Making Music Dennis DeSantis, 2015

Brian Eno Eric Enno Tamm, 1995-08-22 Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

The Untamed Sebastian A. Jones, 2014-11-17

Blackstar Theory Leah Kardos, 2021-12-16 Blackstar Theory takes a close look at David Bowie's ambitious last works: his surprise 'comeback' project *The Next Day* (2013), the off-Broadway musical *Lazarus* (2015) and the album that preceded the artist's death in 2016 by two days, *Blackstar*. The book explores the swirl of themes that orbit and entangle these projects from a starting point in musical analysis and features new interviews with key collaborators from the period: producer Tony Visconti, graphic designer Jonathan Barnbrook, musical director Henry Hey, saxophonist Donny McCaslin and assistant sound engineer Erin Tonkon. These works tackle the biggest of ideas: identity, creativity, chaos, transience and immortality. They enact a process of individuation for the Bowie meta-persona and invite us to consider what happens when a star dies. In our universe, dying stars do not disappear - they transform into new stellar objects, remnants and gravitational forces. The radical potential of the Blackstar is demonstrated in the rock star supernova that creates a singularity resulting in cultural iconicity. It is how a man approaching his own death can create art that illuminates the immortal potential of all matter in the known universe.

Feed M.T. Anderson, 2012-07-17 Identity crises, consumerism, and star-crossed teenage love in a futuristic society where people connect to the Internet via feeds implanted in their brains. This new edition contains new back matter and a refreshed cover. A National Book Award finalist.

Film Music Peter Larsen, 2007 Peter Larsen traces the history of music in film and discusses central theoretical questions concerning its narrative and psychological functions. He looks in depth at film classics such as Howard Hawks's 'The Big Sleep' and Hitchcock's 'North by Northwest' as well as later blockbusters such as 'Star Wars' and 'Bladerunner'.

Songs in the Key of Z Irwin Chusid, 2000 Irwin Chusid profiles a number of outsider musicians - those who started as outside and eventually came in when the listening public caught up with their radical ideas. Included are The Shaggs, Tiny Tim, Syd Barrett, Joe Meek, Captain Beefheart, The Cherry Sisters, Daniel Johnston, Harry Partch, Wesley Willis, and others.

Set the Night on Fire Robby Krieger, 2021-10-12 In his tell-all, legendary Doors guitarist, Robby Krieger, one of Rolling Stone's 100 Greatest Guitarists of All Time, opens up about his band's meteoric career, his own darkest moments, and the most famous black eye in rock 'n' roll. Few bands are as shrouded in the murky haze of rock mythology as The Doors, and parsing fact from fiction has been a virtually impossible task. But now, after fifty years, The Doors' notoriously quiet guitarist is finally breaking his silence to set the record straight. Through a series of vignettes, Robby Krieger takes readers back to where it all happened: the pawn shop where he bought his first guitar; the jail cell he was tossed into after a teenage drug bust; his parents' living room where his first songwriting sessions with Jim Morrison took place; the empty bars and backyard parties where The Doors played their first awkward gigs; the studios where their iconic songs were recorded; and the many concert venues that erupted into historic riots. Set the Night on Fire is packed with never-before-told stories from The Doors' most vital years, and offers a fresh perspective on the most infamous moments of the band's career. Krieger also goes into heartbreaking detail about his life's most difficult struggles, ranging from drug addiction to cancer, but he balances out the sorrow with humorous anecdotes about run-ins with unstable fans, famous musicians, and one really angry monk. Set the Night on Fire is at once an insightful time capsule of the '60s counterculture, a moving reflection on what it means to find oneself as a musician, and a touching tale of a life lived non-traditionally. It's not only a must-read for Doors fans, but an essential volume of American pop culture history.

Slow Violence and the Environmentalism of the Poor Rob Nixon, 2011-06-01 The violence wrought by climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Using the innovative concept of slow violence to describe these threats, Rob Nixon focuses on the inattention we have paid to the attritional lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today. Slow violence, because it is so readily ignored by a hard-charging capitalism, exacerbates the vulnerability of ecosystems and of people who are poor, disempowered, and often involuntarily displaced, while fueling social conflicts that arise from desperation as life-sustaining conditions erode. In a book of extraordinary scope, Nixon examines a cluster of writer-activists affiliated with the environmentalism of the poor in the global South. By approaching environmental justice literature from this transnational perspective, he exposes the limitations of the national and local frames that dominate environmental writing. And by skillfully illuminating the strategies these writer-activists deploy to give dramatic visibility to environmental emergencies, Nixon invites his readers to engage with some of the most pressing challenges of our time.

Analog Synthesizers Mark Jenkins, 2009-10-19 In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The individual components of analog sound creation are then examined in detail, with step by step examples of sound creation techniques. Then

the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples of analog sound creation basics as well as more advanced techniques, and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis.

More Brilliant than the Sun Kodwo Eshun, 2020-02-04 The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

Analog Days T. J. PINCH, Frank Trocco, T. J. Pinch, 2009-06-30 Tracing the development of the Moog synthesizer from its initial conception to its ascension to stardom in 'Switched-on Bach', this text conveys the consequences of a technology that would provide the soundtrack for a chapter in cultural history.

The Musical Shape of the Liturgy William Peter Mahrt, 2012 Professor William Mahrt of Stanford University and the Church Music Association of America has written a sweeping book—one that it is at once scholarly and practical—on that most controversial topic of music and the liturgy. He provides an over-whelming argument that every parish must have high standards for liturgical music and he makes the full case for Gregorian chant as the model and the ideal of that liturgical music. - back cover

The Sound of Innovation Andrew J. Nelson, 2023-08-15 How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced “karma”) helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In *The Sound of Innovation*, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications, showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

Music, Meaning and Transformation Steve Dillon, 2009-03-26 Music, Meaning and

Transformation: meaningful music making for life, examines the musical experiences that students find meaningful and the ways in which teachers, parents and community music leaders might provide access to meaningful music education. This is particularly relevant today because school music often fails to provide sustainable access to music making for life, health and wellbeing beyond school. This book seeks to reframe the focus of music education within a pragmatist philosophy and provide a framework that is culturally and chronologically inclusive. The approach involves an intensely personal music teachers' journey that privilege the voices of students and teachers of a music making community and sets these against rigorous long termed qualitative methodologies. Music education is shifting focus away from music as an object and process towards the meaning experienced by the student personally, socially and culturally. This is an important and fundamental issue for the development of philosophy for pre-service and practicing music teachers and community music project leaders. The focus now needs to be upon the 98% who could have music as a significant expressive force in their lives as a means of facilitating social inclusion, for mental health and well being and to have access to the sense of belonging that community music making can bring as a lifelong activity. The book aims to provide a comprehensive guide to music education that leads to a music education for all for life. This book emphasises the maker in context examining: the student as maker, the teacher as builder and designer and the school as village. The relationship between music making, education and health and well being has been and is the subject of many research projects and national and international reviews. Seldom though in these studies has there been any attempt to identify the qualities of successful and sustainable interactions with music making, the qualities of good teaching and good teaching practice. The focus of this book is to provide simple but effective tools for evaluating and testing the meaning evident in a music-making context, identify the modes of engagement and establish the unique expressive music making needs of twenty first century communities.
