**Alien Battle for Earth** Scott R. Campbell,2022-03-25 Techno and Mateo face an alien presence that has secretly taken over big business and government. The aliens run everything from underground tunnels in which they do the unspeakable to humans. Techno's sister was abducted, and Mateo and his family were taken underground. Mateo defended his sister's honor only to find himself a prisoner on a dark train, shackled, and with no food or water.. His situation worsens when he finds out that he must fight for food while caged.. Mateo is ordered to take his clothes off and board another train. Nobody has ever come back. This one takes him to a chute, a grinder, and screams. A horrid realization comes when he sees who is running the operation. Mateo not only fights back, he become a national hero for challenging the Draconians. Mateo's sister is locked into a special cell to please the leader of the Reptilians. Techno and Mateo decide to take matters into their own hands. Techno gets a special position in the Space Force investigating abductions. Underage abductees were forced into prostitution to blackmail powerful men. One case may be his sister, abducted twenty-five years ago. Could it be her? The alien underground has made so much progress during the last one hundred years in terms of control and planetary devastation that an intervention is called for by another alien species called the Orbellians. The Orbellians have had a hand in life on Earth for millennia and they begin to hybridize with humans. The result is an epic battle for control of Earth between three ancient alien species and humans.

Vesper Flights Helen Macdonald,2020-08-25 The New York Times–bestselling author of *H is for Hawk* explores the human relationship to the natural world in this “dazzling” essay collection (Wall Street Journal). In *Vesper Flights*, Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk's poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds' nests, and the unexpected guidance and comfort we find when watching wildlife.

*Future Dark 1: Aliens* Trung Nguyen, 2015-05-29 This is the first book in the Future Dark series. In 2194, Mars is colonized. The descendants of 21st century industrialist Elon Musk, founder of Musk City, Mars, form the ruling elite on the Red Planet. The Musk clan is about to face a historical event as one of their own, Lazar Musk Whittaker, a Biomech, embarks on an ambitious undertaking to change the course of human evolution. The war of the species and the fracture within the Musk clan begin when four tombs are discovered encased in an asteroid in a mining facility on Phobos, one of Mars' two moons. As the Martians soon discover, these tombs contain the bodies of four aliens. In the future, Earth is a multi-humanoid society of Naturalopists (natural humans), Biomechs (biological-mechanical beings), cyborgs (part machine-part human), milbots (military robots), cilbots (civilian robots), and wobots (worker robots). "I liked this novel a lot...The plot of this novel is its strongest element...The author can put together a very strong plot, with plenty of twists and turns, and a good ending. There are some very suspenseful moments, and levels of tension are created which at their best evoke the sensations of a fine horror story. And the author, by and large, appears to have done his/her homework. The novel also has sociological touches which work well, especially its view of futuristic mega-capitalism. The venality, blindness, and excess of Udell Whittaker and his flunkies is very believable, and adds depth to the story. The manner of day to day life, both in space and on the 'colonies' of Mars seems well-researched and is often fascinating to the lay reader..." – Writers Guild of Alberta

**Facing Diversity in Child Foreign Language Education** Joanna Rokita-Jaśkow, Agata Wolanin, 2021-04-29 This edited book uses the concept of diversity in child foreign language education as a major organizing principle. Since a foreign language, most typically English, is taught globally to an increasing number of children, the variability in the process and varied learning outcomes are inescapable phenomena. This book has been constructed on the premise that heterogeneity, first, concerns young language learners, who due to the disparity in the pace of development need appropriately tailored educational solutions, and, second, it refers to a diversity of contexts in which learning takes place. The contexts can be defined on a macroscale (e.g. different countries), mesoscale (e.g. different institutions), and microscale (e.g. specific learner groups). The book consists of four thematic strands. In Part One the learner-internal causes of heterogeneity of young language learners are clarified. Part Two presents a sample of classroom studies in which learner variables, such as gender, learner preferences, and special needs are taken into account. Part Three looks at teaching materials and how they meet learners' needs. Finally, Part Four highlights diversity issues that teachers should be prepared to face.

**Spaceman of Bohemia** Jaroslav Kalffar, 2017-03-07 An intergalactic odyssey of love, ambition, and self-discovery. Orphaned as a boy, raised in the Czech countryside by his doting grandparents, Jakub Prochv°zka has risen from small-time scientist to become the country's first astronaut. When a dangerous solo mission to Venus offers him both the chance at heroism he's dreamt of, and a way to atone for his father's sins as a Communist informer, he ventures boldly into the vast unknown. But in so doing, he leaves behind his devoted wife, Lenka, whose love, he realizes too late, he has sacrificed on the altar of his ambitions. Alone in Deep Space, Jakub discovers a possibly imaginary giant alien spider, who becomes his unlikely companion. Over philosophical conversations about the nature of love, life and death, and the deliciousness of bacon, the pair form an intense and emotional bond. Will it be enough to see Jakub through a clash with secret Russian rivals and return him safely to Earth for a second chance with Lenka? Rich with warmth and suspense and surprise, Spaceman of Bohemia is an exuberant delight from start to finish. Very seldom has a novel this profound taken readers on a journey of such boundless entertainment and sheer fun. A frenetically imaginative first effort, booming with vitality and originality . . . Kalffar's voice is distinct enough to leave tread marks.-Jennifer Senior, New York Times
