Energy Efficiency Matters gives concerned citizens like you an overview of how your electricity bills are calculated as well as practical guidelines and clear directions for practising energy efficiency at home. The easily-implementable practices for mindful and responsible electricity consumption in daily life can significantly reduce your household's energy costs as well as the impact of harmful carbon emissions on your health and the local environment. Although written in the Indian context, the simple and relatable principles explained in this book can nonetheless find relevance and application in the lives of electricity and energy consumers across the world. Green, Reliable and Viable Ajay Mathur, 2018 Resource-intensive practices of yesterday can no longer sustain the world. The future of our planet hinges on timely transitions to efficiency of resource-use across ecosystems of people, products, and processes. This will happen through transitions to low-carbon global energy systems. Against this, it is vital to take a closer look at the ongoing transitions in India. India is a country faced with the triple challenges of raising a substantial amount of

its population out of poverty, shifting to a low-carbon economy, and fighting climate change. It is unquestionable that India's energy demand and consumption will only continue to rise in the decades to come; nonetheless, with multiple synchronized steps in the right direction, India can set the wheel in motion to achieve its development goals while containing its carbon footprint. This book brings together the valued perspectives from key stakeholders in these transitions. Experts and practitioners from the mobility, clean energy, agriculture and energy efficiency sectors, among others, have shared their outlook on challenges that lie in the way of energy transitions in India, and offered solutions and next steps to move the country forward on the decarbonisation pathway. The overarching message is clear: the Indian energy sector of the future will be noticeably different from what it is today. Please note: This book is co-published with TERI Press, India. Gunning for the Godman Ajay Lamba, Sanjeev Mathur, 2020-09-05 SOON TO BE A MAJOR MOTION PICTURE. Notorious godman Asaram Bapu, aka Asumal Sirumalani Harpalani, serves life imprisonment in the Central Jail Jodhpur. He was convicted for the rape of a minor and also has murder charges against him. *Gunning for the Godman* is the no-holds-barred, first-hand account of how Ajay Lamba, then DCP Jodhpur (West), landed the case and got a team of dedicated officers together. It is the story of how, foiling the Baba's many attempts to get away scot-free, they arrested him in a

matter of only ten days, and how they assiduously saw the victim and her family through a four-year long trial. This, despite the countless threats to not only the girl and her family, but also to DCP Lamba's own family and team. A testimony to unrelenting courage, this story of a dynamic police officer's pursuit of justice is a lesson for these troubled times.*** DISCLAIMER: As on the date of publication of this book, the appeal of Sanchita Gupta@Shilpi against the order of conviction passed by the Special Court (POCSO) Jodhpur, is pending before the Hon'ble Rajasthan High Court. Whither Indian Ocean Maritime Order? Contributions to a Seminar on Narendra Modi's SAGAR Speech Ambassador Yogendra Kumar, 2017-02-15 Prime Minister Modi articulated his vision for the future of the Indian Ocean region when he presented the Offshore Patrol Vessel Barracuda to the Mauritian Coast Guard on March 12, 2015, at Port Louis. Such authoritative statement on Indian Ocean by an Indian leader has not been made for a long time. It evoked considerable interest amongst strategic analysts everywhere. Whilst infusing a soft civilisational complexion to India's envisaged role, it signifies, also, a determination to seek a future of 'Security and Growth for All in the Region' – or SAGAR (Hindi for 'sea'). As Indian Ocean assumes greater significance in the wake of profound geo-strategic shifts and multitudinous challenges to regional stability, there is universal interest in India's policy approach and capabilities toward the shaping of a stable maritime order. The Indian political leadership is conscious of the evolving strategic situation and its implications for the

country's security and well-being; it, at the same time, feels that the current circumstances are propitious for such a policy to be successful in substantial measure. Its benign external image and US and other countries', especially regional, support for more proactive engagement provide the wellspring for its determination that the Indian Ocean's challenges should be met by the countries of the region itself even as the legitimate interests of outside powers can be accommodated. The eminent contributors to this volume analyse the various components of the SAGAR pronouncement and contextualise them against the emerging strategic trends and the spectrum of bilateral and multilateral effort required for its success.
