**Analyzing Health Equity Using Household Survey Data** Adam Wagstaff,Owen O'Donnell,Eddy van Doorslaer,Magnus Lindelow,2007-11-02 Have gaps in health outcomes between the poor and better off grown? Are they larger in one country than another? Are health sector subsidies more equally distributed in some countries than others? Are health care payments more progressive in one health care financing system than another? What are catastrophic payments and how can they be measured? How far do health care payments impoverish households? Answering questions such as these requires quantitative analysis. This in turn depends on a clear understanding of how to measure key variables in the analysis, such as health outcomes, health expenditures, need, and living standards. It also requires set quantitative methods for measuring inequality and inequity, progressivity, catastrophic expenditures, poverty impact, and so on. This book provides an overview of the key issues that arise in the measurement of health variables and living standards, outlines and explains essential tools and methods for distributional analysis, and, using worked examples, shows how these tools and methods can be applied in the health sector. The book seeks to provide the reader with both a solid grasp of the principles underpinning distributional analysis, while at the same time offering hands-on guidance on how to move from principles to practice.

*Mass Media and Modern Warfare* Greg Simons,2016-05-06 Mass media are essential to democratic society; in contrast, the War on Terror has been interpreted as an assault on democracy and freedom by Islamic fundamentalists. The building and maintenance of public support is essential in modern warfare due to the increasing politicization of warfare, where losses and gains are measured in political rather than military terms. And if progress cannot be demonstrated during a war, then by default one is assumed to be losing. Greg Simons tackles the complicated yet essential role of mass media in society. Taking the Global War on Terror as a prime example, the author adopts a multidisciplinary approach to analyze the various facets of war and the role of the media within it. Assessing in particular the Russian fight against terrorism, this book provides a broader perspective and understanding of contemporary struggles.

*Information, Accountability, and Cumulative Learning* Thad Dunning,Guy Grossman,Macartan Humphreys,Susan D. Hyde,Craig McIntosh,Gareth Nellis,2019-07-11 Throughout the world, voters lack access to information about politicians, government performance, and public services. Efforts to remedy these informational deficits are numerous. Yet do informational campaigns influence voter behavior and increase democratic accountability? Through the first project of the Metaketa Initiative, sponsored by the Evidence in Governance and Politics (EGAP) research network, this book aims to address this substantive question and at the same time introduce a new model for cumulative learning that increases coordination among otherwise independent researcher teams. It presents the overall results (using meta-analysis) from six independently conducted but coordinated field experimental studies, the results from each individual study, and the findings from a related evaluation of whether practitioners utilize this information as expected. It also discusses lessons learned from EGAP's efforts to coordinate field experiments, increase replication of theoretically important studies across contexts, and increase the external validity of field experimental research.

**Language Policy and Identity Construction** Eric A. Anchimbe,2013-01-07 The (dis)empowerment of languages through language policy in multilingual postcolonial communities often shapes speakers' identification with these languages, their attitude towards other languages in the community, and their choices in interpersonal and intergroup communication. Focusing on the dynamics of Cameroon's multilingualism, this book contributes to current debates on the impact of politic language policy on daily language use in sociocultural and interpersonal interactions, multiple identity construction, indigenous language teaching and empowerment, the use of Cameroon Pidgin English in certain formal institutional domains initially dominated by the official languages, and linguistic patterns of social interaction for politeness, respect, and in-group bonding. Due to the multiple perspectives adopted, the book will be of interest to sociolinguists, applied linguists, pragmaticians, Afrikanists, and scholars of postcolonial linguistics.

Encyclopedia of Survey Research Methods Paul J. Lavrakas,2008-09-12 In conjunction with top survey researchers around the world and with Nielsen Media Research serving as the corporate sponsor, the Encyclopedia of Survey Research Methods presents state-of-the-art information and methodological examples from the field of survey research. Although there are other how-to guides and references texts on survey research, none is as comprehensive as this Encyclopedia, and none presents the material in such a focused and approachable manner. With more than 600 entries, this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost-benefit standpoint.

**Reading in the mobile era** West, Mark,Chew Han Ei,2014-04-28 Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

The Illustrated Guide to the Mass Communication Research Project Patricia Swann,2022-12-21 This book makes mass communication research projects more accessible to the new student researcher through a balance between an academically rigorous guide and an informal and humorous student-centered approach. The Illustrated Guide to the Mass Communication Research Project's unique, visual approach brings to life concepts and tactics under discussion through vivid illustrations. The book follows the universal format of the academic research paper: abstract, introduction, literature review, methodology, hypotheses/research questions, quantitative and qualitative analysis/findings, discussion, and conclusion. It guides the reader through using key methods central to much of mass communication research: observation, interviews, focus groups, case studies, content analysis, surveys, experiments, and sampling. Each chapter contains examples of the segment under discussion, using excerpted research studies that provide writing models for the student's own research report. Ideal for students in research-centered courses in mass media, communication studies, marketing, and public relations, whether at the undergraduate or graduate level, this text will continue to serve as a valuable resource into a future communications and marketing career. Online resources are provided to support the book: examples of an in-depth interview guide, a focus group moderator guide, a content analysis coding form, observation field notes and an experiment cover story; templates for a personal SWOT analysis and an informed consent form; a research topic worksheet; a literature review matrix; and coding exercises. The Contemporary US Peace Movement Laura Toussaint,2008-11-04 As peace activists have faced increased government repression and accusations of being unpatriotic since 9/11, Toussaint examines how current attempts to control dissent impact the peace movement. This study offers an analysis of self-identified peace activists in terms of their demographic characteristics, motivation for activism, political opportunities, and views of the peace movement. It also discusses the processes involved in successfully mobilizing an increasingly diverse constituency and how broad-based support can be sustained beyond reacting to crises.

*Muslims and Islam in U.S. Education* Liz Jackson,2014-04-03 Winner of Philosophy of Education Society of Australasia (PESA)'s inaugural PESA Book Awards in 2015, and The University of Hong Kong Research Output

Prize for Education 2014-15. Muslims and Islam in U.S. Education explores the complex interface that exists between U.S. school curriculum, teaching practice about religion in public schools, societal and teacher attitudes toward Islam and Muslims, and multiculturalism as a framework for meeting the needs of minority group students. It presents multiculturalism as a concept that needs to be rethought and reformulated in the interest of creating a more democratic, inclusive, and informed society. Islam is an under-considered religion in American education, due in part to the fact that Muslims represent a very small minority of the population today (less than 1%). However, this group faces a crucial challenge of representation in United States society as a whole, as well as in its schools. Muslims in the United States are impacted by ignorance that news and opinion polls have demonstrated is widespread among the public in the last few decades. U.S. citizens who do not have a balanced, fair and accurate view of Islam can make a variety of decisions in the voting booth, in job hiring, and within their small-scale but important personal networks and spheres of influence, that make a very negative impact on Muslims in the United States. This book presents new information that has implications for curricula, religious education, and multicultural education today, examining the unique case of Islam in U.S. education over the last 20 years. Chapters include: Perspectives on Multicultural Education 9/11, the Media, and the New Need to Know Islam and Muslims in Public Schools Blazing a Path for Intercultural Education This book is an essential resource for professors, researchers, and teachers of social studies, particularly those involved with multicultural issues, critical and sociocultural analysis of education and schools; as well as interdisciplinary scholars and students in anthropology and education.

**Media, NASA, and America's Quest for the Moon** Harlen Makemson,2009 When Apollo 11 landed on the moon in July 1969, it capped not only the most remarkable engineering feat in history, but also a decade-long battle over how much access the press and public should have to the manned space program. Now, forty years after an awed world watched Neil Armstrong and Buzz Aldrin bounce across the surface of the moon, this book tells the behind-the-scenes story of how NASA and the U.S. media were often at odds, but ultimately showed extraordinary cooperation in bringing the story of lunar conquest to the world. Drawing upon rich historical sources from NASA, journalists, and television networks, this book sheds new light on how media shaped how we saw America's great adventure in space, and raises contemporary questions about the role of information in a free society.
