Pesticide Residues in Food 1999 Evaluations Food and Agriculture
Organization of the United Nations,2000 During the meeting the FAO Panel of
Experts was responsible for reviewing pesticide use patterns (good
agricultural practices), data on the chemistry and composition of pesticides
and methods of analysis for pesticide residues and for estimating the maximum
residue levels that might occur as a result of the use of pesticides
according to good agricultural practices. The WHO Core Assessment Group was
responsible for reviewing toxicological and related data and for estimating,
where possible, acceptable daily intakes (ADIs) of pesticides for humans.
This report contains information on ADIs, maximum residue limits (MRLs) and
general principles for the evaluation of pesticides. The supporting documents
(on residues and toxicological evaluations) contain detailed monographs on
these pesticides and include comments on analytical methods.

Power and Emotion in Ancient Judaism Ari Mermelstein, 2021-06-17 In this book, Ari Mermelstein examines the mutually-reinforcing relationship between power and emotion in ancient Judaism. Ancient Jewish writers in both Palestine and the diaspora contended that Jewish identity entails not simply allegiance to God and performance of the commandments but also the acquisition of specific emotional norms. These rules regarding feeling were both shaped by and responses to networks of power - God, the foreign empire, and other groups of Jews - which threatened Jews' sense of agency. According to these writers, emotional communities that felt Jewish would succeed in neutralizing the power wielded over them by others and, depending on the circumstances, restore their power to acculturate, maintain their Jewish identity, and achieve redemption. An important contribution to the history of emotions, this book argues that power relations are the basis for historical

changes in emotion discourse.
