The Meaning of the Glorious Koran Mohammed Marmaduke Pickthall,1997-05-01 The classic translation of the Koran by a convert to Islam In 1930, Mohammed Marmaduke Pickthall, a Western Islamic scholar and convert to Islam, published this English translation of the Koran, the central religious text of Islam, which the Times Literary Supplement lauded as “a great literary achievement.” The aim of this work is to present to American readers what Muslims the world over hold to be the meaning of the words of the Koran, and the nature of that Book, accurately and concisely, with a view to the requirements of English-speaking Muslims. The first English translation of the Koran by an Englishman who is a Muslim, the Book is here rendered almost literally, and every effort has been made to choose befitting language. Regarded by Muslims as God’s actual words revealed to the prophet Mohammed, the Koran remains the supreme authority of the Islamic tradition. Comprising laws, moral precepts, and narratives, its timeless texts are the inspiration and guide of millions of Muslims. With this remarkably readable and scholarly translation, Pickthall introduces the sacred scriptures of the Koran to Western readers—and provides invaluable and fascinating insight into one of the world’s great religions.

Journeys in Holy Lands Reuven Firestone,1990-01-01 Scholars have long pointed to the great affinity between stories found in the Bible and the Qur'an, yet no explanation has been proposed that satisfactorily explains the odd combination of incredible likeness and unique divergence. Firestone provides a refreshing, new approach to scriptural issues of textuality, exegesis, and the origins and use of legend. This book clearly presents the full range of Islamic legends from the Qur'an and early Islamic exegesis about Abraham's journeys and adventures in the Land of Canaan and Arabia, many of them available for the first time in English translation. The author examines this broad sample of Islamic legends in relation to those found in Jewish, Christian, and pre-Islamic Arabian communities, and postulates an evolutionary journey of the literature. He presents a thorough textual analysis of the material and proposes a model for understanding early Islamic narrative based in literary theory, approaches to comparative religion, and the history of the pre-Islamic and early Islamic Middle East.

Discovering the Qur’an Neal Robinson,2003 This latest edition of Discovering the Qur'an includes a new preface by the author. Used by students around the world as a reliable guide to reading a translation of the Qur'an, it shows how the Qur'an is experienced by Muslims, describing the rhythmic and rhyme scheme structures, the context in which it is heard, the part played by learning by heart, and the importance of calligraphy. It is also about the Qur'an and its relationship to Muhammed, as well as helping to divine the ordering of the surahs or chapters. In an English-speaking world newly sensitized to Islam and its believers, Discovering the Qur'an will be an invaluable tool to greater understanding.

Arabic Language Anwar G. Chejne, Chejne,Chejne,1969 Arabic, with its rich literary heritage, is one of the major languages of the world. it is spoken by about one hundred million people inhabiting a wide and important area of the Middle East. Yet the language and its significant role in history are little known in the English-speaking countries except among specialists. This book will, it is hoped, help to introduce the language and demonstrate its importance to a wider audience. --

Educational Psychology Jeanne Ellis Ormrod,2014 Educational Psychology: Developing Learners is known for its exceptionally clear and engaging writing, its in-depth focus on learning, and its extensive concrete applications. Its unique approach helps students understand concepts by examining their own learning and then showing them how to apply these concepts as teachers. More than any other educational psychology text, this text moves seamlessly between theory and applications, features the most extensive and integrated coverage of diversity, contexts of learning, neuropsychology and brain development, and classroom applications of technology. It includes innumerable concrete examples to help readers connect educational psychology to real children and classrooms. From reviews of the book: Rather than simply presenting the necessary content, the author makes you feel like she is talking directly to you...I love that diversity that has been woven throughout the fabric of this text...Ormrod's personalized writing style will reach undergraduate students in a way that few authors can. [The book] is concise, yet thorough; comprehensive, yet unpretentious.--Angela Bloomquist, California University of Pennsylvania 'Compared to other texts, Ormrod's text is written in a more accessible way...Strengths [include] accessibility, good use of supplementary materials, [and] updated research. --David Yun Dai, University at Albany, SUNY Love how each chapter discusses diversity and special needs! ...Most students keep this text throughout their teaching careers as a resource. Of all the educational psychology textbooks that I've used, this one is the most comprehensive and interactive with vivid examples...The supplemental materials are very useful. The power point is extensive and easy to use for lecture. I use the test bank materials and find the questions to be aligned with students' licensure exams. --Cindy Ballantyne, Northern Arizona University Note: MyEducationLab does not come automatically packaged with this text. Qur'an and Science in Depth Christian Prince,2015-07-22 Quran is the Word of Allah as revealed to His Last messenger Muhammad, is what Muslims work hard to prove to us, however Muslims use science now-days in order to convert as many as they can to Islam, but how truthful such a claim is? can Muslims backup their science or its nothing but a falsification, can the Qur'an be a book of science or Muslims make passages of the Quran by manipulating verses superficially to resemble the science, this book is going to take you step by step over what is called (The Qur'an & Modern

Science) with in depth examination to find out if its Compatible or Incompatible? And while we are doing so; we will go through a lot of stories in the Qur'an or the Muhammad words(hadith) and we will find an answer for each scientific claim.

Introducing Electronic Text Analysis Svenja Adolphs,2006-09-27 Introducing Electronic Text Analysis is a practical and much needed introduction to corpora – bodies of linguistic data. Written specifically for students studying this topic for the first time, the book begins with a discussion of the underlying principles of electronic text analysis. It then examines how these corpora enhance our understanding of literary and non-literary works. In the first section the author introduces the concepts of concordance and lexical frequency, concepts which are then applied to a range of areas of language study. Key areas examined are the use of on-line corpora to complement traditional stylistic analysis, and the ways in which methods such as concordance and frequency counts can reveal a particular ideology within a text. Presenting an accessible and thorough understanding of the underlying principles of electronic text analysis, the book contains abundant illustrative examples and a glossary with definitions of main concepts. It will also be supported by a companion website with links to on-line corpora so that students can apply their knowledge to further study. The accompanying website to this book can be found at <http://www.routledge.com/textbooks/0415320216>

Exploring Corpus Linguistics Winnie Cheng,2011-10-04 Routledge Introductions to Applied Linguistics consists of introductory level textbooks covering the core topics in Applied Linguistics, designed for those entering postgraduate studies and language professionals returning to academic study. The books take an innovative practice to theory approach, with a 'back to front' structure which takes the reader from real life problems and issues in the field, then enters into a discussion of intervention and how to engage with these concerns. The final section concludes by tying the practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms, and an annotated further reading section. Corpus linguistics is a key area of applied linguistics and one of the most rapidly developing. Winnie Cheng's practical approach guides readers in acquiring the relevant knowledge and theories to enable the analysis, explanation and interpretation of language using corpus methods. Throughout the book practical classroom examples, concordance based analyses and tasks such as designing and conducting mini-projects are used to connect and explain the conceptual and practical aspects of corpus linguistics. Exploring Corpus Linguistics is an essential textbook for post-graduate/graduate students new to the field and for advanced undergraduates studying English Language and Applied Linguistics.

Quranic Schools Helen N. Boyle,2004-12-01 Helen N. Boyle takes an anthropological approach to Quranic schooling in examining the role of Quranic preschools in community life.

Women, the Recited Qur'an, and Islamic Music in Indonesia Anne Rasmussen,2010-08-23 Rasmussen has written a classic study of the world of Islamic soundscapes, performances and forms of musical piety in that most complex of societies, Indonesia. With great sensitivity, an alert musical response to players, reciters and audiences, a keen practitioner's ear and eye for subtlety as well as for the complexities of 'noise', she changes common assumptions about Muslim music and, not least, gender in changing Islamic ritual cultures. Her own political awareness and her professional as well as personal relations with women Qu'ran reciters contribute to an exciting an original volume that I recommend to any one exploring the riches of Islamic performances and debates in the contemporary world.—Michael Gilson, author of *Lords of the Lebanese Marches: Violence and Narrative in an Arab Society*

Magic, Science and Religion and Other Essays Bronislaw Malinowski,2014-04-10 This book contains three prolific essays by the world renown polish anthropologist Bronislaw Malinowski. First published in 1926, Magic, Science and Religion provides its readers with a seminal collection of texts exploring the concepts of magic, religion, science, rite and myth, detailing how they interlink to offer exciting and informative insights into the Trobrianders of New Guinea. A must-have for any students of anthropology and collectors of Malinowski's work, we are republishing this classic work with a new introductory biography of the author.

The Art of Reciting the Qur'an Kristina Nelson,2014-11-11 For the Muslim faithful, the familiar sound of the Qur'anic recitation is the predominant and most immediate means of contact with the Word of God. Heard day and night, on the street, in taxis, in shops, in mosques, and in homes, the sound of recitation is far more than the pervasive background music of daily life in the Arab world. It is the core of religious devotion, the sanctioning spirit of much cultural and social life, and a valued art form in its own right. Participation in recitation, as reciter or listener, is itself an act of worship, for the sound is basic to a Muslim's sense of religion and invokes a set of meanings transcending the particular occasion. For the most part, Westerners have approached the Qur'an much as scriptural scholars have studied the Bible, as a collection of written texts. The Art of Reciting the Qur'an aims at redirecting that focus toward a deeper understanding of the Qur'an as a fundamentally oral phenomenon. By examining Muslim attitudes toward the Qur'an, the institutions that regulate its recitation, and performer-audience expectations and interaction, Kristina Nelson, a trained Arabist and musicologist, casts new light on the significance of Qur'anic recitation within the world of Islam. Her landmark work is of importance to all scholars and students of the modern Middle East, as well as ethnomusicologists, anthropologists, linguists, folklorists, and religious scholars.

Surat Al-Fatiha Hamid Algar,1997

Christian Huygens A. E. Bell,2012-12-03 A fascinating biography of one of the finest renaissance minds. Huygens was a polymath almost without equal, credited with discovering the rings of Saturn, the moon Titan, the invention of the pendulum clock and groundbreaking studies on optics and centrifugal forces, this study goes beyond these discoveries to find out more about the man and what made him strive to know more. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Approaches to the Qur'an in Contemporary Indonesia Abdullah Saeed,2005-11-10 Indonesia, the world's most populous Muslim country, has a vibrant intellectual community that is undertaking interesting and challenging work on Islam. This volume brings together a cross-section of Muslim intellectuals, from traditionalists to neo-modernists, and makes their varied approaches to the Qur'an accessible in English to a wider, global audience for the first time.--BOOK JACKET.

Beyond the Written Word William Albert Graham,1993-03-11 The concept of 'scripture' as written religious text is re-examined, considering orally distributed sacred writings.
