Forever People

Slingshot Tom Kovach,2006-12 A collection of the early writings of Tom Kovach -- soldier, author, activist, candidate. Topics include: military, aviation, terrorism, illegal aliens, politics. REVIEWS This book should be required reading for every American, age 16 and older.... -- Charles Jones III (Brigadier General, USAF, Retired; chairman, National Veterans Coalition) If you want to straighten out America, think of it as a compass. -- Jack Cashill, Ph.D. (author, columnist, documentary producer) ... this guy is like Charlie Daniels with a pen instead of a fiddle. -- Mark A. Rose (columnist and blogger)

Slingshot Tobias Klausmann,2015-05-01 Kim expected significant trouble after stealing a prototype spaceship with an one-of-a-kind unfettered AI, but not this much. She finds herself on the run from radical AI liberation types, the military, and even intelligence agencies after her. As Kim realizes that she may not be the sole target, she scrambles to form new alliances and revive existing ones. Few people are keen on helping her, since one of the groups pursuing her is willing to kill thousands of bystanders to get to her.

Alien Oceans Kevin Hand,2021-09-21 Inside the epic quest to

find life on the water-rich moons at the outer reaches of the solar system. Where is the best place to find life beyond Earth? We often look to Mars as the most promising site in our solar system, but recent scientific missions have revealed that some of the most habitable real estate may actually lie farther away. Beneath the frozen crusts of several of the small, ice-covered moons of Jupiter and Saturn lurk vast oceans that may have existed for as long as Earth, and together may contain more than fifty times its total volume of liquid water. Could there be organisms living in their depths? *Alien Oceans* reveals the science behind the thrilling quest to find out. Kevin Peter Hand is one of today's leading NASA scientists, and his pioneering research has taken him on expeditions around the world. In this captivating account of scientific discovery, he brings together insights from planetary science, biology, and the adventures of scientists like himself to explain how we know that oceans exist within moons of the outer solar system, like Europa, Titan, and Enceladus. He shows how the exploration of Earth's oceans is informing our understanding of the potential habitability of these icy moons, and draws lessons from what we have learned about the origins of life on our own planet to consider how life could arise on these distant worlds.

Alien Oceans describes what lies ahead in our search for life in our solar system and beyond, setting the stage for the transformative discoveries that may await us.

13 Acorns Edward Martin, 2022-04-20 This book is about people and questions. Fundamentally, this book was written to address the same important questions we are both asking. This book, 13 Acorns, is composed of individual fictional stories about people, their choices, their beliefs, consequences, and the way they interact with the world.

A Ride on the Cosmic Slingshot George R. Melton, 2011-08-16 In 1985, it seemed that George Melton and Wil Garcia were destined to become just two more unfortunate casualties of the AIDS epidemic. But after a profound spiritual awakening shifted their focus away from allopathic medicine to an internal process of self-discovery, they replaced lifetimes of guilt, anger, and fear with trust, self-esteem, and love. Within a year, their diseases were in remission and they were both symptom-free. But that is hardly the end of their story. After a chance visit to a potluck evening of metaphysics and channeling forms an unlikely relationship with the spirit of Benjamin Franklin, George and Wil soon trade their comfortable New York home for a twenty-seven-foot Winnebago.

As they set off on an eighteen-month, forty-thousand-mile sojourn to share their message of hope, the men are unwittingly catapulted into unlikely roles as poster boys for the nascent, self-healing movement. But when Wil unexpectedly dies, George begins questioning everything. A Ride on the Cosmic Slingshot takes a poignant, inspiring journey through an unconditional love that proves stronger than death, as Wil reaches beyond the grave to offer George a final, life-altering gift.

Wizards, Aliens, and Starships Charles L. Adler, 2014-02-02 Explaining the science behind science fiction and fantasy—from the probable to the impossible From teleportation and space elevators to alien contact and interstellar travel, science fiction and fantasy

writers have come up with some brilliant and innovative ideas. Yet how plausible are these ideas--for instance, could Mr. Weasley's flying car in the Harry Potter books really exist? Which concepts might actually happen, and which ones wouldn't work at all?

Wizards, Aliens, and Starships delves into the most extraordinary details in science fiction and fantasy--such as time warps, shape changing, rocket launches, and illumination by floating candle--and shows readers the physics and math behind the phenomena. With simple mathematical models, and in most cases using no more than high school algebra, Charles Adler ranges across a plethora of remarkable imaginings, from the works of Ursula K. Le Guin to Star Trek and Avatar, to explore what might become reality. Adler explains why fantasy in the Harry Potter and Dresden Files novels cannot adhere strictly to scientific laws, and when magic might make scientific sense in the muggle world. He examines space travel and wonders why it isn't cheaper and more common today. Adler also discusses exoplanets and how the search for alien life has shifted from radio communications to space-based telescopes. He concludes by investigating the future survival of humanity and other intelligent races. Throughout, he cites an abundance of science fiction and fantasy authors, and includes concise

descriptions of stories as well as an appendix on Newton's laws of motion. Wizards, Aliens, and Starships will speak to anyone wanting to know about the correct--and incorrect--science of science fiction and fantasy.

As Resident Aliens Kathleen Kern, 2010-01-01 As the crucifixes drenched with Jewish blood drop from our hands, we stand impotent and wordless before this tragedy of Israel and Palestine...In the name of the crucified Messiah, we must struggle against the conditions which make history a trail of crucifixions. Only then, in solidarity with Jews and Palestinians, can we dream of Messianic times, of a shalom without victims. With these words, theologian Rosemary Radford Reuther laid out the pitfalls for Christians entering the arena of the Palestinian-Israeli conflict. Nevertheless, in 1995, a small cohort of pacifist Christians decided to paddle against the currents of history, against the crusades, pogroms, and colonial enterprises of their co-religionists, toward that goal of a shalom without victims. Setting up a project in the West Bank city of Hebron, over the next ten years Christian Peacemaker Teams forged relationships with Palestinians, Israelis, and internationals who were resisting the Israeli military occupation of Palestine. As resident aliens (See Exodus 23:9) they have

sojourned in the Holy Land to support Palestinians and Israelis who reject violence as a means of solving the conflict, who think that one nation has no right to subjugate and exploit another, and who believe all the residents of the region are entitled to the same, exactly the same, human rights. This book charts the growth of CPT in Palestine, how it adapted to changing political conditions, spread to locations outside of Hebron, and developed networks with activists throughout Palestine and Israel.

The UFO Evidence Richard H. Hall,2001-01-03 Patterned after the first volume published in 1964, *The UFO Evidence*, Volume II is

much anticipated by the research community. The book reports 30 years of UFO sightings since 1964 with related data and descriptive features organized by category. Among the topics discussed are the now strongly established patterns of UFO sightings, the growing evidence worldwide that UFOs represent someone's technology, the history of government sponsored UFO investigations, and political and human responses to UFO sightings. The master chronology is an incredibly complete listing, which also refers the reader to pertinent sections in the book for fuller descriptions.

The Secret Influence of the Moon Louis Proud, 2013-12-01 The Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth • Investigates the Moon as the home of an alien intelligence who controls humanity • Examines several of NASA's Apollo missions and the findings they concealed • Reveals the many holes in the "Giant Impact" theory about the Moon's origins and the evidence for a hollow, artificial Moon • Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah, tarot, and other sources Despite being the most prominent celestial body after the Sun, the Moon has many qualities that science has yet to explain.

Lunar rock samples reveal the Moon once had a magnetic field like the Earth, and seismic experiments by NASA suggest the Moon is at least partially hollow. For centuries people have observed lights, moving clouds and shadows, and even the disappearance of entire craters via telescope. Apollo astronauts repeatedly felt the presence of a “non-human intelligence” during their Moon visits, and many indigenous traditions speak of malevolent visitors from the Moon. A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world--that someone or something altered it long ago. Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features--its craters, maria, rilles, tunnels, and domes. He examines several of NASA’s Apollo missions, showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there. He explains the many holes in the commonly accepted “Giant Impact” theory of the Moon’s origins and reveals the evidence for a hollow, artificial Moon placed in orbit eons ago to observe Earth. Examining the deep influence of the Moon on the collective mind of humanity, Proud looks at what the Qabbalah, the tarot, and other occult traditions say about the Moon and interprets G. I. Gurdjieff’s teachings that “we are food for the

Moon.” He investigates the Moon as a gateway to another realm, as the Purgatory of Christianity, and as the home of an alien intelligence who controls and exploits humanity. Examining the Moon from both scientific and esoteric perspectives, Proud shows the Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth.

Killer Apps Jeremy Packer, Joshua Reeves, 2020-02-28 In **Killer Apps** Jeremy Packer and Joshua Reeves provide a detailed account of the rise of automation in warfare, showing how media systems are central to building weapons systems with artificial intelligence in order to more efficiently select and eliminate military targets. Drawing on the insights of a wide range of political and media theorists, Packer and Reeves develop a new theory for understanding how the intersection of media and military strategy drives today's AI arms race. They address the use of media to search for enemies in their analyses of the history of automated radar systems, the search for extraterrestrial life, and the development of military climate science, which treats the changing earth as an enemy. As the authors demonstrate, contemporary military strategy demands perfect communication in an evolving

battlespace that is increasingly inhospitable to human frailties, necessitating humans' replacement by advanced robotics, machine intelligence, and media systems.
