Combat Command Adm. Frederick C. Sherman, 2017-07-11 **COMMANDING THE LEXINGTON DURING THE BATTLE OF THE CORAL SEA** I saw the enemy torpedo planes coming in on both bows. The air was full of anti-aircraft bursts and the din was terrific. I motioned to the helmsman for a hard left rudder, just as the enemy planes started disgorging their fish. The water in all directions seemed full of torpedo wakes. Bombs were dropping all around us. Great geysers of water from near misses were going up higher than our masts, and the ship shuddered from the explosions of the ones that hit. The enemy planes split up to fire on both bows, the hardest maneuver for us to counter. Then I remember seeing two wakes coming straight for our port beam, and there was nothing I could do about them. The wakes approached the ship's side, and I braced myself for the explosion.... **COMBAT COMMAND**

Evolution of Aircraft Carriers Scot MacDonald, 1964

At the Helm of USS America James E. Wise, Jr., Scott Baron, 2014-07-29 Only the best officers are given command of U.S. Navy ships, and only the elite of these are selected for aircraft carriers. The USS America was the third of four Kitty Hawk-class super-carriers. Commissioned in 1965, decommissioned in 1996, she served three times in Vietnam, and once each in Libya, the Persian Gulf and Bosnia. This book profiles the 23 men who commanded the America and her crew of 5,000 during 31 years. Most of them were combat veterans--World War II, Korea, Vietnam, Mayaguez Rescue Operations, Lebanon, Haiti, Libya, Bosnia, and Desert Storm. Four were Naval Academy graduates; seven were test pilots; one became Inspector General of the Navy; one wore both Navy wings and submariner dolphins; and one was a prisoner of war in Vietnam for nearly six years. Two retired as admirals--one was Chief of Naval Operations--five as vice admirals, and 11 as rear admirals. Each profile gives a career account based on official biographies, published memoirs, and interviews with the commanders or their families.

A Methodology for Estimating the Effect of Aircraft Carrier Operational Cycles on the Maintenance Industrial Base Roland J.

Yardley, James G. Kallimani, John F. Schank, 2007 The Fleet Response Plan is a U.S. Navy program to enhance the operational availability of the aircraft carrier fleet. This report describes program modeling that varies the time between depot availabilities and the size of the depot work packages, to estimate its effect on the maintenance industrial base and the operational availability of the aircraft carrier fleet.

US Navy Carrier Aircraft vs IJN Yamato Class Battleships Mark Stille, 2015-09-20 As the Pacific War approached a crescendo, the clashes between swarming US Navy carrier aircraft, and the gigantic Imperial Japanese Navy (IJN) Yamato-class battleships became symbolic of the fortunes of the two nations. They also served as a metaphor for the profound changes in naval technology and doctrine that the war had brought about. The two opposing forces were the most powerful of their kind - the Japanese Yamato and Musashi were the biggest most heavily armored and armed battleships ever built, while US carrier aviation had evolved into a well-oiled, war-winning machine. With detailed analysis of the technical features of the opposing war machines and a gripping account of the fighting itself, this vividly illustrated work presents views from the cockpits of US Navy Divebombers, and down the sights of IJN anti-aircraft guns, during two of the most dramatic naval engagements ever fought.

Aircraft Carriers Antony Preston, 1982 Traces the history of aircraft carriers since 1914, chronicling the role played by these ships in World War II and in modern defense systems.

Admiral John S. McCain and the Triumph of Naval Air Power William F Trimble,2019-04-15 Admiral John S. McCain and the Triumph of Naval Air Power covers the life and professional career of Adm. John S. McCain Sr. (1884–1945). Spanning most of the first half of the twentieth century, McCain’s life and career highlight the integration of aviation into the Navy, emphasizing the evolution of the aircraft carrier from a tactical element of the fleet stressing sea control to a strategic force capable of long-range power projection. Although much of the book focuses on carrier aviation, McCain was instrumental in the emergence of flying boats, considered essential for long-range reconnaissance in the Pacific. One of the senior officers branded as “Johnny-Come-Latelys” by pioneer aviators, McCain nevertheless brought fresh approaches and innovation to naval aviation. His prewar and initial wartime commands encompassed tender-based and shore-based aviation, which were critical to early operations in the Pacific, yet McCain also understood the power and potential of carrier-based aviation, initially as commanding officer of the USS Ranger before the war, then as a carrier task force commander under Adm. William F. Halsey in the Pacific in 1944 and 1945. Moreover, he served tours as Chief of the Bureau of Aeronautics and the first Deputy Chief of Naval Operations (Air) in 1942–1944. In these posts he witnessed and played a role in the culmination of naval air power as a means of delivering crippling blows to the enemy’s homeland. McCain was among only a handful of officers who achieved prominence during the war and who had experience in all of these varied and challenging levels of command.

The Complete Idiot's Guide to Aircraft Carriers C. A. Mobley,Michael Benson,2003 Offers a guide to modern nuclear-powered aircraft carriers, and discusses the history of aircraft carriers from their development during World War I and their role in the Pacific Theater during World War II, to their present-day status as the front line of American defense.

Leveraging America's Aircraft Carrier Capabilities John Gordon,2006 As the United States seeks ways to stretch its defense dollars, pursue the Global War on Terrorism, and meet other national-security challenges, it is highly likely that policymakers will increase their reliance on aircraft carriers, using them more often and in more situations than they have in the past, especially if the vessels have the additional capabilities to respond appropriately. The current and expected use of aircraft carriers led the United States Navy in fall 2004 to commission RAND to explore new and nontraditional ways that the United States might be able to employ aircraft carriers in pursuit of traditional and emerging military and homeland defense missions. Over six months, RAND created and convened two Concept Options Groups (COGs)-small groups of experienced military and civilian experts, defense analysts, and potential users who work together to identify promising ways to employ military might in nontraditional ways-to explore possible nontraditional roles for aircraft carriers. One COG explored and identified new ways that aircraft carriers could be used in combat operations; the second COG examined ways that the vessels could be used in noncombat, homeland security missions or to help the nation recover from terrorist attacks or natural disasters in U.S. territories. Among the combat recommendations to come from the COG insights are that abilities need to be enhanced to reconfigure carrier air wings; among noncombat recommendations are that the availability of nonready carriers to respond to unforeseen crises needs to be improved. This monograph summarizes the activities, findings, and recommendations of both carrier COGs. It should be of special interest to the Navy and to uniformed and civilian decisionmakers with responsibilities related to naval and carrier operations, maritime domain awareness, or homeland security.

Increasing Aircraft Carrier Forward Presence Roland J. Yardley,James G. Kallimani,Clifford A. Grammich,John F. Schank,2008 The authors assess several one- and two-deployment cycles, assuming a deployment length of six months and a time-between-deployments length equal to twice the duration of the previous deployment. Among many findings, RAND concludes that shorter cycles can increase the forward presence of the carrier fleet and help level shipyard workloads. Longer, two-deployment cycles can increase forward presence, but may result in shipyard workload complications and deferred-work backlogs.--BOOK JACKET.

Nuclear Weapons and Aircraft Carriers Jerry Miller,2001-04-17 With the advent of the atomic bomb in 1945 and its impact on strategic thinking, the future of naval aviation looked bleak. Rapid demobilization after the war eliminated many carriers, and most policy makers believed that future wars would be fought with nuclear weapons delivered by land-based aircraft. In *Nuclear Weapons and Aircraft Carriers*, Jerry Miller traces the struggle of respected naval leaders to promote a different vision and the innovations in the design and engineering of carriers and aircraft that resulted. He argues that the Navy's hard-won nuclear capability played a significant role in ending the Cold War.

Carrier Air Group Commanders Robert L. Lawson,2000 The study of the U.S. Navys air group and air wing commanders is a study of carrier aviation itself. This detailed volume presents a history of the establishment of the carrier air group commander billet and the attendant formal air groups. The book is divided into four sections: Section One A Historical Overview, presents an overview of naval aviation history from 1898 to 1922, when the U.S. Navy commissioned its first aircraft carrier USS Langley (CV-1), with its wood-and-fabric biplanes. The pages next describe carrier aviation from Langley to the 90,000-ton supercarriers of today with their supersonic jets. This section also contains air group organization charts showing their development over the years. Section Two Evolving the System, discusses the genesis and evolution of the air group/wing commander billet, as well as the development of the organizations they commanded. It contains biographical sketches of the first CAGs and their wing commander predecessors. Section Three The Men, profiles more than forty of the Navys more notable CAGs by use of their personal reminiscences and anecdotes. Their stories give the reader a feel for the responsibilities, joys and sorrows that accompany the assumption of the title: CAG. Additionally, the profiles give an insiders view of the U.S. Navys combat operation tactics from World War II to Desert Storm. The books final section The Machines, contains a chronological selection of photographs and some profile drawings of the aircraft flown by wing commanders from 1931 to the present. Heavy emphasis has been given to provide as many high-quality color photographs as were possible to locate. This section should have great appeal to both historian and enthusiast in its coverage as it not only graphically presents the aircraft flown, but also covers the evolution of carrier aviation itself. An appendix listing every known CAG and dates of his command concludes the book. lation of this data to exist. *Carrier Air Group Commanders: The Men and Their Machines* is an important historical document that will serve both as a reference work and enjoyable reading for many years.
