**Simpler** Cass R. Sunstein, 2013-04-09 Simpler government arrived four years ago. It helped put money in your pocket. It saved hours of your time. It improved your children's diet, lengthened your life span, and benefited businesses large and small. It did so by issuing fewer regulations, by insisting on smarter regulations, and by eliminating or improving old regulations. Cass R. Sunstein, as administrator of the most powerful White House office you've never heard of, oversaw it and explains how it works, why government will never be the same again (thank goodness), and what must happen in the future. Cutting-edge research in behavioral economics has influenced business and politics. Long at the forefront of that research, Sunstein, for three years President Obama's "regulatory czar" heading the White House Office of Information and Regulatory Affairs, oversaw a far-reaching restructuring of America's regulatory state. In this highly anticipated book, Sunstein pulls back the curtain to show what was done, why Americans are better off as a result, and what the future has in store. The evidence is all around you, and more is coming soon. Simplified mortgages and student loan applications. Scorecards for colleges and universities. Improved labeling of food and energy-efficient appliances and cars. Calories printed on chain restaurant menus. Healthier food in public schools. Backed by historic executive orders ensuring transparency and accountability, simpler government can be found in new initiatives that save money and time, improve health, and lengthen lives. Simpler: The Future of Government will transform what you think government can and should accomplish.

Amazing Grace Jimmy Swaggart, 2019-12-10 The relationship between God and man hinges on faith—the unseen evidence that eludes countless souls. That's why, throughout the ages, God has called men to proclaim His gospel message with an anointing, a boldness, and a fire that ignites the measure of faith in every human heart. At the age of eight, God called Jimmy Lee Swaggart for the purpose of world evangelism. In the tiny town of Ferriday, Louisiana, his Spirit-filled grandmother told him, "Jimmy, you will see a harvest of souls such as the world has never seen before." Indeed, he did see it, and so did we. But before God placed Jimmy Swaggart before the masses, He first raised him up to preach—on the streets of Louisiana, inside rural churches, into a radio mic, and, eventually, in front of a television camera. Today, the iconic evangelist preaches to the largest audience of his 62-year ministry—nearly 2 billion people—and his revelatory message is not only one of salvation, but also sanctification through Jesus Christ and Him crucified. In his own words, and in his own way, Evangelist Jimmy Swaggart now tells his personal story of God's amazing grace.

**The Porch** Charlie Hailey, 2021-04 There is something spooky and resonant about liminal places like docks, shorelines, decks, and perhaps most commonly porches. Here, Charlie Hailey meditates on porches in a way that is appropriately thoughtful, affecting, rich, and resonant. Porches, in his hands, become portals onto an endless array of large metaphysical questions: what is it to be in a place? How does one place teach us about the world and about ourselves, both as individuals and as a species? What are we-and the things we have built-in this world? In a time when questions of what makes society society and what sustains the individual are so paramount, Hailey's meditations are both a tonic and a series of welcome provocations--

*How and Why to Read and Create Children's Digital Books* Natalia Kucirkova,2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University
