*Alibaba* Hong Shen, 2021-07-11 This book examines the political-economic dynamics in the development of a leading global Internet giant: Alibaba. As both a prominent example of, as well as providing the basic infrastructure for, China's outward expansion, Alibaba demonstrates the complex interplay between different state agencies and units of capital in the context of the rise of global China. Hong Shen investigates the development and expansions of Alibaba and discusses how Alibaba has not only become a leader of China's increasingly globalizing internet but has also increasingly served as a basic infrastructure model for other Chinese companies to go global. Shen also addresses how this process has been constantly shaped and reshaped by complex state-capital interactions along the way. This book shows how different units of capital, both inside and outside of China, have interacted with Alibaba's developmental strategies and illustrates how different state agencies, both domestic and international, have enabled or constrained the company's development, especially its global expansion. This book will appeal to students and scholars of critical political economy of media, global media and digital industries, communication, technology and society, and internet studies. It will also be relevant to policy-makers working in the arena of global internet and trade policies.

And, they avoid the common frustrations stemming from lack of perceived relevance and engagement around on the strategy process. How you choose and execute the right approach is the focus of this book. *China's Disruptors* Edward Tse, 2015-07-14 In September 2014, Chinese e-commerce giant Alibaba raised \$25 billion in the world's biggest-ever initial public offering. Since then, millions of investors and managers worldwide have pondered a fundamental question: What's really going on with the new wave of China's disruptors? Alibaba wasn't an outlier—it's one of a rising tide of thriving Chinese companies, mostly but not exclusively in the technology sector. Overnight, its founder, Jack Ma, appeared on the same magazine covers as American entrepreneurial icons like Mark Zuckerberg. Ma was quickly followed by the founders of other previously little-known companies, such as Baidu, Tencent, and Xiaomi. Over the past two decades, an unprecedented burst of entrepreneurialism has transformed China's economy from a closed, impoverished, state-run system into a major power in global business. As products in China become more and more sophisticated, and as its companies embrace domestically developed technology, we will increasingly see Chinese goods setting global standards. Meanwhile, companies in the rest of the world wonder how they can access the fast-rising incomes of China's 1.3 billion consumers. Now Edward Tse, a leading global strategy consultant, reveals how China got to this point, and what the country's rise means for the United States and the rest of the world. Tse has spent more than twenty years working with senior Chinese executives, learning firsthand how China's most powerful companies operate. He's an expert on how private firms are thriving in what is still, officially, a communist country. His book draws on exclusive interviews and

case studies to explore questions such as \*What drives China's entrepreneurs? Personal fame and fortune—or a quest for national pride and communal achievement? \*How do these companies grow so quickly? In 2005, Lenovo sold just one category of products (personal computers) in one market, China. Today, not only is it the world's largest PC seller; it is also the world's third-largest smartphone seller. \*How does Chinese culture shape the strategies and tactics of these business leaders? Can outsiders copy what the Chinese are doing? \*Can capitalists really thrive within a communist system? How does Tencent's Pony Ma serve as a member of China's parliament while running a company that dominates online games and messaging? \*What impact will China have on the rest of the world as its private companies enter new markets, acquire foreign businesses, and threaten established firms in countless industries? As Tse concludes: "I believe that as a consequence of the opening driven by China's entrepreneurs, the push to invest in science, research, and development, and the new freedoms that people are enjoying across the country, China has embarked on a renaissance that could rival its greatest era in history—the Tang dynasty. These entrepreneurs are the front line in China's intense hunger for success. They will have an even more remarkable impact on the global economy in the future, through the rest of this decade and beyond."

*Why Customers Would Rather Have a Smartphone than a Car* Cor Molenaar, 2016-03-03 *Why Customers Would Rather Have a Smartphone than a Car* explores some of the fundamental changes in consumer behaviour: Why do we buy less in shops and more on the internet? Why do we spend more on gadgets, smartphones and apps and not more on food, holidays or clothing? Why do most business people only look at symptoms and not the causes of changing customer behaviour? The new generation buys differently from the baby boomers; they have different priorities and preferences. The internet has changed us in the way we think, act and communicate. Whilst many retailers now understand the need for change, few of them have established convincing or sustainable models for the future. Cor Molenaar argues that by understanding the drivers behind these new consumer behaviours, retailers can identify the opportunities this represents and adapt their offering accordingly. The kind of relationship retailing he advocates involves the way the retailer interacts with their customer; the new environment that they need to sustain along with their ability to relate customer data, technology and new services. The author interweaves examples from traditional and virtual retailing with his research on consumer psychology and buying behaviour to offer a sophisticated and at times challenging guide for all those involved in retailing, as well as those responsible for planning and designing social and retail space.

alibaba Liu Shiyong, Martha Avery, 2009-10-06 The first in-depth look at the multibillion-dollar company Alibaba.com—known to many as China's eBay—and the inspirational story behind the man who created it. A bestseller in China and now translated into English and updated with recent events, Alibaba by Liu Shiyong and Martha Avery tells the remarkable story behind the Internet phenomenon Alibaba.com and its founder Jack Ma, a man Barron's named one of the World's Top 30 CEOs in 2008. Ma's rise to prominence presents a riveting story: Despite growing up in China during the Cultural Revolution—in a period of total state control of the economy—he developed the keen entrepreneurial instincts that propelled him to billionaire status and enabled him to build a company outside the usual government channels. These instincts and habits incorporated martial arts training and allowed him to recognize, early on, that the Internet could leverage his company to rapid growth and also transform the way business is done around the world. Alibaba.com, where businesses can buy and sell everything from air beds to zippers, started with a modest initial investment of \$60,000 and has grown exponentially since its founding in 1999 to become the world's biggest business-to-business Web site. In 2007 it became the second largest IPO in history (after Google), and Fast Company has named it one of the world's most innovative companies. As a result, smart investors and technology insiders will be keeping a close eye on Alibaba for years to come. Whether you're seeking to understand China's meteoric rise, or just searching for the next Google, Yahoo!, or Amazon, Alibaba is crucial reading.

**Bank 2.0** Brett King, 2010-06-05 BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet—all within the next 10 years.

The End of Online Shopping Jongen Wijnand, 1999-01-05 Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7, customers for whom there is no distinction between online and offline. The End of Online Shopping: The Future of New Retail in an Always Connected World describes how the smart, the sharing, the circular, and the platform economy are shaping a new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries -- which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups -- and covers all aspects of the customer journey, from orientation and selection to delivery.

The End of Online Shopping provides an excellent overview of shopping trends and developments worldwide, and offers readers indispensable insights into the future of retail.

**Being Online** Jian Wang, 2021-10-05 A pioneer of cloud computing and big data offers his vision of the future world taking shape around us. Jian Wang was the founder and architect of Alibaba's cloud and has been the driving force behind its technology innovations. He was also the founder of the City Brain initiative to develop a new digital infrastructure for sustainable cities. Being Online is his

meditation on the moment we are in, as the digital era shifts to the internet era, spawning new innovations at a seemingly dizzying pace: cloud computing, 5G, artificial intelligence, big data, wearables, robots, virtual reality, the internet of things, blockchain, and more. For Wang, the invisible hand that connects them is being online. The conjunction of computing, data, and the internet has erased the difference between being online and off. When computing can be done in the cloud, it is on the road to becoming a utility. When data is connected, making it big, its usefulness multiplies exponentially in unforeseeable ways, as does its value. This moment will be as transformative for humanity as Henry Ford's production line. Data is changing the nature of business. Computing is reshaping the economy. The cloud will help us do things we could never do before, at scales that were previously impossible. It will reshape our vision of the world, as electrification once did and, more recently, the transition from analog to digital. While telling the story of Alibaba's breakthroughs and the development of his own understanding of the internet, Jian Wang's visionary book lays out the implications of this shift and how to think about being online.

Islam and Capitalism in the Making of Modern Bahrain Rajeswary Ampalavanar Brown,2023-05-01 In recent decades, the culture, society, politics, and economics of Bahrain have been transformed, driving its global ambitions while retaining to a degree the rule of law and cosmopolitanism. Islam and

Capitalism in the Making of Modern Bahrain examines the transformation of Bahrain from the 1930s, from a regional trading port and then an important oil producer into the financial hub for the Gulf and into a global centre of Islamic finance. It focuses on the changes and tensions that transformation brought to Bahrain's political, legal, economic, religious, and social structures. In this book, Rajeswary Brown explores the rising force of youth populism driven by the persistence of poverty and unemployment, notably among rural Shi'ite communities and unemployed middle-class youth, as well as examining Bahrain's skillful reconciliation of the demands of Islamic faith, expressed in the Sharia, to the requirements of modern financial capitalism. In this, Bahrain's experience can be set against the modern history of much of the rest of the Middle East, most strikingly with respect to the position of Islamic charities, notably in Syria, comparisons of which are fully explored here.
