Когда в 1924 году немецкие производители радиотехники собрались, чтобы продемонстрировать свои продукты спустя год после начала первых регулярных широкоэмиттерных трансляций, вряд ли они могли предположить, что из их скромного начинания вырастет один из наиболее известных форумов потребительской электроники в мире. Телевидение пришло на выставку в 1928-м, хотя в те времена на ней продолжало доминировать радио. На одной из ранних фотографий запечатлено, как Альберт Эйнштейн осматривает радиоприемники, представленные на выставке. Почти сорок лет спустя, в 1967 году, на выставке дебютировало цветное телевидение, и в дальнейшем на ней неизменно демонстрировались новинки, особенно из сферы потребительской электроники. Посетители IFA имели возможность познакомиться с телетекстом (1977 год), компакт-диск (1979-й), системой Radio Data System (1987-й), широкоэмиттерным телевизором (1989-й), мини-дисками и форматом MP3 (1991-й), DVD (1997-й) и цифровыми телевизорами (2003-й). Study on Mobile Device Security Department of Homeland Security, 2017-04-28 April 2017 Mobile devices on the market today are some of the most complex and capable computing devices ever created. Although many can now match the capabilities of desktops and are being marketed as desktop replacements, they have features and capabilities not available to any desktop. They also sit in the broader mobile ecosystem giving them significantly more exposure. This means they share many of the same security threats as traditional desktop and laptop computers and are also exposed to more threats brought about by their mobility, complexity, and additional sensors. The impact of many of these threats can be magnified by the unique attributes of mobile devices. Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology.
