The National Dream Pierre Berton,2011-06-22 In 1871, a tiny nation, just four years old—it's population well below the 4 million mark—determined that it would build the world's longest railroad across empty country, much of it unexplored. This decision—bold to the point of recklessness—was to change the lives of every man, woman and child in Canada and alter the shape of the nation. Using primary sources—diaries, letters, unpublished manuscripts, public documents and newspapers—Pierre Berton has reconstructed the incredible decade of the 1870s, when Canadians of every stripe—contractors, politicians, financiers, surveyors, workingmen, journalists and entrepreneurs—fought for the railway, or against it. The National Dream is above all else the story of people. It is the story of George McMullen, the brash young promoter who tried to blackmail the Prime Minister; of Marcus Smith, the crusty surveyor, so suspicious of authority he thought the Governor General was speculating in railway lands; of Sanford Fleming, the great engineer who invented Standard Time but who couldn't make up his mind about the best route for the railway. All these figures, and dozens more, including the political leaders of the era, come to life with all their human ambitions and failings.

How British Rule Changed India's Economy Tirthankar Roy,2019-05-18 This Palgrave Pivot revisits the topic of how British colonialism moulded work and life in India and what kind of legacy it left behind. Did British rule lead to India's impoverishment, economic disruption and famine? Under British rule, evidence suggests there were beneficial improvements, with an eventual rise in life expectancy and an increase in wealth for some sectors of the population and economy, notably for much business and industry. Yet many poor people suffered badly, with agricultural stagnation and an underfunded government who were too small to effect general improvements. In this book Roy explains the paradoxical combination of wealth and poverty, looking at both sides of nineteenth century capitalism. Between 1850 and 1930, India was engaged in a globalization process not unlike the one it has seen since the 1990s. The difference between these two times is that much of the region was under British colonial rule during the first episode, while it was an independent nation state during the second. Roy's narrative has a contemporary relevance for emerging economies, where again globalization has unleashed extraordinary levels of capitalistic energy while leaving many livelihoods poor, stagnant, and discontented.

So Long a Letter Mariama Bâ,2012-05-06 Written by award-winning African novelist Mariama Bâ and translated from the original French, *So Long a Letter* has been recognized as one of Africa's 100 Best Books of the 20th Century. The brief narrative, written as an extended letter, is a sequence of reminiscences —some wistful, some bitter—recounted by recently widowed Senegalese schoolteacher Ramatoulaye Fall. Addressed to a lifelong friend, Aissatou, it is a record of Ramatoulaye's emotional struggle for survival after her husband betrayed their marriage by taking a second wife. This semi-autobiographical account is a perceptive testimony to the plight of educated and articulate Muslim women. Angered by the traditions that allow polygyny, they inhabit a social milieu dominated by attitudes and values that deny them status equal to men. Ramatoulaye hopes for a world where the best of old customs and new freedom can be combined. Considered a classic of contemporary African women's literature, *So Long a Letter* is a must-read for anyone interested in African literature and the passage from colonialism to modernism in a Muslim country. Winner of the prestigious Noma Award for Publishing in Africa.

In the Valleys of the Noble Beyond John Zada,2019-08-15 This evocative work of nature writing traverses the world's largest temperate rainforest to uncover the legend of the Sasquatch. Canada's Great Bear Rainforest is home to trees as tall as skyscrapers and moss as thick as carpet. According to the people who live there, another giant may dwell in these woods. For centuries, locals have reported encounters with the Sasquatch—a species of hairy man-ape that could inhabit this pristine wilderness. Driven by his childhood obsession with the Sasquatch, yet trying to remain objective, journalist John Zada seeks out the people and stories surrounding this enigmatic creature. He speaks with local Indigenous peoples and a Sasquatch-studying scientist. He hikes with a former bear hunter. Soon, he finds himself on quest for something infinitely more complex, cutting across questions of human perception, scientific inquiry, Indigenous traditions, the environment, and the power of the human imagination to believe in—or to outright dismiss—one of nature's last great mysteries.
