First 109 Minutes: 9/11 And The U.S. Air Force. Priscilla D.

Jones,2014-08-15 Tuesday, Sep. 11, 2001, dawned cool and clear, with sunny skies all along the eastern seaboard. For Air Force aviators like Lt. Col. Timothy Duff Duffy of the 102d Fighter Wing at Otis Air National Guard Base, Massachusetts, the day held the promise of perfect flying weather, at a time when the U.S. civil aviation system was enjoying a period of relative peace, despite concerns about a growing terrorist threat. More than ten years had passed since the last hijacking or bombing of a U.S. air carrier. That morning, however, the country came under a shocking, coordinated aerial assault by nineteen al Qaeda hijackers...The attack plan carried out by the suicide operatives had been years in the making. It was intended to cause mass, indiscriminate casualties and to destroy or damage the nation's financial, military, and political centers, four high value U.S. targets selected by bin Laden, independent operator Khalid Sheikh Mohammed, and al Qaeda operations chief Mohammed Atef... By the time 1 World Trade Center, North Tower, collapsed at 10:28 a.m. EDT, almost three thousand people had been killed or were dying; the financial center of the U.S. had been reduced to burning, toxic rubble; the iconic symbol of the military strength of the country had been severely damaged; the tranquility of a field in Pennsylvania had been shattered; U.S. Air Force and Air National Guard fighter aircraft had set up combat air patrols over Washington, D.C., and New York City; and the administration of President George W. Bush and the Department of Defense (DOD) had begun shifting major resources of the federal government and military services to a new national priority, homeland defense.

Air War Over America Leslie Filson,2003 Describes America's air sovereignty mission in the wake of the terrorist attacks of September 11, 2001.

The First 109 Minutes Office of Air Force History,U S Air Force,2015-02-22 On September 11, 2001, the North American Aerospace Defense Command, based at Peterson Air Force Base, Colorado, under the command of Gen. Ralph E. Eberhart, oversaw three air defense regions, which were responsible for protecting the airspace over Alaska, Canada, and the continental United States. The last of these, the Continental United States NORAD Region (CONR), under the command of the dual-hatted commander of First Air Force, Maj. Gen. Larry K. Arnold, oversaw the Northeast, the Western, and the Southeast Air Defense Sectors. The locations of the departures, flight paths, and crash sites of the four aircraft hijacked on September 11, 2001, were all in the

Northeast Air Defense Sector, commanded by Col. Robert K. Marr (see Diagram, NORAD Air Defense Structure on 9/11, p 53). On September 11, 2001, the responsibility for defending continental U.S. airspace rested with only fourteen fighter aircraft at seven air defense alert sites across the country. Based in Rome, New York, the Northeast Air Defense Sector had only two alert sites on which to call-Otis Air National Guard Base in Cape Cod, Massachusetts, and Langley Air Force Base in Hampton, Virginia. Each site had two designated alert fighters on duty twenty-four hours a day, seven days a week. Many other fighter aircraft were based across the country, but they were not NORAD assets, and it would take time to arm them and organize their crews.

VF-11/111 'Sundowners' 1942-95 Barrett Tillman, 2012-11-20 Fighting Squadron 11 was established at San Diego in August 1943, beginning a half-century record that spanned aerial combat in three wars from the piston to the jet age. The squadron produced seven aces while fighting in World War 2, Korea and Vietnam. From World War 2 until after the Cold War, the 'Sundowners' established an unexcelled record 'at the tip of the spear' in naval aviation history. The author, Barrett Tillman, is the world's most prolific US naval aviation author and he has published over two-dozen titles on the World War 2 period alone.

Israeli F-15 Eagle Units in Combat Shlomo Aloni, 2013-01-20 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

The First 109 Minutes Priscilla D. Jones, 2011 Presents a chronological history of four American commercial planes hijacked by suicide pilots against the United States on September 11, 2001 and the response of the North American Aerospace Defense Command.

King of Airfighters Ira Jones, 2009-07-30 A penetrating study of Britain's top World War I fighter ace, written by fellow pilot Ira Jones, the author of *An Air Fighter's Scrapbook*. Ira Jones' biography of Britain's top-scoring ace of the First World War has become the subject of some controversy over the last few years; most notably, it claims seventy-three "kills" for Mannock, making him the number-one-scoring Allied ace of the war. Later research has thrown serious doubt on this assertion, and indeed, Mannock himself only claimed fifty-one kills. Jones' biography is nevertheless an important account, especially when seen in the context of the time in which it was

first written. In particular, the biography delves into the mind of Mannock, portraying the singular nature of his character and the true stress that these pioneer air fighters experienced in the last few months of the war. Originally published in 1934 by Ivor Nicholson and Watson in London, the book has been reprinted—most recently in the 1990s by Greenhill Books as part of its Vintage Aviation Library—and reproduced from the original 1930s version of the book. Not a word has been changed in this Casemate edition, but the original, very dated type and page layout have been reworked, as has been the format in which the book is presented, to give a beautiful new treatment to this classic of aviation literature.

Sea and Air Fighting David Bilton, 2016-11-30 This is a compelling book for lovers of sea and air stories from the Great War era. In the thirteen stories told by the participants, many of whom were decorated for bravery, they describe their experiences of events: stories of luck, tenacity, courage, extreme danger, excitement and bravery. Also included are photographs to help set the scene for the vignettes and details of the authors' lives where possible. Seven stories detail the war at sea, while the other six reflect the war in the air from a civilian and combatant point of view. The exciting thing about the stories, apart from their freshness, is that they have remained unpublished for nearly eighty years and they are written by participants who describe exactly what they experienced and felt. Mrs Peel describes what an air raid was like from a civilian's point of view, and pilots describe both the humdrumness of some of their work and how it could suddenly change in to a fight for their life, in which luck often played a part in their survival. At sea, the authors describe the struggle to overcome the U-boat menace using Q ships and reveal the boredom, suspense and danger involved in laying a trap. The Battle of Jutland is described from an officer's active view of events, and the sinking of the Audacious is described by someone who was aboard and sworn to silence about the events. There is also the exciting story of the chase and fight between the Carmania and the Cap Trafalgar.

Viper Pilot Dan Hampton, 2012-10-02 THE NEW YORK TIMES BESTSELLING MEMOIR OF 21ST-CENTURY AIR COMBAT, BY ONE OF THE MOST DECORATED PILOTS IN AIR FORCE HISTORY (NEW YORK POST) 151 combat missions 21 hard kills on surface -to -air missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart First into a war zone, flying behind enemy lines to purposely draw fire, the wild weasels are elite fighter squadrons with the most dangerous job in the Air Force One of the greatest aviation memoirs ever written, *Viper Pilot* is an Air Force legend's thrilling eyewitness account of modern air warfare. For twenty years, Lieutenant Colonel Dan Hampton was a leading member of the Wild Weasels, logging 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or Viper. He spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. Earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. *Viper Pilot* is an unforgettable look into the closed world of fighter pilots and modern air combat.

Aircraft Versus Aircraft Norman L. R. Franks, 1998 As soon as the first aeroplane proved its value in war it became a target- and the fighter pilot was born. *Aircraft Versus Aircraft* tells the fascinating story of these brave

and tenacious men and the aircraft in which they fought from the early dawn of rudimentary tactics to the sophisticated technology of the present day. Includes strategy and tactics in WWI, WWII, Korea, Vietnam, Falklands and the Gulf.--

Wings at War Series, No. 1-6: Pacific counterblow, the 11th Bombardment Group and the 67th Fighter Squadron in the battle for Guadalcanal Center for Air Force History (U.S.), 1945 Wings at War Series, No. 3 Commemorative Edition. MiG-3 Aces of World War 2 Dmitriy Khazanov, 2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

Nieuport 11/16 Bébé vs Fokker Eindecker Jon Guttman, 2014-04-20 The appearance in July 1915 of the Fokker E I heralded a reign of terror over the Western Front that the Allies called the 'Fokker Scourge'. The French Nieuport 11 was one type desperately thrown into action to counter the Fokkers. The swirling dogfights between this fighter – and its more powerful but more unwieldy stablemate, the Nieuport 16 – and a succession of improved Fokkers, the E II, E III and E IV, came to symbolise air combat in World War I. This book gives a detailed look at the developmental history of the fighters, contrasting the interrupter gear-equipped Fokker with the more improvised solution incorporated in the Nieuport – a machine gun fitted to the upper wing to avoid the propeller entirely. The Germans went on to abandon the monoplane in favour of a new and deadly generation of biplane fighters, based on the lessons learned from these vicious engagements and influenced by the success of the French Nieuport.

F-14 Tomcat Units of Operation Enduring Freedom Tony Holmes, 2012-11-20 The legendary F-14 Tomcat was the weapon of choice to strike against the enemies of the United States in the wake of the September 11 attacks, with F-14s flying thousands of bombing missions on al-Qaeda and Taliban positions. Written by aviation expert Tony Holmes, this book explores the F-14 pilots and aircraft involved in Operation Enduring Freedom, with insights into the tactical approach and strategic aims provided by officers. Exclusive access to mission reports, combat diaries, full-colour artwork and photographs from the author's collection reveal the battle experiences of the most famous modern fast jet.

Mick Mannock, Fighter Pilot A. Smith, 2000-12-17 Mick Mannock, Fighter Pilot is the authoritative life story of Britain and Ireland's most successful fighter pilot of the First World War; a working class hero and staunch socialist who in the skies above the Western Front combined engineering prowess, tactical initiative, and grim determination to become an inspirational squadron commander.

The Future of Naval Aviation Owen R. Cote, 2006 Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these demands by exploiting technologies and operational practices developed in the last decade that will greatly increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air Support; (3) The Sea Shield Must Be Dominant If the Sea Base Is to Be Effective; (4) Adapting; (5) The Spectrum from Presence to Major Combat; (6) Technology and the Spectrum of Threat; (7) The Value of Robust Airborne Early Warning (AEW) Aircraft; (8) No Substitute for Range in Carrier Aviation; (9) The Need for Airborne Electronic Attack (AEA) is Not Going Away; (10) Land-Based Maritime Patrol Aircraft; (11) Multimission Helicopters; (12) New Capabilities and Challenges; (13) Eliminating the Weather Sanctuary for Mobile Targets; (14) Providing a Dominant Defense of the Sea Base; (15) Shoot Archers Not Arrows; (16) Make Opposing Submarines Pay for Their Inevitable Indiscretions; (17) Get Back in the Counter-Surveillance Business; and (18) The Force of the Future.

Topgun Brad Elward, 2020-07-28 This book provides a unique, illustrated history of the US Navy Fighter Weapons School's 50-year history. Currently located at Naval Air Station Fallon, Nevada, TOPGUN was formed in late 1968 at Naval Air Station Miramar, California, to create a graduate-level course in fighter tactics for Navy pilots deploying to Vietnam. Before TOPGUN, Navy F-4 Phantom II fighter crews in Vietnam managed only a 2.5:1 kill ratio versus Soviet-built MiG-17 and MiG-21 fighters: after TOPGUN formed, the community tallied a 12.5:1 kill ratio. Since then, TOPGUN has become the standard-bearer of Navy fighter and strike fighter tactics and training and is recognized worldwide as a center of excellence. TOPGUN's tactics and pilot training are explained, as well as changes and developments throughout the years to the present day. All aircraft flown at TOPGUN since its founding are also shown, including A-4 Skyhawk, T-38A/B Talon, F-5E/F Tiger II, F-16N Viper, F-14A Tomcat, F/A-18 Hornet, F-16A/B Falcon, and F/A-18E/F Super Hornet.
