Waste to Wealth Peter Lacy, Jakob Rutqvist, 2016-04-30 *Waste to Wealth* proves that 'green' and 'growth' need not be binary alternatives. The book examines five new business models that provide circular growth from deploying sustainable resources to the sharing economy before setting out what business leaders need to do to implement the models successfully.

Global Securities Litigation and Enforcement Pierre-Henri Conac, Martin Gelter, 2018-11-30 *Global Securities Litigation and Enforcement* provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets. It covers 29 jurisdictions worldwide, some of them are important although their law is not well known. It will be an invaluable resource for academics and students of securities litigation, as well as for lawyers, policy-makers and regulators. The book also provides a comprehensive contribution debate on whether public or private enforcement is preferable in terms of development of securities markets. It will appeal to those interested in the legal origins theory and in comparative securities law, and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes. While US securities law often serves as a model for international convergence, some of its elements, such as securities class actions, have not been adopted worldwide.

Media Constrained by Context Kristina Irion, Tarik Jusić, 2018-10-20 This book draws a comparative balance of twenty years' international media assistance in the five countries of the Western Balkans. The central question was what happens to imported models when they are transposed onto the newly evolving media systems of transitional societies. Albania, Bosnia-Herzegovina, Kosovo, Macedonia and Serbia undertook a range of media reforms to conform with accession requirements of the European Union and the standards of the Council of Europe, among others. The essays explore the nexus between the democratic transformation of the media and international media assistance. The cross-national analysis concludes that the effects of international assistance are highly constrained by the local context. From today's vantage point it becomes obvious, that scaling media assistance does not necessarily improve outcomes. The experiences in the region suggest that imported solutions have not been very cognitive in all aspects of local conditions but international strategies tend to be rather schematic and lacked strategic approaches to promote media policy stability, credible media reform and implementation. The book offers valuable insights into the nature and effects of media assistance and the strategies deployed by international aid agencies, local political forces, media professionals, civil society organizations and other actors.

The *Handbook of Research on Managerial Solutions in Non-Profit Organizations* provides relevant theoretical frameworks and the latest empirical research findings

related to the successful management of nonprofits. Providing insights into the best practices and valuable comparisons between strategies in different contexts, this book gives invaluable support for nonprofit managers, policy makers, students, and researchers.

Already a key player on the world stage, the Kingdom is going through a major planned economic transformation and diversification. In particular, a robust and transparent capital market, with a high level of integrity and sound enforcement, is well on the way to fruition. This book is the first in English to analyse and evaluate the roles of economic planning and a capital market in Saudi Arabia's economic modernization. In the process of examining the level of transparency and fairness in Saudi Arabia's capital market, the author provides detailed information and analysis of such issues and topics as the following: – market disclosure rules; – insider trading laws; – gaps in enforcement; – dispute resolution; – role of securities agencies; – Saudi Arabia's position in international organizations; and – repercussions of the 2006 Saudi stock market collapse. The author draws on a wide range of sources in both English and Arabic, and concludes with well-grounded proposals for appropriate judicial, administrative, and enforcement policies. Investors, their management and attorneys, and other advisors with an eye on trade development in the Middle East will derive great benefit from the current and detailed information in this book.
