Airfield Dedication and Hall of Heroes Enshrinement Naval Air Station Kingsville (Tex.),1987

Bloody Sixteen Peter Fey,2018-05 Strategy and reality collide in Peter Fey's gripping history of aircraft carrier USS Oriskany's three deployments to Vietnam with Carrier Air Wing 16 (CVW-16). Its tours coincided with the most dangerous phases of Operation Rolling Thunder, the ill-fated bombing campaign against North Vietnam, and accounted for a quarter of all the naval aircraft lost during Rolling Thunder—the highest loss rate of any carrier air wing during Vietnam. The Johnson administration's policy of gradually applied force meant that Oriskany arrived on station just as previous restrictions were lifted and bombing raids increased. As a result CVW-16 pilots paid a heavy price as they ventured into areas previously designated “off limits” by Washington DC. Named after one of the bloodiest battles of the Revolutionary War, the Oriskany lived up to its name. After two years of suffering heavy losses, the ship caught fire—a devastating blow given the limited number of carriers deployed. With only three months allotted for repairs, Oriskany deployed a third and final time

and ultimately lost more than half of its aircraft and more than a third of its pilots. The valor and battle accomplishments displayed by Oriskany's aviators are legendary, but the story of their service has been lost in the disastrous fray of the war itself. Fey portrays the Oriskany and its heroes in an indelible memorial to the fallen of CVW-16 in hopes that the lessons learned from such strategic disasters are not forgotten in today's sphere of war-bent politics.

The Speed of Heat Thomas W. Young, 2010-03-22 With its fleet of large transport aircraft, the United States military can put personnel and equipment anywhere on the globe within hours. In the Iraq and Afghanistan wars in particular, virtually every soldier, every bullet, every pint of blood, and every bite of food have arrived in the war zone by airlift. This book tells the story of one Air National Guard airlift wing as related by its members. The 167th Airlift Wing of the West Virginia Air National Guard consisted of a squadron of 12 C-130 cargo planes, their crews, and all the supporting

sections—in all, more than 1,200 people. The author, a former Associated Press reporter turned aviator, flew as an active member of that unit and interviewed nearly 70 servicemen and women for this book. They include aircrews who dodged heat-seeking missiles, mechanics who made combat repairs, flight nurses who treated and transported the wounded, even two motor pool truck drivers struck by a roadside bomb.

Wichita , 2019-09-03 This book commemorates Wichita's role as Air Capital of the World. It takes readers from the early birds and barnstormers to the pioneers and entrepreneurs who established

dozens of aircraft and associated factories in the 1920s. The story continues with the founding of Cessna, Beechcraft and Stearman (which became Boeing Wichita, then Spirit AeroSystems) and the massive build-up during World War II. Robust post-war growth got another boost when Bill Lear came to town and launched the business jet revolution with his Learjet. Today Wichita remains at the center of global aviation design and manufacturing with Textron Aviation, Spirit AeroSystems, Bombardier Learjet, Airbus and many dozens of smaller aviation manufacturers, suppliers and support organizations. What made Wichita the Air Capital? Flat prairies resembled one enormous landing field. Southwesterly winds added extra thrust to get and stay aloft. Farming and small manufacturing provided a legion of imaginative, industrious problem-solvers. Local boosters latched onto and promoted anything that flew. The city's central location provided an ideal refueling stop for coast-to-coast airmail routes. And oil generated a class of savvy, starry-eyed entrepreneurs who both used aircraft and had money to invest. Wichita brought it all together. The people. The promise. The planes. On Sept. 2, 1911, Albin Longren became the first person to build and fly an airplane in Kansas.

His pusher-type biplane lifted off from a hayfield with a four-gallon gas tank and flight instruments that consisted of a pocket watch and barometer. The first plane built in Wichita rolled out of production in 1917, when Clyde Cessna assembled his Comet. Wichita's first commercial aircraft, the Swallow, came from the E.M. Laird Airplane Co. in 1920. By 1928, Wichita was general aviation's manufacturing grand central, producing 120 airplanes a week - a quarter of all U.S. output. A Chamber of Commerce Air Capital logo contest celebrated the city's 16 aircraft manufacturers, six aircraft engine factories, 11 airports and dozen flying schools. Wichita produces more airplanes - almost 300,000 to date - and offers more skilled aviation workers than any other city. Aviation forms Wichita's heritage and future.

Air National Guard at 60 Susan Rosenfeld, Charles Joseph Gross, 2007 The Air National Guard's role within the Air Force has matured and changed enormously since its establishment as a separate reserve component September 18, 1947. Air National Guard members have served around the world and their military experience and civilian skills have proven invaluable as our nation prosecuted conflicts in Korea, Vietnam, the Persian Gulf, Kosovo, Afghanistan, and Iraq. They also served during

several major contingencies including the Cuban Missile Crisis and the Berlin Crisis if 1961 and 1962. In addition, Air Guard members made major contributions in a host of other operations in Panama, the Balkans, Somalia, Rwanda, Haiti, and the Iraq no-fly zones instituted after Operation Desert Strom. In the United States, the Hurricane Katrina relief efforts brought into sharp focus the Air Guard's well-established role as America's hometown Air Force. The Air National Guard flew over 3,000 sorties, moved over 30,000 passengers, and hauled over 11,000 tons of desperately needed supplies into Gulf Coast airfields, some of which Guard personnel opened and operated. Air National Guard members rescued 1,443 people--heroically saving people stranded by the flood. At eight sites along the Gulf Coast, Air National Guard medical units treated more than 15,000 patients, combining expert medical care with compassion.

On Wave and Wing Barrett Tillman,2017-02-27 What defended the U.S. after the attack on Pearl Harbor, defeated the Soviet Union in the Cold War, and is an essential tool in the fight against terror? Aircraft Carriers. For seventy years, these ships remained a little understood cornerstone of American power. In his latest book, *On Wave and Wing*, Barrett Tillman sheds light on the history of these floating leviathans and offers a nuanced analysis of the largest man-made vessel in the history of the world.

Carrier Air Group Commanders Robert L. Lawson,2000 The study of the U.S. Navys air group and air wing commanders is a study of carrier aviation itself. This detailed volume presents a history of the establishment of the carrier air group commander billet and the attendant formal air groups. The book is divided into four sections: Section One A Historical Overview, presents an overview of naval aviation

history from 1898 to 1922, when the U.S. Navy commissioned its first aircraft carrier USS Langley (CV-1), with its wood-and-fabric biplanes. The pages next describe carrier aviation from Langley to the 90,000-ton supercarriers of today with their supersonic jets. This section also contains air group organization charts showing their development over the years. Section Two Evolving the System, discusses the genesis and evolution of the air group/wing commander billet, as well as the development of the organizations they commanded. It contains biographical sketches of the first CAGs and their wing commander predecessors. Section Three The Men, profiles more than forty of the Navys more notable CAGs by use of their personal reminiscences and anecdotes. Their stories give the reader a feel for the responsibilities, joys and sorrows that accompany the assumption of the title: CAG. Additionally, the profiles give an insiders view of the U.S. Navys combat operation tactics from World War II to Desert Storm. The books final section The Machines, contains a chronological selection of photographs and some profile drawings of the aircraft flown by wing commanders from 1931 to the present. Heavy emphasis has been given to provide as many high-quality color

photographs as were possible to locate. This section should have great appeal to both historian and enthusiast in its coverage as it not only graphically presents the aircraft flown, but also covers the evolution of carrier aviation itself. An appendix listing every known CAG and dates of his command concludes the book. Existence of this data to exist. *Carrier Air Group Commanders: The Men and Their Machines* is an important historical document that will serve both as a reference work and enjoyable reading for many years.
