**The Dangers of Gifts from Antiquity to the Digital Age** Alexandra Urakova, Tracey A.

Sowerby, Tudor Sala, 2022-09-09 This is the first volume that examines dangerous gift-giving across centuries and disciplines. Bringing to the fore the subject that features as an aside in gift studies, it offers new insights into the ambivalent and troubled history of gift-giving. Dangerous, violent, and self-destructive gift-giving remains an alluring challenge for scholars almost a hundred years after Marcel Mauss's landmark work on the gift. Globally, the notion of toxic and fateful gifts has haunted mythologies, folklores, and literatures for millennia. This book problematizes what stands behind the notion of the 'dangerous gift' and demonstrates how this operational term may help us to better understand the role and place of gift-giving from antiquity to the present through a series of case studies ranging from ancient Zoroastrianism to modern digital dating. The book develops a complex historical, cross-cultural, and multi-disciplinary approach to gift-giving that invites comparisons between various facets of this phenomenon through time and across societies. The book will interest a wide range of scholars working in anthropology, history, literary criticism, religious studies, and contemporary digital culture. It will primarily appeal to university educators and researchers of political culture, pre-modern religion, social relations, and the relationship between commerce and gifts.

"Huzza!" Timothy Symington, 2023-09-29 Raising a

glass to toast someone at a wedding or birthday is a familiar and usually informal occurrence, but at one time it was a carefully orchestrated ritual. They were planned, revised, given at an event, and then printed in newspapers. Americans learned who was or was not toasted for early national celebrations: King George III, George Washington, the Fourth of July, Washington's birthday, Jefferson's election, or military victories. During the tumultuous years of partisan fighting, toasts were used to spread or attack certain ideologies. The toasts became glimpses into what Americans honored at specific moments in the years from the beginning of the American Revolution to the end of the War of 1812. This book is a history of the early American republic viewed through its many toasts, which were raised and published throughout the new nation. As one of the earliest forms of social media, they offer a unique lens to view American history and early popular opinion.

*Revolution in the Age of Social Media* Linda Herrera, 2014-07-22 Egypt's January 25 revolution was triggered by a Facebook page and played out both in virtual spaces and the streets. Social media serves as a space of liberation, but it also functions as an arena where competing forces vie over the minds of the young as they battle over ideas as important as the nature of freedom and the place of the rising generation in the political order. This book provides piercing insights into the ongoing struggles between people and power in the digital age.

**Wired Citizenship** Linda Herrera,2014-03-05 Wired Citizenship examines the evolving patterns of youth learning and activism in the Middle East and North Africa (MENA). In today's digital age, in which formal schooling often competes with the peer-driven outlets provided by social media, youth all over the globe have forged new models of civic engagement, rewriting the script of what it means to live in a democratic society. As a result, state-society relationships have shifted—never more clearly than in the MENA region, where recent uprisings were spurred by the mobilization of tech-savvy and politicized youth. Combining original research with a thorough exploration of theories of democracy, communications, and critical pedagogy, this edited collection describes how youth are performing citizenship, innovating systems of learning, and re-imagining the practices of activism in the information age. Recent case studies illustrate the context-specific effects of these revolutionary new forms of learning and social engagement in the MENA region.

International Tourism Development and the Gulf

Cooperation Council States Marcus L.

Stephenson, Ala Al-Hamarneh, 2017-07-14 This book examines the challenges facing the development of tourism in the six member states of the Gulf Cooperation Council (GCC): Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates (UAE). This region, which largely comprises the Arabian Peninsula, possesses some of the fastest growing economies in the world and is remarkably unique. It shares similar associations and affinities: tribal histories, royal kinship, political associations, Bedu cultural roots, Islamic heritage, rapid urbanization, oil wealth, rentier dynamics, state capitalist structures, migrant labour, economic diversification policies and institutional restructuring. Therefore, this volume takes the study of tourism away from its normative unit of analysis, where tourism in the region is being examined within the context of the Middle East and the wider Islamic and Arab world, towards an enquiry focusing on a specific geo-political territory and socially defined region. Although international tourism development in the region embodies a range of challenges, complexities and conflicts, which are deeply contextualized in this volume, the approach overall does not endorse the normative 'Gulf bashing' position that has predominated within the critical enquiries in the region. It presents a forward-looking and realistic assessment of international tourism development, examining development potentialities and constructive ways forward for GCC states and the region as a whole. This edited volume provides a real attempt to

examine critically ways in which tourism and its development intersect with the socio-cultural, economic, political, environmental and industrial change that is taking place in the region. By doing so, the book provides a theoretically engaged analysis of the social transformations and discourses that shape our contemporary understanding of tourism development within the GCC region. Moreover, it deciphers tourism development's role within the context of the GCC states undergoing rapid transformation, urbanization, ultra-modernization, internationalization and globalization. In addition to state-specific illustrations and destination case studies, the work provides insights into relatable themes associated with international tourism development in the region, such as tourism's relationship with religion, heritage and identity, the environment and sustainability, mobility and cross-border movements, the transport industry, image production and destination branding, mega-development and political stability and instability. The book combines theory with diverse case study illustrations, drawing on disciplinary knowledge from such fields as sociology, political economy and social geography. This timely and original contribution is essential reading for students, researchers and academics in the field of tourism studies and related subject areas, along with those who have regional interests in Middle East studies, including Gulf and Arabian Peninsula studies.

**Civil War Washington** Susan C. Lawrence, 2015-04

While it is impossible to re-create the tumultuous Washington DC of the Civil War, *Civil War Washington* sets out to examine the nation's capital during the Civil War along with the digital platform ([civilwardc.org](http://civilwardc.org)) that reimagines it during those turbulent years. Among the many topics covered in the volume is the federal government's experiment in compensated emancipation, which went into effect when all of the capital's slaves were freed in April 1862. Another essay explores the city's place as a major center of military hospitals, patients, and medical administration. Other contributors reflect on literature and the war, particularly on the poetry published in hospital newspapers and Walt Whitman's formative experiences with the city and its wounded. The digital project associated with this book offers a virtual examination of the nation's capital from multiple perspectives. Through a collection of datasets, visual works, texts, and maps, the digital project offers a case study of the social, political, cultural, and scientific transitions provoked or accelerated by the Civil War. The book also provides insights into the complex and ever-shifting nature of ongoing digital projects while encouraging others to develop their own interpretations and participate in the larger endeavor of digital history.

**Americans in Egypt, 1770-1915** Cassandra Vivian, 2012-08-16 The voices of Americans have long been absent from studies of modern Egypt. Most scholars assume that Americans were either not in Egypt in significant numbers during the nineteenth century or had little of importance to say. This volume shows that neither was the case by introducing and relating the experiences and attitudes of 15 American personalities who worked, lived, or traveled in Egypt from the 1770s to the commencement of World War I. Often in their own words, explorers, consuls, tourists, soldiers, missionaries, artists, scientists, and scholars offer a rare American perspective on everyday Egyptian life and provide a new perspective on many historically significant events. The stories of these individuals and their sojourns not only recount the culture and history of Egypt but also convey the domination of the country by European powers and the support for Egypt by a young American nation.
