The AJCC Cancer Staging Manual is used by physicians and health care professionals throughout the world to facilitate the uniform description and reporting of neoplastic diseases. Proper classification and staging of cancer is essential for the physician to assign proper treatment, evaluate results of management and clinical trials, and to serve as the standard for local, regional and international reporting on cancer incidence and outcome. Significantly expanded and developed by international disease site expert panels, the Eighth Edition AJCC Cancer Staging Manual brings together all the currently available knowledge on staging of cancer at various anatomic sites. In this edition, evidence-based TNM staging is supplemented, as appropriate, by selected molecular markers and newly acquired insights into the molecular underpinnings of cancer. This edition features 12 entirely new staging systems, a wide range of changed or new staging definitions, and a refined emphasis on a personalized-medicine approach. To enhance the print and electronic usability of the cancer staging forms, they are now available exclusively for access and downloading at www.cancerstaging.org. The Eighth Edition AJCC Cancer Staging Manual remains the gold standard reference for oncologists, surgeons, pathologists, radiologists, cancer registrars and medical professionals world-wide to ensure that all those caring for cancer patients are fully versed in the language of cancer staging.

TNM Staging Atlas with Oncoanatomy Philip Rubin, John T.

Hansen, 2013-01-30 The Second Edition of TNM Staging Atlas with Oncoanatomy has been updated to include all new cancer staging information from the Seventh Edition of the AJCC Cancer Staging Manual. The atlas presents cancer staging in a highly visual rapid-reference format, with clear full-color diagrams and TNM stages by organ site. The illustrations are three-dimensional, three-planar cross-sectional presentations of primary anatomy and regional nodal anatomy. They show the anatomic features identifiable on physical and/or radiologic examination and the anatomic extent of cancer spread which is the basis for staging. A color code indicates the spectrum of cancer progression at primary sites (T) and lymph node regions (N). The text then rapidly reviews metastatic spread patterns and their incidence. For this edition, CT or MRI images have been added to all site-specific chapters to further detail cancer spread and help plan treatment. Staging charts have been

updated to reflect changes in AJCC guidelines, and survival curves from AJCC have been added.

AJCC Cancer Staging Atlas Frederick L. Greene, Carolyn C. Compton, 2007-05 In the model of the popular AJCC Staging manual and AJCC Staging handbook with the EZTNM module, this new product combines the AJCC Staging Atlas with a CD containing all the illustrations from the Atlas. Having the figures from the Atlas available as PowerPoint® slides means that users can document the why and how of their staging decisions. Users can also import figures into presentations for tumor boards, grand rounds, presentations, and journal articles/book chapters.

TNM Classification of Malignant Tumours Leslie H. Sobin, Mary K. Gospodarowicz, Christian Wittekind, 2011-08-31 TNM Classification of Malignant Tumours, 7th Edition provides the latest, internationally agreed-upon standards to describe and categorize cancer stages and progression. Published in affiliation with the International Union Against Cancer (UICC), this authoritative guide contains important updated organ-specific classifications that oncologists and other professionals who manage patients with cancer need to accurately classify tumours for staging, prognosis and treatment. The major alterations addressed in the 7th Edition concern carcinomas of the oesophagus and the gastroesophageal junction, stomach, lung, appendix, biliary tract, skin, and prostate. In addition, there are several entirely new classifications: gastrointestinal carcinoids (neuroendocrine tumours) gastrointestinal stromal tumour upper aerodigestive mucosal melanoma Merkel cell carcinoma uterine sarcomas intrahepatic cholangiocarcinoma adrenal cortical carcinoma. A new approach has also been adopted to separate anatomical stage groupings from prognostic groupings in which other prognostic factors are added to T, N, and M categories. These new prognostic groupings, as well as the traditional anatomical groupings, are presented for oesophageal and prostate carcinomas. Visit www.wileyanduicc.com for more information

informatics, evidence levels, principles of prognostication, survivorship and cancer in pregnancy. TNM-Atlas Bernd Spiessl, P. Hermanek, O. Scheibe, G. Wagner, 2013-04-17 Confronted with a myriad of T's, N's and M's in the UICC TNM booklet, classifying a malignancy may seem to many cancer clinicians a tedious, dull and pedantic task. But at a closer look at the TNM Atlas all of a sudden lifeless categories become vivid images, challenging the clinician's know-how and investigational skills. Brigit van der Werf-Messing, M.D. Professor of Radiology Past Chairman of the International TNM-Committee of the UICC Rotterdam, July 1982 Preface In 1938 the League of Nations Health Organization published an Atlas Illustrating the Division of Cancer of the Uterine Cervix into Four Stages (J. Heyman, ed., Stockholm). Since this work appeared, the idea of visual representation of the anatomical extent of malignant tumours at the different stages of their development has been repeatedly discussed. At its meeting in Copenhagen in July 1954, the UICC adopted as part of its programme the realization of a clinical atlas. However, the time to do the planned book of illustrations was not ripe until the national committees and international organizations had officially recognized the 28 classifications of malignant tumours at various sites as presented in the third edition of the TNM Booklet edited by M. Harmer (TNM Classification of Malignant Tumours, 1978). This was all the more important since publication of the Booklet was followed in 1980 by publication of a Brochure of Checklists, edited by A.H.

Ajcc Cancer Staging Atlas American Joint Committee on Cancer, 2006-02-09 The AJCC Cancer Staging Atlas can be used alone or in conjunction with the AJCC Manual or Handbook by pathologists, surgeons, registrars, and oncologists who wish to

visualize the TNM components for 39 disease sites. Over 400 illustrations provide detailed and thorough anatomic depictions that clarify critical structures and allow the reader to instantly visualize the progressive extent of malignant disease. Numerous labels identify important anatomic structures. The Summary of Changes bulleted points, Introduction text, and Anatomy text from each chapter in the AJCC Cancer Staging Manual, Sixth Edition, have all been included in the Atlas, providing a refresher for the experienced clinician and a reference for the trainee. 24 line drawings illustrate the new classification of breast cancer, including the complete pathologic nodal staging and the role of sentinel lymph nodes. These illustrations represent the clearest and most comprehensive rendering of the AJCC Sixth Edition breast cancer staging and will be of value to clinicians, registrars and trainees.
