Strategic Air Command and the Alert Program

Henry M. Narducci, 1988

Always at War Melvin G. Deaile, 2018-04-15 Always at War is the story of Strategic Air Command (SAC) during the early decades of the Cold War. More than a simple history, it describes how an organization dominated by experienced World War II airmen developed a unique culture that thrives to this day. Strategic Air Command was created because of the Air Force's internal beliefs, but the organization evolved as it responded to the external environment created by the Cold War. In the aftermath of World War II and the creation of an independent air service, the Air Force formed SAC because of a belief in the military potential of strategic bombing centralized under one commander. As the Cold War intensified, so did SAC's mission. In order to prepare SAC's "warriors" to daily fight an enemy they did not see, as well as to handle the world's most dangerous arsenal, the command, led by General Curtis LeMay, emphasized security, personal responsibility, and competition among the command. Its resources, political influence, and manning grew as did its "culture" until reaching its peak during the Cuban Missile Crisis. SAC became synonymous with the Cold War and its culture forever changed the Air Force as well as those who served.

To Rule the Skies Brent D Ziarnick, 2021-02-15
To Rule the Skies: General Thomas S. Power and the Rise of Strategic Air Command in the Cold War fills a critical gap in Cold War and Air Force history by telling the story of General Thomas S. Power for the first time. Thomas Power was second only to Curtis LeMay in forming the Strategic Air Command (SAC), one of the premier combat organizations of the twentieth century, but he is rarely mentioned today. What little is written about Power describes him as LeMay's willing hatchet man--uneducated, unimaginative, autocratic, and sadistic. Based on extensive archival research, General Power seeks to overturn this appraisal. Brent D. Ziarnick covers the span of both Power's personal and professional life and

challenges many of the myths of conventional knowledge about him. Denied college because his middle-class immigrant family imploded while he was still in school, Power worked in New York City construction while studying for the Flying Cadet examination at night in the New York Public Library. As a young pilot, Power participated in some of the Army Air Corps' most storied operations. In the interwar years, his family connections allowed Power to interact with American Wall Street millionaires and the British aristocracy. Confined to training combat aircrews in the United States for most of World War II, Power proved his combat leadership as a bombing wing commander by planning and leading the firebombing of Tokyo for Gen. Curtis LeMay. After the war, Power helped LeMay transform the Air Force into the aerospace force America needed during the Cold War. A master of strategic air warfare, he aided in establishing SAC as the Free World's Big Stick against Soviet aggression. Far from being unimaginative, Power led the incorporation of the nuclear weapon, the intercontinental ballistic missile, the airborne alert, and the Single Integrated Operational Plan into America's deterrent posture as Air Research and Development Command commander and both the vice commander and commander-in-chief of SAC. Most importantly, Power led SAC through the Cuban Missile Crisis in 1962. Even after retirement, Power as a New York Times bestselling author brought his message of deterrence through strength to the nation. Ziarnick points out how Power's impact may continue in the future. Power's

peerless, but suppressed, vision of the Air Force and the nation in space is recounted in detail, placing Power firmly as a forgotten space visionary and role model for both the Air Force and the new Space Force. To Rule the Skies is an important contribution to the history of the Cold War and beyond.

Air Force Armament United States. Air Force. Continental Air Command, 1949

Striving for Air Superiority Craig C. Hannah, 2002 Annotation. Tactical bombing, Gen. Jimmy Doolittle reportedly observed, is breaking the milk bottle. Strategic bombing is killing the cow. Most nations have historically chosen between building tactical and strategic air forces; rarely has a state given equal weight to both. The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us, but in a Cold War world split between continental superpowers, strategic bombing took precedence, with calamitous consequences. In the 1960s, the U.S. Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command (TAC) had become little more than a handmaiden to the Strategic Air Command (SAC). TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities. Its aircraft were designed to shoot at large, lumbering bombers and not to engage in dog fights with highly maneuverable MiGs. Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second-rate force flying aging aircraft during the early years of the Cold War,

recovered briefly over Korea, then slid into obsolescence during the 1950s. His explanation of why America's fighter aircraft did not work in Vietnam is instructive and unsettling. Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world. He side-steps politics and inter-service rivalries to focus on the nuts and bolts of tactical air power. The result is a factual, informative account of how an air force first loses its way then finds its mission again.

The Boeing B-47 Stratojet: Strategic Air Command's Transitional Bomber Robert S. Hopkins, III, C. Mike Habermehl, 2018 The B-47 was the aircraft upon which Strategic Air Command (SAC) based its capability pending the development and delivery of the B-52. First proposed during WWII as a high-speed piston-powered reconnaissance platform, the B-47 evolved into what would become

the first swept-wing, medium jet bomber and SAC's most numerous operational aircraft. Given its pioneering role as a jet bomber and the ongoing evolution of SAC's mission and US national security, the B-47 had more than its share of teething problems. Initial Boeing flight tests mixed triumph with tragedy, and demonstrated that an entirely new way of flying a large aircraft was required. Poor reliability in the bombing-navigation and fire-control systems undermined the effectiveness of early B-47Bs but were eventually overcome as the aircraft evolved to fill many different roles. Used as reconnaissance, weather, testbed and radio relay platforms, one variant, the EB-47E BLUE CRADLE, also demonstrated its versatility as an electronic warfare jammer while the RB-47H, ERB-47H, and EB-47E(TT) undertook electronic intelligence and gathered telemetry associated with the Soviet ICBM program. Authors Mike Habermehl and former SAC pilot Robert S. Hopkins III have combined years of research and experience to provide the ultimate history of the Stratojet.
