. Ethell, Alfred Price, 1989 Two historians chronicle May 10, 1972, the launch day of Linebacker, a highly clarified, huge-scale Navy and Air Force surprise operation marking the resumption of U.S. bombing raids on North Vietnam.

Kursk 1943 Roman Toeppel, 2021-11-15 The Battle of Kursk in the summer of 1943 was one of the greatest battles in military history involving more than 3 million soldiers, 10,000 tanks and 8,000 aircraft. While many books have been written

on this allegedly most decisive battle of the Second World War, many legends live on, above all because of misleading information that recur in most publications - even in the most recent ones. Based on almost 20 years of research reassessing the primary sources, Roman Toeppel sheds light on the phase of decision-making, the preparations and the development of the battle in an engaging style that grips the reader's attention from the first page on. The author concentrates on little-known developments and events leading the reader to astonishing results. He also gives entirely new insights into the historiographic appraisal of this battle, putting thoroughly researched facts against erroneous popular beliefs, myths and legends that have been passed down among historians for generations.

Tactical Air Power and the Vietnam War Phil Haun, 2023-11-30 This book introduces a much-needed theory of tactical air power to explain air power effectiveness in modern warfare with a particular focus on the Vietnam War as the first and largest modern air war. Phil Haun shows how in the Rolling Thunder, Commando Hunt, and Linebacker air campaigns, independently air power repeatedly failed to achieve US military and political objectives. In contrast, air forces in combined arms operations succeeded more often than not. In addition to predicting how armies will react to a lethal air threat, he identifies operational factors of air superiority, air-to-ground capabilities, and friendly ground force capabilities, along with environmental factors of weather, lighting, geography and terrain, and

cover and concealment in order to explain air power effectiveness. The book concludes with analysis of modern air warfare since Vietnam along with an assessment of tactical air power relevance now and for the future.

One Day in a Long War Jeffrey L. Ethell, 1991-11-01

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring

value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

10 Propositions Regarding Air Power Phillip S. Meilinger, 1995

Clashes Marshall L. Michel, III, 2007 This classic work-part of the Marine Corps reading list-makes full use of declassified U.S. documents to offer the first comprehensive study of fighter combat over North Vietnam. Marshall Michel's balanced, exhaustive coverage describes and analyzes both Air Force and Navy engagements with North Vietnamese MiGs but also includes discussions of the SAM threat and U.S. countermeasures, laser-guided bombs, and U.S. attempts to counter the MiG threat with a variety of technological equipment. Accessible yet professional, the book is filled with valuable lessons learned that are as valid today as they were in the 1960s and 1970s. Some 29 photos and 33 drawings and maps, including diagrams of both American and North Vietnamese formations and tactics, are included.

Gradual Failure U. S. Military, Department of Defense, U. S. Air Force (USAF), U. S. Government, 2017-04-08 This U.S. Air Force (USAF) publication, previously classified, tells the story of the opening two years of the Rolling Thunder air campaign in North Vietnam. The United States Air Force reached its nadir during this time. Never had the Air Force operated with so

many restraints and to so little effect. These pages are painful but necessary reading for all who care about the nation's military power. Jacob Van Staaveren wrote this book in the 1970s near the end of his distinguished government service, which began during the occupation of Japan; the University of Washington Press published his book on that experience in 1995. He was an Air Force historian in Korea during the Korean War, and he began to write about the Vietnam War while it was still being fought. His volume on the air war in Laos was declassified and published in 1993. Now this volume on the air war in North Vietnam has also been declassified and is being published for the first time. Although he retired to McMinnville, Oregon, a number of years ago, we asked him to review the manuscript and make any changes that seemed warranted. For the most part, this is the book he wrote soon after the war.

Summary and Reappraisal

Air Battle for Burma Bryn Evans, 2016-11-30 After
a long series of crushing defeats by the
apparently unstoppable Japanese air and ground
forces, the eventual fight back and victory in
Burma was achieved as a result of the exercise of
unprecedented combined services cooperation and
operations. Crucial to this was the Allies
supremacy in the air coupled with their ground/air
support strategy. Using veterans firsthand
accounts, *Air Battle For Burma* reveals the
decisive nature of Allied air power in inflicting
the first major defeat on the Japanese Army in the
Second World War. Newly equipped Spitfire fighter
squadrons made the crucial difference at the
turning point battles of the Admin Box, Imphal and
Kohima in 1944. Air superiority allowed Allied air
forces to deploy and supply Allied ground troops
on the front line and raids deep into enemy
territory with relative impunity; revolutionary
tactics never before attempted on such a scale. By
covering both the strategic and tactical angles,
through these previously unpublished personal
accounts, this fine book is a fitting and overdue
tribute to Allied air forces contribution to
victory in Burma.

**Air Power And The Ground War In Vietnam, Ideas
And Actions** Dr Donald J. Mrozek, 2015-11-06

Ultimately, this study is about a smaller Vietnam War than that which is commonly recalled. It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects, but it avoids major treatment of some of the most dramatic air actions of the war, such as the bombing of Hanoi. To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints, this study may seem almost perverse, emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe-inspiring technology. Although the chapters in this study are intended to form a coherent and unified argument, each also offers discrete messages. The chapters are not meant to be definitive. They do not exhaust available documentary material, and they often rely heavily on published accounts. Nor do they provide a complete chronological picture of the uses of air power, even with respect to the ground war. Nor is coverage of areas in which air power was employed—South Vietnam, Laos, Cambodia, and North Vietnam—evenly distributed nor necessarily proportionate to the effort expended in each place during the war. Lastly, some may find one or another form of air power either slightly or insufficiently treated. Such criticisms are beside the point, for the objectives of this study are to explore a comparatively neglected theme—the impact of air power on the ground—and to encourage

further utilization of lessons drawn from the Vietnam experience.

Desert Storm Air War Robert F. Dorr,1991
Recounts the Allied air campaign during the Persian Gulf War, and shares interviews with pilots and ground crews.

Operation Tidal Wave Vincent dePaul
Lupiano,2020-12-01 Operation Tidal Wave tells the story of the bloodiest air battle in the history of war. It is about 1700 airmen who set out to bomb the oil refineries surrounding the city of Ploesti, Romania, on August 1, 1943. Success, they thought, would be a force in ending the war. Success instead was extremely limited and 500 airmen were killed, wounded, captured, or interned. Negligible damage resulted at the Ploesti refineries, and a few months later they were operating at one-hundred percent capacity. To show the asperity of the raid, five Congressional Medals of Honor were awarded, two posthumously.

Stalingrad Christer Bergström,2007 Compiled by one of the world's leading experts on the air war over the Eastern Front, this book is the second in a series of books to cover the major phases of World War II in this theatre of operations.

Strategy For Defeat: The Luftwaffe, 1933-1945
[Illustrated Edition] Williamson Murray,2015-11-06

Includes the Aerial Warfare In Europe During World War II illustrations pack with over 200 maps, plans, and photos. This book is a comprehensive analysis of an air force, the Luftwaffe, in World War II. It follows the Germans from their prewar preparations to their final defeat. There are many disturbing parallels with our current situation. I urge every student of military science to read it carefully. The lessons of the nature of warfare and the application of airpower can provide the guidance to develop our fighting forces and employment concepts to meet the significant challenges we are certain to face in the future.

Da Nang Diary Tom Yarborough, 2013-11-05 "[An] intimate account of a Forward Air Controller working with the Special Forces on their secret operations in South Vietnam and Laos . . . Don't miss it!" (John Prados, author of *Storm Over Leyte*). Originally published in 1991, this classic work has now been revised and updated with additional photos. It is the story of how, in Vietnam, an elite group of Air Force pilots fought a secret air war in Cessna 0-2 and OV-10 Bronco prop planes—flying as low as they could get. The eyes and ears of the fast-moving jets who rained death and destruction down on enemy positions, the forward air controller made an art form out of an air strike—knowing the targets, knowing where friendly troops were, and reacting with split-second, life-and-death decisions as a battle unfolded. The expertise of the low, slow FACs, as well as the hazard attendant to their role, made for a unique bird's-eye perspective on how the entire war in Vietnam unfolded. For Tom

Yarborough, who logged 1,500 hours of combat flying time, the risk was constant, intense, and electrifying. A member of the super-secret "Prairie Fire" unit, Yarborough became one of the most frequently shot-up pilots flying out of Da Nang—engaging in a series of dangerous secret missions in Laos. In this work, the reader flies in the cockpit alongside Yarborough in his adrenaline-pumping chronicle of heroism, danger, and wartime brotherhood. From the rescuing of downed pilots to taking out enemy positions, to the most harrowing extended missions directly overhead of the NVA, here is the dedication, courage and skill of the fliers who took the war into the enemy's backyard.
