Understanding Media Marshall McLuhan, 2016-09-04
When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

I Love Jesus, But I Want to Die Sarah J. Robinson, 2021-05-11 A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

NATO's Air War for Kosovo Benjamin S.

Lambeth, 2001-11-16 This book offers a thorough appraisal of Operation Allied Force, NATO's 78-day air war to compel the president of Yugoslavia, Slobodan Milosevic, to end his campaign of ethnic cleansing in Kosovo. The author sheds light both on the operation's strengths and on its most salient weaknesses. He outlines the key highlights of the air war and examines the various factors that interacted to induce Milosevic to capitulate when he did. He then explores air power's most critical accomplishments in Operation Allied Force as well as the problems that hindered the operation both in its planning and in its execution. Finally, he assesses Operation Allied Force from a political and strategic perspective, calling attention to those issues that are likely to have the greatest bearing on future military policymaking. The book concludes that the air war, although by no means the only factor responsible for the allies' victory, certainly set the stage for Milosevic's surrender by making it clear that he had little to gain by holding out. It concludes that in the end, Operation Allied Force's most noteworthy distinction may lie in the fact that the allies prevailed despite the myriad impediments they faced.

The Poisonwood Bible Barbara

Kingsolver, 2009-10-13 New York Times Bestseller • Finalist for the Pulitzer Prize • An Oprah's Book Club Selection "Powerful . . . [Kingsolver] has with infinitely steady hands worked the prickly threads of religion, politics, race, sin and redemption into a thing of terrible beauty." -Los Angeles Times Book Review The Poisonwood Bible, now celebrating its 25th anniversary, established Barbara Kingsolver as one of the most thoughtful and daring of modern writers. Taking its place alongside the classic works of postcolonial literature, it is a suspenseful epic of one

family's tragic undoing and remarkable reconstruction over the course of three decades in Africa. The story is told by the wife and four daughters of Nathan Price, a fierce, evangelical Baptist who takes his family and mission to the Belgian Congo in 1959. They carry with them everything they believe they will need from home, but soon find that all of it—from garden seeds to Scripture—is calamitously transformed on African soil. The novel is set against one of the most dramatic political chronicles of the twentieth century: the Congo's fight for independence from Belgium, the murder of its first elected prime minister, the CIA coup to install his replacement, and the insidious progress of a world economic order that robs the fledgling African nation of its autonomy. Against this backdrop, Orleanna Price reconstructs the story of her evangelist husband's part in the Western assault on Africa, a tale indelibly darkened by her own losses and unanswerable questions about her own culpability. Also narrating the story, by turns, are her four daughters—the teenaged Rachel; adolescent twins Leah and Adah; and Ruth May, a prescient five-year-old. These sharply observant girls, who arrive in the Congo with racial preconceptions forged in 1950s Georgia, will be marked in surprisingly different ways by their father's intractable mission, and by Africa itself. Ultimately each must strike her own separate path to salvation. Their passionately intertwined stories become a compelling exploration of moral risk and personal responsibility.

The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies
Erik Brynjolfsson, Andrew McAfee, 2014-01-20 A pair of technology experts describe how humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use

to combine digital processing power with human ingenuity.

Mavericks at Work William C. Taylor, Polly G. LaBarre, 2009-03-17 The first book to document this change, *Mavericks at Work* is business edutainment for a smart, ambitious readership, profiling some of the most exciting—and often eccentric—CEOs in the United States, while detailing their remarkable strategies for success. Who's going to write the next chapter in the saga of American business? Who's going to chronicle the best way to compete, the new way to win? That's the mission of *Mavericks at Work*, a book that profiles a network of rebels who are creating a new business model that makes use of fresh principles and captures what it means to be a state-of-the-art organization. Including such pioneering companies as ING Direct, Southwest Airlines, Pixar, HBO, Anthropologie, Craigslist, Netflix, and Commerce Bank, this book is nothing short of a lively new intellectual agenda for business.

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman, 2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing

book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

The Center Cannot Hold Elyn R. Saks, 2007-08-14 A much-praised memoir of living and surviving mental illness as well as a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. *The Center Cannot Hold* is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Fast Food Nation Eric Schlosser, 2012 Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

Roll Models Richard Holicky, 2004 I thought life was pretty much over. Paul Herman I was afraid people wouldn't see me for who I still was. Cathy Green I didn't need this to be a better person. Susan Douglas I wasn't sure I wanted to live 'this way.' Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people

and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your salvation or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? A wonderful roadmap with many alternate routes to living and thriving with SCI. Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center Avoids the trap of providing a 'one size fits all mentality' and provides solutions as varied as the individuals used as examples. Accentuates the positives while

not sugar coating the difficulties. Essential reading. Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences. Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies. Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades. Good Economics for Hard Times Abhijit V.

Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that

will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

How Asia Works Joe Studwell, 2013-07-02 "A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." -Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to

compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

The Everything Store Brad Stone, 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as the definitive account of how a tech icon came to life. Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. *The Everything Store* is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Out Of Control Kevin Kelly, 2009-04-30 Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.
