**I, Avatar** Mark Stephen Meadows,2007-12-27 What is an avatar? Why are there nearly a billion of them, and who is using them? Do avatars impact our real lives, or are they just video game conceits? Is an avatar an inspired rendering of its creator's inner self, or is it just one among millions of anonymous vehicles clogging the online freeways? Can we use our avatars to really connect with people, or do they just isolate us? And as we become more like our avatars do they become more like us? In *I, Avatar*, Mark Stephen Meadows answers some of these questions, but more importantly, he raises hundreds of others in his exploration of avatars and the fascinating possibilities they hold. His examination of avatars through the lenses of sociology, psychology, politics, history, and art, he will change the way you look at even a simple online profile and revolutionize the idea of avatars as part of our lives, whether first or second.

**Shots in the Dark** Shoji Yamada,2020-06-24 In the years after World War II, Westerners and Japanese alike elevated Zen to the quintessence of spirituality in Japan. Pursuing the sources of Zen as a Japanese ideal, Shoji Yamada uncovers the surprising role of two cultural touchstones: Eugen Herrigel's *Zen in the Art of Archery* and the Ryoanji dry-landscape rock garden. Yamada shows how both became facile conduits for exporting and importing Japanese culture. First published in German in 1948 and translated into Japanese in 1956, Herrigel's book popularized ideas of Zen both in the West and in Japan. Yamada traces the prewar history of Japanese archery, reveals how Herrigel mistakenly came to understand it as a traditional practice, and explains why the Japanese themselves embraced his interpretation as spiritual discipline. Turning to Ryoanji, Yamada argues that this epitome of Zen in fact bears little relation to Buddhism and is best understood in relation to Chinese myth. For much of its modern history, Ryoanji was a weedy, neglected plot; only after its allegorical role in a 1949 Ozu film was it popularly linked to Zen. Westerners have had a part in redefining Ryoanji, but as in the case of archery, Yamada's interest is primarily in how the Japanese themselves have invested this cultural site with new value through a spurious association with Zen.

Japanese Ghost Stories Lafcadio Hearn,2019-09-24 Brilliantly entertaining and eerie ghost stories, regarded as major classics in Japan, by the Irish writer and Japanophile Lafcadio Hearn—whose life inspired bestselling writer Monique Truong's novel *The Sweetest Fruits* A Penguin Classic In this collection of classic ghost stories from Japan, beautiful princesses turn out to be frogs, paintings come alive, deadly spectral brides haunt the living, and a samurai delivers the baby of a Shinto goddess with mystical help. Here are all the phantoms and ghouls of Japanese folklore: *rokuro-kubi*, whose heads separate from their bodies at night; *jikininki*, or flesh-eating goblins; and terrifying faceless *mujina* who haunt lonely neighborhoods. Lafcadio Hearn, a master storyteller, drew on traditional Japanese folklore, infused with memories of his own haunted childhood in Ireland, to create the chilling tales in *Japanese Ghost Stories*. They are today regarded in Japan as classics in their own right.

*The Second Life Herald* Peter Ludlow, Mark Wallace, 2007 When a virtual journalist for a virtual newspaper reporting on the digital world of an online game lands on the real-world front page of the New York Times, it just might signal the dawn of a new era. Virtual journalist Peter Ludlow was banned from *The Sims Online* for being a bit too good at his job--for reporting in his virtual tabloid *The Alphaville Herald* on the cyber-brothels, crimes, and strong-arm tactics that had become rife in the game--and when the Times, the BBC, CNN, and other media outlets covered the story, users all over the Internet called the banning censorship. Seeking a new virtual home, Ludlow moved the *Herald* to another virtual world--the powerful online environment of *Second Life*--just as it was about to explode onto the international mediascape and usher in the next iteration of the Internet. In *The Second Life Herald*, Ludlow and his colleague Mark Wallace take us behind the scenes of the *Herald* as they report on the emergence of a fascinating universe of virtual spaces that will become the next generation of the World Wide Web: a 3-D environment that provides richer, more expressive interactions than the Web we know today. In 1992, science fiction writer Neal Stephenson imagined the Metaverse, a virtual space that we would enter via the Internet and in which we would conduct important parts of our daily lives. According to Ludlow and Wallace, that future is coming sooner than we may think. They chronicle its chaotic, exhilarating, frightening birth, including the issue that the mainstream media often ignore: conflicts across the client-server divide over who should write the laws governing virtual worlds.

Hotel Insomnia Charles Simic, 1992-11-11 In this volume, Simic fills the wee hours of his poetry with angels and pigs, riddles and cemeteries. His is a rich, haunted world of East European memory and American present--a world of his own creation, one always full of luminous surprise. "Simic writes so simply that his words fall like drops of water, but they ripple outward to evoke an ominous and numinous world" (Washington Post Book World).

*Laser-induced Graphene* Ruquan Ye, James M. Tour, 2020-11-30 LIG is a revolutionary technique that uses a common CO2 infrared laser scribe, like the one used in any machine shop, for the direct conversion of polymers into porous graphene under ambient conditions. This technique combines the preparation and patterning of 3D graphene in a single step, without the use of wet chemicals. The ease in the structural engineering and excellent mechanical properties of the 3D graphene obtained have made LIG a versatile technique for applications across many fields. This book compiles cutting-edge research on LIG by different research groups all over the world. It discusses the strategies that have been developed to synthesize and engineer graphene, including controlling its properties such as porosity, composition, and surface characteristics. The authors are pioneers in the discovery and development of LIG and the book will appeal to anyone involved in nanotechnology, chemistry, environmental sciences, and device development, especially those with an interest in the synthesis and applications of graphene-based materials.

**Reimagining a Lost Armenian Home** Armen T. Marsoobian, 2017-02-28 For nearly a century, members of the Dildilian family practiced the art of photography in Ottoman Turkey, Greece and the United States. This book contains over 300 photographs, most taken during the Ottoman era. The photos record a crucial half century of Armenian culture, with the earliest dating from 1888, when Tsolag Dildilian opened and operated the family business in central Anatolia, first in Sivas and later in Marsovan and Samsun, and the last taken in late 1930s Greece after the family's forced exile from their homeland in 1922. The photographs and the stories that unfold around them capture a defining period in the nearly 3,000-year history of the Armenians in Anatolia and the Armenian Highlands. The early- twentieth century witnessed the violent erasure of the Armenians from their historic homeland, with catastrophic effects for the Dildilian family and their community. Yet this was also a period of unprecedented educational, cultural and commercial development for the Armenians. The Dildilian family was intimately involved in the triumphs and tragedies of these years and this book, through its rich pictorial history, sheds unprecedented light on the real-life experiences of Armenians in the devastating years of the Armenian Genocide and beyond. It is an unusual and original contribution to the social history of the Near East.

They aim to provide a first exercise for students who are not ready to read a whole book in the English language. *Play Money* Julian Dibbell, 2007-03-09 *Play Money* explores a remarkable new phenomenon that's just beginning to enter public consciousness: MMORPGs, or Massively MultiPlayer Online Role-Playing Games, in which hundreds of thousands of players operate fantasy characters in virtual environments the size of continents. With city-sized populations of nearly full-time players, these games generate their own cultures, governments, and social systems and, inevitably, their own economies, which spill over into the real world. The desire for virtual goods -- magic swords, enchanted breastplates, and special, hard-to-get elixirs -- has spawned a cottage industry of virtual loot farmers: People who play the games just to obtain fantasy goods that they can sell in the real world. The best loot farmers can make between six figures a year and six figures a month. *Play Money* is an extended walk on the weird side: a vivid snapshot of a subculture whose denizens were once the stuff of mere sociological spectacle but now -- with computer gaming poised to eclipse all other entertainments in dollar volume, and with the lines between play and work, virtual and real increasingly blurred -- look more and more like the future.

**The Making of Second Life** Wagner James Au, 2009-10-13 The wholly virtual world known as

Second Life has attracted more than a million active users, millions of dollars, and created its own—very real—economy. The Making of Second Life is the behind-the-scenes story of the Web 2.0 revolution's most improbable enterprise: the creation of a virtual 3-D world with its own industries, culture, and social systems. Now the toast of the Internet economy, and the subject of countless news articles, profiles, and television shows, Second Life is usually known for the wealth of real-world companies (Reuters, Pontiac, IBM) that have created virtual offices within it, and the number of users (avatars) who have become wealthy through their user-created content. What sets Second Life apart from other online worlds, and what has made it such a success (one million-plus monthly users and growing) is its simple user-centered philosophy. Instead of attempting to control the activities of those who enter it, the creators of Second Life turned them loose: users (also known as Residents) own the rights to the intellectual content they create in-world, and the in-world currency of Linden Dollars is freely exchangeable for U.S. currency. Residents have responded by generating millions of dollars of economic activity through their in-world designs and purchases—currently, the Second Life economy averages more than one million U.S. dollars in transactions every day, while dozens of real-world companies and projects have evolved and developed around content originated in Second Life. Wagner James Au explores the long, implausible road behind that success, and looks at the road ahead, where many believe that user-created worlds like Second Life will become the Net's next generation and the fulcrum for a revolution in the way we shop, work, and interact. Au's story is narrated from both within the corporate offices of Linden Lab, Second Life's creator, and from within Second Life itself, revealing all the fascinating, outrageous, brilliant, and aggravating personalities who make Second Life a very real place—and an illuminating mirror on the real (physical) world. Au writes about the wars they fought (sometimes literally), the transformations they underwent, the empires of land and commerce they developed, and above all, the collaborative creativity that makes their society an imperfect utopia, better in some ways than the one beyond their computer screens.
