**Media Messages and Public Health** Amy Jordan,Dale Kunkel,Jennifer Manganello,Martin Fishbein,2010-11 Media Messages and Public Health addresses the full range of methodological and conceptual issues involved in content analysis research, specifically focused on public health-related messages and behaviors. Uniquely tailored to the challenges faced by content researchers interested in the study of public health topics, coverage includes: Conceptual and methodological foundations involved in the practice of content analysis research used to examine public health issues. Measurement challenges posed by the broad range of media. Use of content analysis across multiple media types. The potential for individual differences in audience interpretation of message content. Case studies that examine public health issues in the media to illustration the decisions that are made when developing content analysis studies. The volume concludes with a set of guidelines for optimal content analysis research, and suggests ways in which the field can accommodate new technologies and new ways of using media. Developed for researchers in communication, media, and public health, this unique resource demonstrates how the variety of decisions researchers make along the way allows the exploration of traditions, assumptions and implications for each varying alternative and ultimately advances the science of content analysis research.

**Digital Scholarship in the Tenure, Promotion and Review Process** Deborah Lines Andersen,2015-04-15 To receive tenure college and university professors have long been required to write scholarly monographs or articles, engage in serious research, and teach effectively. In recent years, however, the emergence of digital scholarship has revolutionized - and complicated - the picture in unexpected ways as new electronic media have enabled academics to communicate scholarly material in innovative formats such as websites, PowerPoint presentations, CD-ROMs, and virtual reality tours. Despite this growing output of sophisticated digital scholarship, there has been little attempt to set standards, define basic issues and concepts, or integrate electronic scholarship into the tenure debate. This collection of cutting-edge articles marks the first effort to evaluate the place of digital scholarship in the tenure, promotion, and review process. As a primer aimed at scholars, faculty members, and department chairs in the humanities, social sciences, and other fields, as well as deans, provosts, and university administrators, this collection examines the evolution of nontraditional scholarship, analyzes the various formats, and suggests guidelines for assessment on a scholarly level. It also examines the impact of digital scholarship in the classroom and academy and explores new directions for the future. This book will help shape policy in the murky world of tenure review and could become a central text for scholars and administrators everywhere.

**Digital Forensics and Cyber Crime** Sanjay Goel,2010-01-13 The First International Conference on Digital Forensics and Cyber Crime (ICDF2C) was held in Albany from September 30 to October 2, 2009. The field of digital forensics is growing rapidly with implications for several fields including law enforcement, network security, disaster recovery and accounting. This is a multidisciplinary area that requires expertise in several areas including, law, computer science, finance, networking, data mining, and criminal justice. This conference brought together practitioners and researchers from diverse fields providing opportunities for business and intellectual engagement among attendees. All the conference sessions were very well attended with vigorous discussions and strong audience interest. The conference featured an excellent program comprising high-quality paper presentations and invited speakers from all around the world. The first day featured a plenary session including George Philip, President of University at Albany, Harry Corbit, Superintendent of New York State Police, and William Pelgrin, Director of New York State Office of Cyber Security and Critical Infrastructure Coordination. An outstanding keynote was provided by Miklos Vasarhelyi on continuous auditing. This was followed by two parallel sessions on accounting fraud /financial crime, and multimedia and handheld forensics. The second day of the conference featured a mesmerizing keynote talk by Nitesh Dhanjani from Ernst and Young that focused on psychological profiling based on open source intelligence from social network analysis. The third day of the conference featured both basic and advanced tutorials on open source forensics.

*The History of Here* Akum Norder,2017-12-21 How the Pine Hills neighborhood in Albany, New York, changed and grew, as reflected in the history of one house and the lives of its residents. When you buy an old house, you get much more than a house. In all its quirks, its alterations, in fragments of memory and traces left behind, you get a bundle of small mysteries. Who used to live here? Why did they come here, and where did they go? Whose name is that written on the attic wall? When did that odd little bathroom get shoehorned in there, and what did the room look like before? If you're lucky, one or two of your house's mysteries might unfold into stories. Akum Norder was very lucky. The History of Here follows Albany, New York's, Pine Hills neighborhood through more than one hundred years of change. At its heart is the story of Norder's 1912 house and the people who built and lived in it. As Norder traced their histories, she came to see the development of her house, her street, and her neighborhood as a piece of Albany's story. In the lives of its residents, their struggles and triumphs, she saw a reflection of twentieth-century America. Drawing on interviews, city records, newspapers, out-of-print books, and other sources, Norder's narrative makes a case for city neighborhoods: their value, their preservation, and the grassroots involvement that turns a jumble of houses into a community. Funny and thought-provoking, readable and relevant, The History of Here celebrates the sense of place that fuels the new urbanism. Akum Norder has contributed to the literature of American life a paean of neighborliness of which Garrison Keillor would be pleased to read, and perhaps E. B. White and even James Agee would take pleasure

in this could they look in from the great beyond. Rooted in the keenly seen particular, this history has implications about the organic growth of American cities in general, and what we mean when we talk about “the good old days.” “ Gregory Maguire “Akum Norder writes with an authentic voice and a deep sense of place. Her story about her family’s house in Albany’s Pine Hills neighborhood captures the American urban experience. Her prose is clear-eyed yet passionate, with a measure of Jane Jacobs’s advocacy. The History of Here is an important addition to the Albany canon.” “ Paul Grondahl, author of Mayor Corning: Albany Icon, Albany Enigma

*Handbook of Digital Forensics of Multimedia Data and Devices, Enhanced E-Book* Anthony T. S. Ho,Shujun Li,2016-05-20 Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever-more apparent. Digital forensics involves investigating computer systems and digital artefacts in general, while multimedia forensics is a sub-topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices, such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics, bringing two closely related fields of forensic expertise together to identify and understand the current state-of-the-art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification, and image forgery detection among many others. Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement, and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices Offers not only explanations of techniques but also real-world and simulated case studies to illustrate how digital and multimedia forensics techniques work Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies
