McDonnell FH-1 Phantom Steve Ginter,1981-01-01
The photos in this edition are black and white.
First published in 1981, the book covers the
Navy's first jet aircraft to operate from a
carrier, the McDonnell FD-1/FH-1 Phantom. The
underpowered twin jet fighter would prove, along
with North American's FJ-1, the feasibility of
operating jets from carriers. It was operated by
VF-17A/VF-171, VF-172, VMF-122 and the Flying
Leathernecks demonstration team as well as the
reserves. 48 photos, 6 illustrations and 21
profiles are included.

The Cutting Edge Mark A. Lorell,Hugh P.
Levaux,United States. Air Force,Project Air Force
(U.S.),1998 This pictorial history, featuring
nearly 40 rare aircraft photos, discusses the
major trends in the history of jet fighter design
and development in the United States since WWII.
With the declining size and experience base of the
U.S. military aerospace industry, many worry about
the industry's ability to support future military
requirements. The authors examine the successes of
the past to help shape research and development
policies for the future.

F6F Hellcat at War Cory Graff,2009-04-15 This
guide traces the history of the US Navy's premier
WWII fighter plane with archival photos, tech
specs and illustrations. F6F Hellcat at War
follows the story of this iconic aircraft from its
early development to its distinguished combat
career in the Pacific. While the F6F was not the
fastest or most maneuverable fighter, aviators
loved their trusty Hellcats because they were
incredibly tough, marvelously powerful, and easy
to fly. In the last two years of war, the Hellcat

dominated the skies over the Pacific, stopping Japan's once-vaunted A6M Zero and tallying a victory-to-loss ratio of over 19 to 1. Through compelling accounts, never-before-seen photographs, and detailed drawings, F6F Hellcat at War tells the story of one of the war's most successful yet underappreciated fighter aircraft.

F-117 Stealth Fighter Units of Operation Desert Storm Warren Thompson, 2012-11-20 During the final years of the 20th century, the most significant break-through in military weaponry was the concept of Stealth technology, and the first mass-produced weapon to utilize this to perfection was the F-117 Nighthawk. Originally delivered in 1982, its existence was officially denied until the Iraqi invasion of Kuwait, when it entered the public spotlight over the skies of Baghdad. Illustrated with stunning color photographs of the F-117 above Iraq, and complemented by numerous personal accounts from the pilots themselves, this book explores the history and combat experience of one of the most secretive planes ever built.

North American FJ-1 Fury Steve Ginter, Ron Picciani, 1983-01 First published in 1983, the FJ-1 Fury book covers North America's first jet fighter and forerunner to the Air Force F-86 and Navy FJ-2/FJ-3 Furys. It was a pudgy straight-winged aircraft that would prove the feasibility of jet fighters aboard aircraft carriers when VF-5A/VF-51 operated the aircraft aboard the USS Boxer and USS Princeton. It was also operated by the reserves from Dallas, Los Alamitos, Oakland and Olathe. The book has 62 b&w photos with 4 illustrations and a first-hand account of flying with VF-51.

Sled Driver Brian Shul, Sheila Kathleen O'Grady, 1991 No aircraft ever captured the curiosity & fascination of the public like the SR-71 Blackbird. Nicknamed The Sled by those few who flew it, the aircraft was shrouded in secrecy from its inception. Entering the U.S. Air Force inventory in 1966, the SR-71 was the fastest, highest flying jet aircraft in the world. Now for the first time, a Blackbird pilot shares his unique experience of what it was like to fly this legend of aviation history. Through the words & photographs of retired Major Brian Shul, we enter the world of the Sled Driver. Major Shul gives us insight on all phases of flying, including the humbling experience of simulator training, the physiological stresses of wearing a space suit for long hours, & the intensity & magic of flying 80,000 feet above the Earth's surface at 2000 miles per hour. SLED DRIVER takes the reader through riveting accounts of the rigors of initial training, the gamut of emotions experienced while flying over hostile territory, & the sheer joy of displaying the jet at some of the world's largest airshows. Illustrated with rare photographs, seen here for the first time, SLED DRIVER captures the mystique & magnificence of this most unique of all aircraft.

Early Jet Fighters Leo Marriott, 2018-05-30 In

almost 200 archive photographs Leo Marriott traces the course of the development of British and American jet fighters during the first pioneering decade of their production. In many ways the period from 1944 to 1954 was one of the most exciting and innovative in the history of military aviation. Rare images show the first jet fighters flown by the RAF towards the end of the Second World War and takes the story forward to the most advanced designs that played a key role in the war in Korea. The range of experimental and operational warplanes that were conceived and built during this short time was remarkable. The initial straight-wing jets began with the Gloster Meteor and Lockheed P-80 Shooting Star which were later superseded by the first operational swept-wing fighters such as the Hawker Hunter, North American F-86 Sabre and Grumman F9F-6 Cougar. Development of all these benefited greatly from German Second World War advances in aerodynamics that were exploited by the British and Americans when the war ended. Progress was so swift that, by the mid-1950s, the prototypes of the next generation of truly supersonic fighters were starting to appear, and these are featured in Leo Marriott's fascinating selection of images. He even includes a variety of prototypes which for various reasons did not result in production orders, as well as several unusual concepts such as flying boat fighters and mixed-power designs. Early Jet Fighters: British and American 1944-1954 is a graphic and informative introduction to an extraordinary stage in the evolution of the modern warplane.

Douglas Ad/A-1 Skyraider: Part 2: Part Two Steve Ginter, 2015-01-21 The Douglas AD/A-1 Skyraider Part Two covers Skyraider Fleet and Utility squadrons with descriptions about each squadron along with vintage photos, squadron patches and unit insignia.

Illustrated Book of Fighter Aircraft Francis Crosby, 2015-01-07 A visual A-Z directory of over 170 aircraft, with fascinating historical notes and specification boxes for each, and 600 archive photographs.

The Big Book of X-Bombers & X-Fighters Steve Pace, 2016-03-15 They're all here--every X-bomber and X-fighter since 1942. On October 2, 1942, the Bell XP-59 Airacomet soared up and away from present-day Edwards AFB, launching the US Army Air Forces into the Jet Age. In the several decades since, hundreds of new variations of experimental and test turbojet-powered bombers and fighters--X-bombers and X-fighters--have taken explosive flight. These aircraft blazed a trail leading to today's B-2 Stealth Bomber and F-35 Joint Strike Fighter. The Big Book of X-Bombers & X-Fighters showcases all of the USAF jet-powered X-bombers and X-fighters that have flown since 1942--more than 90 in all, including the alphabet soup of their variants. From experimental to prototype service bombers and fighters--from the XB-43 to the B-2A and the XP-59A to the F-35A--they're all here, with their inside stories revealed. Some of these aircraft were further developed. Others were canceled. All stretched the performance and design envelopes. More than 250 photos illustrate all of these experimental aircrafts' cutting-edge features and zeroes in on histories of their design, flight testing, and weapons testing. Specification tables detailing performance, design, and armaments help round out this compendium of information on truly groundbreaking aviation designs. X-bombers and X-fighters in *The Big Book of X-Bombers & X-Fighters* include: Bell P-59 Airacomet Republic P/F-84 Thunderjet Douglas B-43 Jetmaster North American B-45 Tornado Boeing B-47 Stratojet Curtiss P/F-87 Blackhawk McDonnell P/F-85 Goblin Convair P/F-92 Dart Northrop F-17 Cobra Boeing B-1 Lancer And all the rest!

Specifications included for each aircraft include: Length Height Wingspan Empty weight Gross weight Maximum range Ceiling Maximum speed Armament In addition, veteran aviation author Steve Pace shows readers some of the designs that could have been and offers a peek into what might be lurking in the future, making this the definitive guide to USAF jet-powered experimental aircraft!

South African Air Force Fighter Colors. Volume 1
Piet van Schalkwyk, William Marshall, 2018-10 In the early stages of World War Two, the Italian Forces in Abyssinia, East Africa, consisting of 200,000 troops and nearly 400 aircraft constituted a grave threat to Kenya and the Sudan. To meet this threat three South African Air Force (SAAF) fighter squadrons were deployed to East Africa to counter the attacking Italian Air Force. The three squadrons operated mostly old and antiquated bi-planes in the form of Hawker Furies, Gloster Gauntlets and Gloster Gladiators. Between then they did also operate a number of Hawker Hurricane Mk. Is, of which some still had fabric wing surfaces and two-bladed wooden propellers. These aircraft were also passed along between the various units, depending on the area that had the highest requirement. Among the three squadrons, 1 Squadron primarily used Gloster Gladiators, while 2 Squadron used Furies and Gladiators, with 3 Squadron being the primary users of the Hurricanes. These units were joined by 4 Squadron, training on Furies and Curtiss Mohawks, before moving to Egypt for operations in the Desert. 3 Squadron later converted to these Curtiss Mohawks, and eventually ended up with a mix of Mohawks, again supplemented by Gladiators. 41 Squadron, an Army-Cooperation unit, also converted to a fighter squadron after the major campaign was completed and served as a holding unit in East Africa, flying Hawker Hurricane Mk. IIs. One Detached Flight, operating Mohawks during the final part of

the campaign, was renumbered as B-Flight of 3 Squadron and joined the primary unit for the last major operations in East Africa. The squadrons operated on all fronts in Somaliland and Abyssinia, and made a considerable contribution towards the victory that was achieved in that campaign. Commenting on the part, that the SAAF Fighter Squadrons played in the campaign, Sir Archibald Sinclair said: When the Italian come to draw up a list of the factors that caused them to lose the East African Empire, they will place the South African Air Force somewhere near the top of the list. This volume covers the combat history of these fighter squadrons during the campaign, as well as the colors and markings of their aircraft. Primary sources, such as Squadron war Diaries and Pilot Logbooks. were used in the preparation of the text contained herein. This volume contains 23 full-color plates and 112 b&w photos, indicating the people and aircraft operated by these squadrons. This volume will be followed by two further volumes, tracing the onwards history of these squadrons as well as additional SAAF Fighter Squadrons during the campaign in North Africa and Malta, and the campaign in Sicily, Italy and the Balkans. The authors have already written eight books covering the colors and markings of the SAAF and SA Army equipment in a series of booklets entitled South African Colours and Markings, numbers 1 to 8.

Lockheed F-80 Shooting Star Pilot's Flight Operating Manual United States Air Force,2007-08-06 Designed by Lockheed's legendary engineer Clarence Kelly Johnson, the F-80 (first

designated P-80) Shooting Star was one of the world's first operational jet fighter aircraft. After it missed seeing combat in WWII - four prototype aircraft were in Europe at war's end - the plane drew first blood in Korea in 1950. Variants included a photo recon version and the two-seat T-33, both of which saw heavy service in air forces around the world. Originally printed by Lockheed and the United States Air Force in the 1950s, this F-80 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified Restricted, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.
