Automatic Model Driven Analytical Information Systems

Yvette Teiken, 2012 Analytical Information Systems support decision making within organizations. They allow complex analysis based on integrated datasets. These integrated datasets, also known as data warehouses, are based on systems with different technologies and content. AIS are complex software systems. During their build-up, many technical aspects, such as connection and data transformation for the involved data sources, or the definition of analysis schemas, have to be considered. Therefore, an integrated creation of these systems is difficult. In this book, the autoMAIS approach, which improves the AIS creation process, is introduced. Within this approach, techniques of model-driven software development are used to create an integrated view on the AIS creation process. To do so, the AIS creation process is split up into different aspects. Each identified aspect is described with a domain-specific language and techniques of software language engineering. For language development, already existing textual or graphical languages are used or adapted. The developed languages are integrated into one single meta model which describes the complete resulting AIS. The transformations enable the generation of an AIS. The creation of the language instances and the generation of the AIS are guided by a process model.

Service Availability Maria Toeroe, Francis

Tam, 2012-03-12 Our society increasingly depends on computer-based systems; the number of applications deployed has increased dramatically in recent years and this trend is accelerating. Many of these applications are expected to provide their services continuously. The Service Availability Forum has recognized this need and developed

a set of specifications to help software designers and developers to focus on the value added function of applications, leaving the availability management functions for the middleware. A practical and informative reference for the Service Availability Forum specifications, this book gives a cohesive explanation of the founding principles, motivation behind the design of the specifications, and the solutions, usage scenarios and limitations that a final system may have. Avoiding complex mathematical explanations, the book takes a pragmatic approach by discussing issues that are as close as possible to the daily software design/development by practitioners, and yet at a level that still takes in the overall picture. As a result, practitioners will be able to use the specifications as intended. Takes a practical approach, giving guidance on the use of the specifications to explain the architecture, redundancy models and dependencies of the Service Availability (SA) Forum services Explains how service availability provides fault tolerance at the service level Clarifies how the SA Forum solution is supported by open source implementations of the middleware Includes fragments of code, simple example and use cases to give readers a practical understanding of the topic Provides a stepping stone for applications and system designers, developers and advanced students to help them understand and use the specifications

Empirical Foundations of Information and Software Science V Pranas Zunde,D. Hocking,2012-12-06 This is the proceedings of the Sixth Symposium on Empirical Foundations of Information and Software Sciences (EFISS), which was held in Atlanta, Georgia, on October 19-21, 1988. The purpose of the symposia is to explore subjects and methods of scientific inquiry which are of common interest to information and software sciences, and to identify

directions of research that would benefit from the mutual interaction of these two disciplines. The main theme of the sixth symposium was modeling in information and software engineering, with emphasis on methods and tools of modeling. The symposium covered topics such as models of individual and organizational users of information systems, methods of selecting appropriate types of models for a given type of users and a given type of tasks, deriving models from records of system usage, modeling system evolution, constructing user and task models for adaptive systems, and models of system architectures. This symposium was sponsored by the School of Information and Computer Science of the Georgia Institute of Technology and by the U.S. Army Institute for Research in Management Information, Communications, and Computer Sciences (AIRMICS). 17le Editors vii CONTENTS 1 I. Service Availability Dave Penkler,2006-12-14 This book constitutes the thoroughly refereed post-proceedings of the Third International Service Availability Symposium, ISAS 2006, held in Helsinki, Finland, in May 2006. The 19 revised full papers presented were carefully reviewed and selected from 38 submissions. The papers are organized in topical sections on availability modeling, estimation and analysis, dependability techniques and their applications, performability: measurements and assessments, service availability standards: experience reports and futures.

The Routledge Handbook of Accounting Information Systems Erik Strauss,Martin Quinn,2022-11-25 The Routledge Handbook of Accounting Information Systems is a prestige reference work offering a comprehensive overview of the state of current knowledge and emerging scholarship in the discipline of AIS. The pace of technological-driven change is rapid, and this revised

edition provides a deeper focus on the technical underpinnings and organisational consequences of accounting information systems. It has been updated to capture the changes in technology since the previous edition. It now includes chapters and scholarly thought on artificial intelligence, predictive analytics and data visualisation, among others. Contributions from an international cast of authors provide a balanced overview of established and developing themes, identifying issues and discussing relevant debates. The chapters are analytical and engaging. Many chapters include cases or examples, and some provide additional resources for readers. The chapters also provide a reflection on where the research agenda is likely to advance in the future. This is a complete and indispensable guide for students and researchers in accounting and accounting information systems, academics and students seeking convenient access to an unfamiliar area, as well as established researchers seeking a single repository on the current debates and literature in the field.

SeaClear Unleashed Richard Fairman, 2010-07-06

SeaClear has been the favorite of yachtsmen worldwide for the past 15 years. It features all the bells and whistles of major chartplotters and navigation systems at a very low cost, in fact at no cost, as it is free to download and use from www.sping.com. Its major shortcoming has been the limited documentation supplied. SeaClear Unleashed brings you in depth information on using SeaClear in real life navigation situations. The unique tutorial led style written by a yachtman for yachtsmen unleashes the full potential of SeaClear. As a bonus, purchasers of SeaClear Unleashed get access to Video Tutorials and access to Online Help at a low price.

Subsoil Monitoring at Nuclear Industry Enterprises Mark Glinsky, Vladimir Vetrov, Alexander Abramov, Leonid Chertkov, 2021-05-10 This book is the first comprehensive review of the subsurface monitoring theory and practice. It presents all aspects of a subsurface monitoring system SM-NI to be organized in impacted areas of nuclear industry enterprises. The content of the book covers the whole set of the SM-NI projecting and implementation issues – from the theoretical and regulatory framework, through the description of the sources of impact on geological environment to examples of use the SM-NI to solve environmental problems on the main types of environmentally significant nuclear industry enterprises. Development of the SM-NI was based on long-term research studies including modeling of pollutants transport in the geological environment. The book is intended for a wide range of nuclear industry employees and specialists in environment protection and radiation safety of nuclear industry enterprises. It might be useful for ecologists, students and postgraduates concerned about environment protection in the field of nuclear technology

Process Control Jie Bao,Peter L. Lee,2007-06-14

Passivity and associated stability conditions form one of the cornerstones in control theory and have begun to be applied in process control. In this book, passivity-based developments in all areas of control theory are addressed

systematically for the first time. The emphasis is placed on real results that add insight. Case studies illustrate applications in all the main chapters. MATLAB® routines and a library of functions that implement the methods developed in the book can be downloaded from springer.com.

The Gabble - And Other Stories Neal Asher,2008-11-07

An extraordinary collection from the architect of the Polity universe, Neal Asher's *The Gabble - And Other Short Stories* reveals a universe of unbridled imagination, and each one is a delight in itself. Much of Neal Asher's fiction is set in the galactic civilization he calls the Polity, an alliance of human-populated worlds. And in this collection of thirteen marvellously inventive and action-packed short stories, Asher is on top form. You can expect conflicted humans, fiendishly clever plot twists, extraordinary technologies and so much more. The discerning reader can also savour tales of alien poisons, the walking dead, the Sea of Death, and the putrefactor symbiont. No one does weird, wonderful and downright gruesome aliens better than Neal Asher, so prepare to visit his favourites. Sample the lifestyles of creatures such as the gabbleduck and the hooder, as Asher takes you on a wild ride into his vividly-imagined futures.
