Lightning Protection for People and Property

Marvin M. Frydenlund,2012-12-06 The word lightning conjures up many different thoughts, depending on who you are. For instance, an engineer might wonder, How can I protect this building? A computer manager might ask, What protection is available to save my equipment? A golf course manager wants to warn golfers about life-saving measures to take during a lightning storm. And on and on the needs go. In fact, the variety of backgrounds of people who need to understand lightning, its effects, and protection techniques ranges from the highly technical to the illiterate, creating a very difficult educational problem for the lightning protection industry. In this book, Marvin Frydenlund presents a refreshingly new melding of the many pieces of the lightningjigsaw puzzle that are scattered throughout numerous libraries, magazine and newspaper articles, codes, standards, statistics, research, and the enormous body of information called old wives' tales, myths, opinions, and snake oil sales literature. He has created a broad-spectrum review of the entire field

oflightning that is easy to read and understand, and it will benefit anyone who wants to study and comprehend the subject.

Psychology and Work Today, 10th Edition Duane P. Schultz,Sydney Ellen Schultz,2020-07-24 For undergraduate-level courses in Industrial and Organizational Psychology, Business Psychology, Personnel Psychology and Applied Psychology. Psychology and Work Today provides an invaluable foundation for anyone entering today's global business and industrial world. This informative, sophisticated, and entertaining text teaches students about the nature of work in modern society. By focusing on the practical and applied rather than the scientific ideal, the authors demonstrate how industrial-organizational psychology directly impacts our lives as job applicants, trainees, employees, managers, and

consumers.

Passenger Safety and Convenience Systems Ronald

K Jurgen, 2000-11-01 Passenger Safety and

Convenience Systems is made up of 61 technical papers and articles written in the last decade covering a variety of electronic systems for driver and passenger safety and convenience. Many papers in this book could arguably be considered in both categories because they provide the driver/passenger with multiple functions of safety and convenience. Some examples include keyless entry, security systems, night vision, and more. This book concludes with a chapter on Future Development in Electronically Controlled Body and Safety Systems.
