Rod Serling Nicholas Parisi,2018-10-24 Long before anyone had heard of alien cookbooks, gremlins on the wings of airplanes, or places where pig-faced people are considered beautiful, Rod Serling was the most prestigious writer in American television. As creator, host, and primary writer for *The Twilight Zone*, Serling became something more: an American icon. When Serling died in 1975, at the age of fifty, he was the most honored, most outspoken, most recognizable, and likely the most prolific writer in television history. Though best known for *The Twilight Zone*, Serling wrote over 250 scripts for film and television and won an unmatched six Emmy Awards for dramatic writing for four different series. His filmography includes the acclaimed political thriller *Seven Days*

in May and cowriting the original Planet of the Apes. In great detail and including never-published insights drawn directly from Serling's personal correspondence, unpublished writings, speeches, and unproduced scripts, Nicholas Parisi explores Serling's entire, massive body of work. With a foreword by Serling's daughter, Anne Serling, Rod Serling: His Life, Work, and Imagination is part biography, part videography, and part critical analysis. It is a painstakingly researched look at all of Serling's work—in and out of The Twilight Zone.

An Asperger Dictionary of Everyday Expressions Ian Stuart-Hamilton, 2007 This revised and expanded edition has over 5000 explanations that help unlock the meaning of everyday idiomatic expressions and dispel the confusion that arises from the misinterpretation of language. Both informative and entertaining, the book addresses an important aspect of social communication for people with Asperger Syndrome, who use direct, precise language and 'take things literally'. Each entry is clearly explained, with a guide to its politeness level and suggestions for when and how it might be used. The book covers British and American English and includes some Australian expressions. Although the dictionary is primarily for people with Asperger Syndrome, it is useful and fun for anyone who struggles to understand idiomatic and colloquial English. This is an essential, accessible resource for everyday use.

The Famine Plot Tim Pat Coogan, 2012-11-27 During a Biblical seven years in the middle of the nineteenth century, Ireland experienced the worst disaster a nation could suffer. Fully a quarter of its citizens either perished from starvation or emigrated, with so many dying en route that it was said, you can walk dry shod to America on their bodies. In this grand, sweeping narrative, Ireland's best-known historian, Tim Pat Coogan, gives a fresh and comprehensive account of one of the darkest chapters in world history, arguing that Britain was in large part responsible for the extent of

the national tragedy, and in fact engineered the food shortage in one of the earliest cases of ethnic cleansing. So strong was anti-Irish sentiment in the mainland that the English parliament referred to the famine as God's lesson. Drawing on recently uncovered sources, and with the sharp eye of a seasoned historian, Coogan delivers fresh insights into the famine's causes, recounts its unspeakable events, and delves into the legacy of the famine mentality that followed immigrants across the Atlantic to the shores of the United States and had lasting effects on the population left behind. This is a broad, magisterial history of a tragedy that shook the nineteenth century and still impacts the worldwide Irish diaspora of nearly 80 million people today.

Towards Green Cities Karsten Grunewald,Junxiang Li,Gaodi Xie,Lennart Kümper-Schlake,2017-08-05 The book aims to capture, describe and convey the current significance, the values and potentials of urban biodiversity and ecosystem services to scientists and professionals in the context of sustainable urban development and ongoing urbanization processes. Current developments, different approaches and future challenges in the competition of green spaces and urban land consumption in China and Germany are elaborated, discussed and illustrated within case

studies and good practice examples. The strategic goal is a long-term appreciation of the potentials and increased consideration of urban green spaces in city planning and development. This book provides tangible recommendations for urban planners, politicians and stakeholders in the fields of green infrastructure at the interface of environment and urban landscape.

Masculinity in Crisis R. Horrocks, 1994-08-30 This book argues that masculine identity is in deep crisis in Western culture - the old forms are disintegrating, while men struggle to establish new relations with women and with each other. This book offers a fresh look at gender, particularly masculinity, by using material from the author's work as a psychotherapist. The book also considers the contributions made by feminism, sociology and anthropology to the study of gender, and suggests that it must be studied from an interdisciplinary standpoint. Masculinity is seen to have economic, political and psychological roots, but the concrete development of gender must be traced in the relations of the male infant with his parents. Here the young boy has to separate from his mother, and his own proto-feminine identity, and identify with his father - but in Western culture fathering is often deficient. Male identity is shown to be fractured, fragile and truncated. Men are trained to be rational and violent, and to shut out whole areas of existence and feeling. Many stereotypes imprison men - particularly machismo, which is shown to be deeply masochistic and self-destructive.

A Gravity's Rainbow Companion Steven C. Weisenburger, 2011-03-15 Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's Gravity's Rainbow. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of

English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of Gravity's Rainbow--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of Gravity's Rainbow: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty Great Books of the Twentieth Century.

Cultural Urban Heritage Mladen Obad Šćitaroci, Bojana Bojanović Obad Šćitaroci, Ana Mrđa, 2019-01-28 This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective. It discusses identifying historical, current and possible future models for the revival and enhancement of cultural heritage, taking into consideration three factors - respect for the inherited, contemporary and sustainable future development. The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement

methods, improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural, and in particular, architectural heritage. Cultural heritage is perceived primarily through conservation, but that comes with limitations. If heritage is perceived and experienced solely through conservation, it becomes a static object. It needs to be made an active subject, which implies life in heritage as well as new purposes and new life for abandoned heritage. Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community. To achieve this, it should be developed in accordance with contemporary needs and technological achievements, but on scientifically based and professional criteria and on sustainable models. The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments (case studies) and theory.
