Learning about Time ,

Earth Force Shemer Kuznits,2019-04-30 On the first day, a mist descended from the heavens blanketing Earth.On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began...There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Plato's Alarm Clock James M. Russell,2018-11-01 We all like to think we are pretty smart. New medical advances seem to come along every day; space travel suddenly doesn't seem so difficult; self-driving cars are no longer a thing of the future . but if we were stranded on a desert island tomorrow, most of us wouldn't know how

to catch a fish or start a fire, let alone rebuild all that extraordinary technology we now rely on. The truth is that we're not necessarily more clever than our ancestors, we just have an accumulation of centuries of technological progress on which we can rely. As this book shows, many of the ancients were much more advanced than we realize - indeed there are recent inventions that had actually been discovered centuries earlier and then forgotten. And what about all those modern day devices and machines that rely on ancient inventions such as paper, levers and gears? From brain surgery in the Stone Age to Chinese whisky from the 7th century BC, to Damascus steel - once the hardest metal in the world, which we no longer know how to make - this insightful book collects together the stories of hundreds of ancient devices, inventions and breakthroughs from around the world and across the centuries, giving us a fascinating glimpse into past eras that were far more technologically advanced than we sometimes realize.
