The Organization and Lineage of the United States Air Force Charles A. Ravenstein,1986 This manuscript is part of a continuing series of historical volumes produced by the Office of Air Force History in direct support of Project Warrior. Since its beginning in 1992, Project Warrior has captured the imagination of Air Force people around the world and reawakened a keener appreciation of our fundamental purpose as Service: to deter war, but to be prepared to find and win should deterrence fail.

Air Force Manual United States. Dept. of the Air Force,

Air Force ,1960

Introduction to the United States Air Force ,2001 To lead the US Air Force into the future, it is necessary to understand the past and present nature of the force. With this in mind, Air Force leaders have always sought to arm members of the force with a basic knowledge and understanding of Air Force culture and history. This volume is a contribution to that ongoing educational process, but as the title states, this is only an introduction. The information provided here merely scratches the surface of the fascinating stories of the people, equipment, and operations of the Air Force Topics that are covered here in only a few short paragraphs have been, and will continue to be the subject of entire books. We hope this volume will be a starting point and a reference work to facilitate your continuing study of aerospace power. The reader should keep in mind that all the people, operations, and aerospace craft included in this book have been important to the US Air Force, but they are not the only ones that have been important. The US Air Force has gained much from other nations, other US military services, and civilian organizations and these outside influences on the US Air Force are not included in this volume. This Introduction to the United States Air Force is organized into two parts and five appendices. The first part is organized chronologically and groups significant operations and personalities together in several critical periods in the development of the US Air Force. The second part covers aerospace craft and is organized by type (fighters, bombers, missiles, etc,) in order to show the development of each type over time. Following Part II are appendices listing the senior leaders of the early air forces (before the creation of the US Air Force in 1947), the Air Force Chiefs of Staff, the Chief Master Sergeants of the Air Force, Fighter Aces, and Medal of Honor Winners.
