Also covered in this section is ad music as used in different ad genres, such as political ads, public service announcements, and television commercials. The analyses used in this section draws from traditional music theory, semiotics, and hermeneutic analysis. Finally, the last section addressing Reception-with contributions by researchers in psychology, marketing, and other fields-involves the formulation of models and theories, and implementation of research methods to examine how the presence of music may influence peoples' attitudes, emotions, thoughts, and behaviors in the context of advertisements and within service environments such as stores, restaurants, and banks. The editors and chapter contributors of this book bring a diversity of perspectives to the topic but share a united aim: to illuminate music's vital contribution to the advertising message--
