Keep Watching the Skies! Bill Warren,2009-11-16 Bill Warren's *Keep Watching the Skies!* was originally published in two volumes, in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition, with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs (many rare, 35 in color), has seven useful appendices, and concludes with an enormous index. This book is also available in softcover format (ISBN 978-1-4766-6618-1).

Everything I Need to Know I Learned from a Children's Book Anita Silvey,2009-10-13 What children's book changed the way you see the world? Anita Silvey asked this question to more than one hundred of our most respected and admired leaders in society, and she learned about the books that shaped financiers, actors, singers, athletes, activists, artists, comic book creators, novelists, illustrators, teachers... The lessons they recall are inspiring, instructive, and illuminating. And the books they remember resonate as influential reading choices for families. The Magical Pine Ring Margaret Bedrosian, 1991 Margaret Bedrosian's pioneering interdisciplinary study examines the continuing effect of Armenian history on Armenian-American writing. Using the work of ten Armenian-American poets and fiction and non-fiction writers, she shows the continuing impact on Armenian Americans of cultural symbols, myths, and attitudes carried over from the Old World, and explores the ways in which two cultures meet, conflict, and become integrated in the imagination. Through analysis of writers' actual or fictionalized experience, *The Magical Pine Ring* provides an understanding of the Armenians' specific concerns as Armenians and as immigrants, the effect of their self-awareness as Armenians on their adaptation to America, the typical and stereotypical situations and personalities that emerged with time, and the key values and beliefs that endured even as names were changed and assimilation blurred physical and social demeanor. Bedrosian also explores the directions Armenian-American writers have taken in portraying group history and the nature of their self-discovery as Armenian Americans. For the most part, this literature is not a direct outgrowth of the mainstream of Armenian literature. The relationship of the writer discussed here is one of spirit, of ancestral sympathies, burdens, and responsibilities. These writers register the pain of exile and alienation as they weave images of yearning and loss, celebration and futuristic vision into their writing. Through their crossroads identity in America, these writers add to our understanding of the Armenian diaspora.

Ethnozoology Romulo Romeu Nobrega Alves,Ulysses Paulino Albuquerque,2017-10-31 Ethnozoology: Animals In Our Lives represents the first book about this discipline, providing a discussion on key themes on human-animal interactions and their implications, along with recent major advances in research. Humans share the world with a bewildering variety of other animals, and have interacted with them in different ways. This variety of interactions (both past and present) is investigated through ethnozoology, which is a hybrid discipline structured with elements from both the natural and social sciences, as it seeks to understand how humans have perceived and interacted with faunal resources throughout history. In a broader context, ethnozoology, and its companion discipline, ethnobotany, form part of the larger body of the science of ethnobiology. In recent years, the importance of ethnozoological/ethnobiological studies has increasingly been recognized, unsurprisingly given the strong human influence on biodiversity. From the perspective of ethnozoology, the book addresses all aspects of human connection, animals and health, from its use in traditional medicine, to bioprospecting derivatives of fauna for pharmaceuticals, with expert contributions from leading researchers in the field. Draws on editors' and contributors' extensive research, experience and studies covering ethnozoology and ethnobiology Covers all aspects of human-animal interaction through the lens of this emerging discipline, with coverage of both domestic and wild animal topics Presents topics of great interest to a variety of researchers including those in wildlife/conservation (biologists, ecologists, conservationists) and domestic-related disciplines (psychologists, sociologists)
