History of Ancient Greek Scholarship ,2020-06-15 This is the first book, after J. E. Sandys, to cover the multifarious field of “ancient scholarship” from the beginnings to the fall of Byzantium. It is worth underlining the benefits of a work with multiple expert voices in a field so complex. The book is based on the four historiographical chapters of Brill's Companion to Ancient Greek Scholarship (2015), which have been updated and rethought.

Brill's Companion to Ancient Greek Scholarship (2 Vols.) Franco Montanari,Stefanos Matthaios,Antonios Rengakos,2015-05-12 Brill's Companion to Ancient Greek Scholarship aims at providing a reference work in the field of ancient Greek and Byzantine scholarship and grammar, thus encompassing the broad and multifaceted philological and linguistic research activity during the entire Greek Antiquity and the Middle Ages.

Liquid Metal Magnetohydrodynamics J.J. Lielpeteris,R.J. Moreau,2012-12-06 Liquid metal MHD is within the scope of two series of international conferences. One is the International Congress on MHD Power Generation, held every four years, which includes technical and economical aspects as well as scientific questions. The other is the Beer-Sheva Seminar on MHD Flows and Turbulence, held every three years in Israel. In addition to these well established meetings, an IUTAM Symposium was previously organized in Cambridge (UK) in 1982 on Metallurgical Applications of MHD by the late Arthur Shercliff. It was focussed on a very specific subject developing rapidly from the middle of the 1970's. The magnetic field was generally AC, including frequencies high enough for the skin-depth to be much smaller than the typical length scale of the liquid pool. And the development of new technologies, or the improvement of existing ones, was the main justification of most of the researches presented and discussed. Only two participants from Eastern countries attended this Symposium. By the middle of the 1980's we felt that on this very same topic ideas had reached much more maturity than in 1982. We also realized that a line of research on MHD flows related to fusion reactors (tokamaks) was developing significantly, with particular emphasis on flows at large interaction parameter.

A Dictionary of Christ and the Gospels: Aaron-Knowledge James Hastings,1906

Lexicon Totius Latinitatis Immanuel Johann Gerhard Scheller,1835

A Dictionary of Christ and the Gospels James Hastings,2004-10 The purpose of this dictionary is to give an account of everything that relates to Christ - His Person, Life, Work, and Teaching. It is in a sense complementary to the Dictionary of the Bible, in which, of course, Christ has a great place. But a dictionary of the Bible, being occupied mainly with things biographical, historical, geographical, or antiquarian, does not give attention to the things of Christ sufficient for the needs of the preacher, to whom Christ is everything. This is, first of all, a preacher's dictionary. The authors of the articles have been carefully chosen from among those scholars who are, or have been, themselves preachers. And even when the articles have the same titles as articles in the Dictionary of the Bible, they are written by new men, and from a new standpoint. It is thus a work which is quite distinct from, and altogether independent of,

the Dictionary of the Bible. It is called a Dictionary of Christ and the Gospels, because it includes everything that the Gospels contain, whether directly related to Christ or not. Its range, however, is far greater than that of the Gospels. It seeks to cover all that relates to Christ throughout the Bible and in the life and literature of the world. There will be articles on the Patristic estimate of Jesus, the Medieval estimate, the Reformation and Modern estimates. There will be articles on Christ in the Jewish writings and in the Muslim literature. Much attention has been given to modern thought, whether Christian or anti-Christian. Every aspect of modern life, in so far as it touches or is touched by Christ, is described under its proper title. James Hastings (1852-1922) was a distinguished scholar and pastor. He was founder and editor of the Expository Times and is also well known for editing the five-volume Dictionary of the Bible, as well as the Encyclopaedia of Religion and Ethics, the Dictionary of Christ and the Gospels, and the Dictionary of the Apostolic Church.

The Challenge of CMC Regulatory Compliance for Biopharmaceuticals John Geigert,2019-05-08 Biopharmaceuticals (i.e., biological medicines sourced from genetically-engineered living systems) for treatment of human diseases have become a significant percentage of the pharmaceutical industry. And not just the recombinant DNA-derived proteins and monoclonal antibodies (both from the innovators and biosimilars); but now, an increasing awareness of the importance of gene therapy and genetically engineered cellular medicinal products. These biopharmaceuticals are being developed by many companies whose Chemistry, Manufacturing & Control (CMC) teams have varying degrees of familiarity or experience with the CMC strategy and regulatory compliance requirements for these challenging products. Companies clearly plan out the strategy for their clinical study plans, but frequently, the development of a strategy for CMC is an afterthought. Coupled with the complexity of the biopharmaceutical manufacturing processes and products, and this can be a recipe for disaster. The third edition of this book provides insights and practical guidance for the CMC teams to develop an acceptable cost-effective, risk-based CMC regulatory compliance strategy for all biopharmaceuticals (recombinant proteins, monoclonal antibodies, genetically engineered viruses and genetically engineered human cells) from early clinical stage development through market approval. The third edition of this book provides added coverage for the biosimilars, antibody drug conjugates (ADCs), bispecific antibodies, genetically engineered viruses, and genetically engineered cells. This third edition of the book also addresses the heightened pressure on CMC regulatory compliance timelines due to the introduction of expedited clinical pathways moving the clinical development closer to a seamless phase process (e.g., FDA Breakthrough Therapy designation, CBER Regenerative Medicine Advanced Therapy (RMAT) designation, EMA Priority Medicines (PRIME) designation). The Challenge of CMC Regulatory Compliance for Biopharmaceuticals is essential, practical information for all pharmaceutical development scientists, Manufacturing and Quality Unit staff, Regulatory Affairs personnel, and senior management involved in the manufacture of biopharmaceuticals.

Bonney's Gynaecological Surgery Tito Lopes,Nick M. Spirtos,Paul Hilton,John M. Monaghan,2018-09-04 Surgery is a core element of the clinical practice of gynaecology. Bonney's Gynaecological Surgery has been a firm favourite for gynaecological surgical practice

since 1911. Specifically tailored for trainees in obstetrics and gynaecology, the text focuses on the most commonly performed procedures. The 12th edition will include a colour photo section. With greater emphasis on fundamental clinical skills and major updates on laparoscopic and robotic surgery, this classic text will be brought right up to date for the current trainee or junior consultant physician. Each chapter follows a consistent plan, guiding the reader through each procedure from anatomy and indications to post-op considerations and complications. The text is also accompanied by surgical illustrations of unparalleled quality, ensuring that this volume will remain a valuable resource for all clinicians specializing in gynaecological surgery.
