Multilatinas Veneta Andonova, Mauricio Losada-Otálora, 2017-11-27 The challenges faced by Latin American multinational companies, or multilatinas, often require unique strategies tailored to a demanding global environment. This book studies the strategies of internationalism exercised by large multilatinas, offering the first systematic, quantitative effort to examine the pattern of their international investments within the context of their competitive position in the domestic market. Multilatinas uncovers common strategies among sixty-two multilatinas from six countries, and emphasizes the unique challenges they face, as well as the diversity of their organizational resources. It also brings the institutional environment of Latin American countries to the fore, assessing its role as an essential component in understanding internationalization decisions. Finally, the book studies the role of non-market organizational resources such as bribes, negotiations and favours in business strategies. Multilatinas is an invaluable read for students, scholars, practitioners and executives studying Latin America's place in international business.

Crude Nation Raul Gallegos,2016-10 Beneath Venezuelan soil lies an ocean of crude--the world's largest reserves--an oil patch that shaped the nature of the global energy business. Unfortunately, a dysfunctional anti-American, leftist government controls this vast resource and has used its wealth to foster voter support, ultimately wreaking economic havoc. Crude Nation reveals the ways in which this mismanagement has led to Venezuela's economic ruin and turned the country into a cautionary tale for the world. Raúl Gallegos, a former Caracas-based oil correspondent, paints a picture both vivid and analytical of the country's economic decline, the government's foolhardy economic policies, and the wrecked lives of Venezuelans. Without transparency, the Venezuelan government uses oil money to subsidize life for its citizens in myriad unsustainable ways, while regulating nearly every aspect of day-to-day existence in Venezuela. This has created a paradox in which citizens can fill up the tanks of their SUVs for less than one American dollar while simultaneously enduring nationwide shortages of staples such as milk, sugar, and toilet paper. Gallegos's insightful analysis shows how mismanagement has ruined Venezuela again and again over the past century and lays out how Venezuelans can begin to fix their country, a nation that can play an important role in the global energy industry.

HCV: The Journey from Discovery to a Cure Michael J. Sofia,2019-11-23 Hepatitis C is a liver disease caused by the hepatitis C virus (HCV) and infects approximately 75 million individuals worldwide. It is also one of the major causes of liver cancer and liver transplants. The elucidation of the HCV genome, and the development of a

whole cell system to study the virus spurred the search for novel direct acting antiviral drugs to cure this disease. This global effort culminated in the development of direct acting antiviral drugs that led to cure rates approaching 100% in all patient populations after only 8-12 weeks of therapy. These efforts resulted in one of the greatest achievements in public health and provides the potential for eliminating HCV as a major disease worldwide. This volume is aimed at a broad audience of academic and industrial scientists interested in the discovery and development of drugs to treat viral diseases and those interested in reading about one of the most unique accomplishments in biomedical research. The volume will provide a one of a kind reference work that highlights the many efforts, from the discovery of the HCV virus, to the invention of breakthrough medicines and their use in the real world to cure patients. It is the companion book to the volume HCV: The Journey from Discovery to a Cure - Volume II.

Power and Inequality in Interpersonal Relations Eric Beasley,2017-09-08 This book explores interpersonal situations in which weak or vulnerable people find themselves and the ways in which others help create, sustain, and eradicate such social dynamics. Vladimir Shlapentokh and Eric Beasley demonstrate that people can gain power over each other and then abuse this power because of unequal resource conditions. The authors define resources as the means necessary for satisfaction or achievement of needs or goals, such as wealth, physical strength, intellectual capacity and information, sexual attractiveness, and status. This volume is different from existing social science books on inequality and vulnerability, which address relations between people of different social positions, races, genders, ages, and places of residence confronting each other in political, economic, and cultural battles. This book focuses on people who become the victims of those whom they know personally-relatives, colleagues, neighbors. The authors argue that unequal resource distribution among members of social units is the main cause of conflict and ultimately creates situations where members of a social unit can abuse other members of the same unit.

Crisis Negotiations Michael J. McMains,Wayman C. Mullins,Andrew T. Young,2020-07-16 Crisis Negotiations: Managing Critical Incidents and Hostage Situations in Law Enforcement and Corrections, the sixth edition, is an invaluable resource for mitigating, managing, or responding to high risk negotiation incidents. This revision includes the current research on negotiating high-risk incidents in the classroom and the field. It includes an applied analysis of the value of psychopathology to high-risk perpetrators. It refines the empirical eclecticism introduced in the fourth edition to provide a conceptual basis for crisis negotiations. The authors include summary bullet points at the end of each chapter for easy reference when negotiators are in the field and a review of the literature since the last edition appeared. Their discussion of the strategic planning process involved in high-risk negotiation incidents focuses clearly on the critical questions negotiators need to ask themselves about any high-risk incident and provides a practical approach to the psychology of individuals that engage in high-risk incidents. Known as the bible to experienced professionals in the field, this sixth edition of Crisis Negotiations is vital for practitioners as well as for criminology, criminal justice or psychology courses in crisis management, applied psychology, and special operations in law enforcement and corrections. Instructors will find it well supported by ancillary materials including discussion questions, slide presentations, and a test bank, as well as case studies and self-assessment quizzes for students, making it easy to develop a first-time course or to integrate it into an existing course.
