That's the Way It Is Charles L. Ponce de Leon, 2016-09-09 Ever since Newton Minow taught us sophisticates to bemoan the descent of television into a vast wasteland, the dyspeptic chorus of jeremiahs who insist that television news in particular has gone from gold to dross gets noisier and noisier. Charles Ponce de Leon says here, in effect, that this is misleading, if not simply fatuous. He argues in this well-paced, lively, readable book that TV news has changed in response to broader changes in the TV industry and American culture. It is pointless to bewail its decline. *That's the Way It Is* gives us the very first history of American television news, spanning more than six decades, from Camel News Caravan to Countdown with Keith Oberman and The Daily Show. Starting in the latter 1940s, television news featured a succession of broadcasters who became household names, even presences: Eric Sevareid, Walter Cronkite, David Brinkley, Peter Jennings, Brian Williams, Katie Couric, and, with cable expansion, people like Glenn Beck, Jon Stewart, and Bill O'Reilly. But behind the scenes, the parallel story is just as interesting, involving executives, producers, and journalists who were responsible for the field's most important innovations. Included with mainstream network news programs is an engaging treatment of news magazines like 60 Minutes and 20/20, as well as morning news shows like Today and Good Morning America. Ponce de Leon gives ample attention to the establishment of cable networks (CNN, and the later competitors, Fox News and MSNBC), mixing

in colorful anecdotes about the likes of Roger Ailes and Roone Arledge. Frothy features and other kinds of entertainment have been part and parcel of TV news from the start; viewer preferences have always played a role in the evolution of programming, although the disintegration of a national culture since the 1970s means that most of us no longer follow the news as a civic obligation. Throughout, Ponce de Leon places his history in a broader cultural context, emphasizing tensions between the public service mission of TV news and the quest for profitability and broad appeal.

ENG, Television News and the New Technology Richard D. Yoakam, Charles F. Cremer, 1989 Both a text and a professional reference, ENG (electronic news gathering) illustrates and discusses the new technology and concepts that have revolutionized television news. Combining an academic with a professional approach, this book deals extensively with the uses of

electronic news gathering and electronic field production (EFP). It also features the latest in satellite news gathering (SNG) and the distribution of that material. This book, which carries the endorsement of the Radio-Television News Directors Association (RTNDA), combines a comprehensive discussion of concepts with instruction in using the technology. It also deals with legal, ethical, operational, and organizational problems that technology has brought to the business of news gathering. Essentially, the authors show how to apply the latest news gathering and microwave technology to researching, writing, reporting, photographing, editing, packaging, producing, and airing television news stories, news packages, newscasts, live reports, and special events. Essays by established professionals supplement the text. These contributors include Tom Wolzien, NBC News, Larry Hatteberg, two-time NPPA News Cameraman of the Year, Lynn Cullen, WTAE-TV, Pittsburgh, and John Premack, WCVB-TV, Boston. The authors have taken a potentially intimidating and complex subject and made it understandable to students and acceptable to practicing professionals. The book is a unique blend of academic and professional material with step-by-step instructions as well as case studies from actual news reporting events.

From Cronkite to Colbert Geoffrey Baym, 2010 In a time when increasing numbers of people are tuning out the nightly news and media consumption is falling, the late-night comedians have become some of the most important newscasters in the country. From Cronkite to Colbert explains why. It

examines an historical path that begins at the height of the network age with Walter Cronkite and Edward R. Murrow, when the evening news was considered the authoritative record of the day 's events and forged our assumptions about what the news is, or should be. The book then winds its way through the breakdown of that paradigm of real news and into its reinvention in the unlikely form of such popularized shows as The Daily Show and The Colbert Report. From Cronkite to Colbert makes the case that rather than fake news, those shows should be understood as a new kind of journalism, one that has the potential to save the news and reinvigorate the conversation of democracy in today 's society.

News Flash Bonnie Anderson,2004-06-11 As someone who has worked both as a broadcast reporter and a network executive, Anderson has seen the good, the bad, and the ugly in the industry. Using investigative reporting and personal memoir, she now chronicles the decline of television journalism into infotainment.

After Broadcast News Bruce A. Williams,Michael X. Delli Carpini,2011-09-26 The new media environment has challenged the role of professional journalists as the primary source of politically relevant information. After Broadcast News puts this challenge into historical context, arguing that it is the latest of several critical moments, driven by economic, political, cultural and technological changes, in which the relationship among citizens,

political elites and the media has been contested. Out of these past moments, distinct 'media regimes' eventually emerged, each with its own seemingly natural rules and norms, and each the result of political struggle with clear winners and losers. The media regime in place for the latter half of the twentieth century has been dismantled, but a new regime has yet to emerge. Assuring this regime is a democratic one requires serious consideration of what was most beneficial and most problematic about past regimes and what is potentially most beneficial and most problematic about today's new information environment.

Encyclopedia of Television News Michael D. Murray, 1998-12-03 A recent Times-Mirror survey has shown that 65 percent of Americans prefer television over other news media for news coverage, an increase of 10 percent in just over a decade. To understand the enormous impact television news has had on American life, it is important to define the contributions made by various individuals in the field, as well as to recognize the news programs and broadcast journalism issues that have captivated, enlightened, and informed our nation. Never before have the forces and individuals of television news been so thoroughly and authoritatively examined.

Broadcasting Journalism Jacoby Barrera,2019-03-19 Advertising research is a systematic process of marketing research conducted to improve the efficiency of advertising. Advertising and media research explains the complexities of planning in a fast-moving non-complex style. As we enter the new century of transformed advertising techniques and marketing challenges. Research is to find out something new, and advertising research is to find out how

advertising works effectively and guide in making effective advertising decisions. There are various kinds of advertising research, and these include pre-testing, post-testing, campaign research, and measuring advertising effectiveness. Advertising follows logically after listening to consumer requirements, introducing productive conditions, distributing the goods. However, the actual sequence - and emphasis deriving from the diverse sub-cultures - can be quite differentiated. The effects of the different mass media on social, psychological and physical aspects. Research survey that segments the people based on what television programs they watch, radio they listen and magazines they read. Media research makes use of scientific methods of research. It aims at providing an objective, unbiased evaluation of data. First the research problem is identified, and then a prescribed set of procedures of research is followed to investigate the problem. Only thereafter comes report of the findings. This book is more catered to readers who have no background on the media. It is more informational than instructional. It's great if you are looking into learning about how the media works per se but not if you are concerned about effectively positioning your products in the market.

The Newsmen Dick McMichael, 2005-03-13 This is the story of a small town Southern boy who grows up to be a local television icon. Following Dick McMichaels life from the early years of radio to todays television, we experience the great changes in the industry and the country. We also learn

how he grew up in the segregated South and ended up working with a black female co-anchor who owes her first break in TV news to him. It is an inside look at the stresses and pressures that shape the broadcast newsrooms of America. It begins shortly after radio broadcasting began in the United States. You could say that broadcasting and I grew up together. Radio broadcasting was born in Columbus in 1928 in a dressing room of the brand-new Royal Theater when WRBL went on the air. I was born two years later. We move with young Dick through the tough years of the Great Depression when his family's small home was crowded with relatives who needed some place to stay until work could be found again, through World War Two when he saw his big brother, brother-in-law and first cousin head overseas with the U.S. Army, while he, as a Boy Scout, collected old newspapers for the war effort. All of this is paralleled by changes in the world of broadcasting. We follow his career from the time he was a seventeen-year-old radio announcer, to the height of his radio career at WSB in Atlanta, and to his television days in Columbus, Atlanta and Columbia, South Carolina. We see him get into hot water and almost fired as a result of his investigative reporting at one station. We get a firsthand look at what goes on inside the walls of broadcast newsrooms, and how economics affects the way news is covered and reported. We see both sides of the organized labor movement as he, on one hand, represents his fellow members in a union contract negotiation with one station, and, on the other hand, when he is on the other side of the fence as a vice president

of news when a union tries to organize the staff at another station. Dick McMichael has seen the way broadcast news has changed from its inception until right now. He has seen entertainment and commercial considerations triumph over serious journalism. He has also suffered personal tragedies, losing his dear wife to a chronic disease, but he has also has children and grandchildren to enjoy. His story is important because television news affects every one of us everyday. Not just network television news, but the hundreds of local television news operations that reach and affect just as many or even more people. He was honored by the Georgia Association of Broadcasters with the 2004 GAB Broadcaster of the Year Gabby Award.
