Excellence in Science Book exemplify outstanding and engaging science writing and illustration for young readers A children's instructional book on how to use readily available materials to turn the house into a science lab Physics teacher Bobby Mercer provides readers with more than 50 great hands-on experiments that can be performed for just pennies, or less. Each project has a materials list, detailed step-by-step instructions with illustrations, and a brief explanation of the scientific principle being demonstrated. Only The Light Moves Francis A Doherty,2023-11-01 Only the Light Moves tells the story of a twenty-four-year-old US Army pilot who volunteered to fly covert S.O.G., or Studies and Observations Group, reconnaissance missions over the Ho Chi Minh Trail, a region that came to represent not only the United States' war with Vietnam, but also the "secret war" with Laos and Cambodia. But this is not simply a war story; it is a love story about flying. Captain Francis A. Doherty spent every day for ten months above the jungle battlefield in a Cessna O-1 Bird Dog. The first all-metal fixed-wing aircraft ordered for and by the United States Army following the Army Air Forces' separation from it in 1947, the single-engine Bird Dog was a liaison and observation aircraft. And for this role, it was completely unarmed. It was from the cockpit of a Bird Dog that Captain Doherty observed this illusive war,

perhaps searching out enemy troop movements or calling down waiting F-4 Phantoms to strike a new target. It was a war in which he followed his father's footsteps in his dream to become a pilot, and where he learned a compassion that extended both to his comrades and the civilians caught in the middle of that terrible war. In *Only the Light Moves* Captain Doherty only reveals the highs and lows of his year at war in Vietnam but expands beyond his time in the conflict. He explores the emotional struggle he and his comrades faced after they returned home, reconciliations with lost faith, and the incredible impact of war on families. We are also given an insight into Francis' subsequent journey to becoming a commercial airline pilot. His story makes no effort to glorify the violence that took the lives of so many. There are no broad stroke proclamations about the war, only a very personal, sensitive account of a terrible conflict seen through the eyes of a then young pilot in the air, illuminating the reality and the cost of when one's country decides to go to war.

Mechanical Engineering for Makers Brian Bunnell, Samer Najia, 2020-01-15 This practical, user-friendly reference book of common mechanical engineering concepts is geared toward makers who don't have (or want) an engineering degree but need to know the essentials of basic mechanical elements to successfully accomplish their personal projects. The book provides practical mechanical

By the Morning of Our Healing Steven C. House,2010-11-22 *By The Morning of Our Healing* contains poems with passion, depth, sincerity and the stuff of living. They convey honestly and vigorously the joys, pains and rough resolutions of living and loving in the world. The book calls the reader to reflect on that invisible contract we all have with life. Remember that naive and idealistic state of sweet young love, becoming aware for the first time of the immense power of the ocean or the unpredictable impact of growling death? In response, we are all called to show up and participate.

These poems convey one man's journey through these unique yet universal experiences. With confusion and anxiety, joy and sudden pleasure, the book takes the reader on a powerful journey through the geography of relationships. The book calls to mind the awareness that suffering does not stop us from succeeding. Healing happens all the time and in quite gentle and subtle ways. The book reaches into scenes and senses of living, loving and loss. It reflects the wisdom, triumphs and tragedies encountered along the way. Expressed here as well, is how we are shaped by the power of the wind, the grandeur of the mountains, the ethereal presence of the ocean and God's subtle voice in all. You will find here an eclectic collection of poems. Some are as serious as leaving home. Others are as carefree as an ice cream sundae. Hopefully you will identify with and hear echoes of your own voice and journey. These friendly poems will take you on a pleasant and challenging ride through living and loving that may get your heart pumping again and remind you that you are still alive and the fat lady hasn't sung yet!.

Between Air and Electricity Cathy van Eck, 2017-02-09 Composers and sound artists have explored for decades how to transform microphones and loudspeakers from “inaudible” technology into genuinely new musical instruments. While the sound reproduction industry had claimed perfect high fidelity already at the beginning of the twentieth century, these artists found surprising ways of use – for instance tweaking microphones, swinging loudspeakers furiously around, ditching microphones in all kinds of vessels, or strapping loudspeakers to body parts of the audience. *Between air and electricity* traces their quest and sets forward a new theoretical framework, providing historic background on technological and artistic development, and diagrams of concert and performance set-ups. From popular noise musician Merzbow to minimalist classic Alvin Lucier, cult instrument inventor Hugh Davies, or contemporary visual artist Lynn Pook – they all aimed to make audible what was supposed to remain silent.

Driving Identities Ken McLeod, 2020-04-30 *Driving Identities* examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies,

it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. *Driving Identities* is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.
