The Hynek UFO Report Joel Hynek, 2020-01-13 The ultimate guide to Project Blue Book by one of the lead astronomers for the US Air Force program to investigate UFO sightings. Originally released in 1977, this new edition by the world's foremost authority on UFOs distills 12,000 sightings and 140,000 pages of Project Blue Book evidence into a coherent explanation. A US Air Force - sponsored UFO-basher for years, Hynek had completely changed his tune by the late 1960s. Whether you believe in little green men or an official government cover-up policy, The Hynek UFO Report is required reading. Have UFOs really been reported by every nation across the globe? Can all the eyewitness reports simply be fantasy? Are we victims of mass hallucination or just plain lies? Have close encounters actually occurred? Is the government concealing deep secrets at a hidden location? The Hynek UFO Report is rational, logical, and realistic. It is for anyone interested in UFOs, the possibility of extraterrestrial life, and the role of the US government in hiding the truth from the public.

Asteroids Viorel Badescu, 2013-07-03 The Earth has limited material and energy resources while these resources in space are virtually unlimited. Further development of humanity will require going beyond our planet and exploring of extraterrestrial resources and sources of unlimited power. Thus far, all missions to asteroids have been motivated by scientific exploration. However, given recent advancements in various space technologies, mining asteroids for resources is becoming ever more feasible. A significant portion of asteroids value is derived from their location; the required resources do not need to be lifted at a great expense from the surface of the Earth. Resources derived from Asteroid not only can be brought back to Earth but could also be used to sustain human exploration of space and permanent settlements in space. This book investigates asteroids' prospective energy and material resources. It is a collection of topics related to asteroid exploration, and utilization. It presents past and future technologies and solutions to old problems that could become reality in our life time. The book therefore is a great source of condensed information for specialists involved in current and impending asteroid-related activities and a good starting point for space researchers, inventors, technologists and potential investors. Written for researchers, engineers, and businessmen interested in asteroids' exploration and exploitation. Keywords: Asteroids, Asteroid exploration, Asteroid exploitation, Energy sources, Space Resources, Material Resources, In-Situ Resource Utilization, Mining

Area 51 Annie Jacobsen, 2011-05-17 This compellingly hard-hitting bestseller from a Pulitzer Prize finalist gives readers the complete untold story

of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Incident at Devils Den: A True Story, by Terry Lovelace, Esq Terry Lovelace, 2018-03-10 A true story of the 1977 alien abduction as told by a former Assistant Attorney General and USAF veteran. He and a friend were taken while remote camping in an Arkansas State Park. Includes the 2012 x-rays of an alien implant discovered on a routine x-ray. It was the catalyst to tell the story he had to retire before he could tell.

Introduction to Rocket Science and Engineering Travis S. Taylor, 2017-04-07 Introduction to Rocket Science and Engineering, Second Edition, presents the history and basics of rocket science, and examines design, experimentation, testing, and applications. Exploring how rockets work, the book covers the concepts of thrust, momentum, impulse, and the rocket equation, along with the rocket engine, its components, and the physics involved in the generation of the propulsive force. The text also presents several different types of rocket engines and discusses the testing of rocket components, subsystems, systems, and complete products. The final chapter stresses the importance for rocket scientists and engineers to creatively deal with the complexities of rocketry.

The Role of Halogens in Terrestrial and Extraterrestrial Geochemical Processes Daniel E. Harlov, Leonid Aranovich, 2018-01-30 The book summarizes the knowledge and experiences concerning the role of halogens during various geochemical processes, such as diagenesis, ore-formation, magma evolution, metasomatism, mineralization, and metamorphism in the crust and mantle of the Earth. It comprises the role of halogens in other terrestrial worlds like volatile-rich asteroids, Mars, and the ice moons of Jupiter and Saturn. Review chapters outline and expand upon the basis of our current understanding regarding how halogens contribute to the geochemical/geophysical evolution and stability of terrestrial worlds overall.

Alien: the Weyland-Yutani Report Stephani Danelle Perry, John R. Mullaney, Markus Pansegrau, 2015-04-01 For hundreds of years now, scientists at the Weyland-Yutani Corporation have been monitoring the behavior of an alien life-form so powerful that its potential for military application appears limitless. Although all attempts to harness the beast's abilities have ended in appalling bloodshed, the acquisition of the Xenomorph remains a priority. As such, Weyland-Yutani has granted you access to their detailed files on the alien in the hope that you will be able to help capture and subjugate one of these fascinating yet deadly creatures. Alien: The Weyland-Yutani Report is the first item to be produced in the thrilling new collaboration between Sideshow Collectibles and Insight Editions. Featuring a striking sculpted slipcase that captures the ferocious power of the Xenomorph, the book is designed to look as if it has been wrapped in the skin of the iconic creature. This slipcase sculpt is the first of its kind and unique to this exclusive edition of the book. The interior of the book utilizes specially commissioned illustrations and thirty-five years of Alien movie concept art and film stills to

create a deeply engrossing reading experience that explores the nature of the Xenomorph in unparalleled detail. Alien: The Weyland-Yutani Report also contains extensive information on the characters, locations, vehicles, and weapons from the movies, along with an in-depth breakdown of the Xenomorph's life cycle. The book also features a wealth of inserts and removable items, including: - Pvt. Hudson's discharge papers - Veterinarian report on Jonesy the cat - Medical report on facehugger victim Marachuk, John J. - Carter J. Burke's communication card - Chest X-ray showing Xenomorph implantation - Bug Stomper Dropship sticker - Exclusive extracts from prisoner Morse's tell-all novel, Space Beast

With a Little Help Cory Doctorow,2015-07-16 With a Little Help is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. With a Little Help consists of 12 stories, all reprints except for Epoch (commissioned by Mark Shuttleworth).

Shadows of the Fall Glynn Stewart,2020-10-13 Fifty thousand years ago, the Precursors broke the universe Now great powers and small alike fight over their wreckage But in the midst of the chaos, there is a question no one asks... Why? Morgan Casimir, commander of the A!Tol Imperial cruiser Defiant, has seen the works of the Precursor aliens known as the Alava. She has seen their accidents threaten worlds and consume entire star fleets. Charged by her Empress to prevent a conspiracy of profiteers from finding and using a lost fleet of Alava warships, she knows unimaginable catastrophe looms if she fails. With her lover, xenoarcheologist Dr. Rin Dunst, at her side, she is sent to a hot zone on the edge of war to once again achieve the impossible. But as they search along a border flaring in violence, Morgan discovers that if the worst comes to pass, her orders are to destroy the ships rather than allow them to be taken...and she realizes that there just might be a reason seemingly godlike aliens lost an entire fleet.

Ender Saga 01. Ender's Game Orson Scott Card,2013 Child-hero Ender Wiggin must fight a desperate battle against a deadly alien race if mankind is to survive.

Moon People 2 Dale M. Courtney,2009-01-21 Moon People 2 This story is about the space Adventures of 1st Science Officer Captain David Braymer and his transition from the Lunar Base 1 base station to his new home the Powleens traded them called the Aurora,a spaceship that looks like a Moon also known as Goddess of The Dawn it is 10 kilometers in diameter and with light speed capability. It's the size of a small city.It has everything a small city would have like two hospitals and restaurants and shopping malls all over the ship. Captain Braymer also has a romantic attachment to a young lady by the name of Lieutenant Heather Courtney who is an Officers Aid.They have a few out of the ordinary experiences that they do not forget any time soon. And our new friends the Powleens have advanced us centuries ahead of our time. They also traded us for five of their newest ships in their space fleet all with light speed capability with all of their weapons in tacked. They traded us for all kinds of their gadgetrÝs and even some of their food. That's what they do go all over the Galaxy looking for friends and ultimate knowledge and trade with everyone they can find.Commander Braymer also has a mission to do a genesis on Mars that turns out surprisingly good with a few added benefits. One of the benefits was discovering a lot of Martian people and animals in a Noah ark kind of setup that has been frozen for over 100,000 years in life support chambers. They were all brought back to life again. There were many discoveries' not to mention all of the futuristic weapons they find with aircraft all superior to anything at present by anyone. And nobody expected the Martians to have special mental powers like telekinetic and telekinesis and all sorts of mental telepathy

powers like mind transference and the power to levitate in the air. Well everything was going pretty smooth until Galactic war breaks out all over the universe and the final Battle happens in our solar system. It was Earth with the Powleen people and also the Martians against the snake looking people called the Arcons and their friends the Thracians who resemble dog like people with sharp claws. There were crashed ships all over our planets and their moons in our solar system. It was the Battle of all Battles. It decided the control of our Galaxy. If you think all of this sounds good wait till you read the book, its action packed from start to finish. I know you will enjoy Moon People Trilogy. It's some of my best work. And don't worry some day you just might see something that resembles Moon People 3 coming to your local Book store near you. Thank you and God Bless. Dale M. Courtney Author

Searching for Extraterrestrial Intelligence H. Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led, and continue to lead, the scientific quest known as SETI, the search for extraterrestrial intelligence. Divided into three parts, the first section, 'The Spirit of SETI Past', written by the surviving pioneers of this then emerging discipline, reviews the major projects undertaken during the first 50 years of SETI science and the results of that research. In the second section, 'The Spirit of SETI Present', the present-day science and technology is discussed in detail, providing the technical background to contemporary SETI instruments, experiments, and analytical techniques, including the processing of the received signals to extract potential alien communications. In the third and final section, 'The Spirit of SETI Future', the book looks ahead to the possible directions that SETI will take in the next 50 years, addressing such important topics as interstellar message construction, the risks and assumptions of interstellar communications, when we might make contact, what aliens might look like and what is likely to happen in the aftermath of such a contact.

Wonders in the Sky Jacques Vallee,Chris Aubeck,2010-10-28 One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of Wonders in the Sky reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In Wonders in the Sky, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, Wonders in the Sky is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

Alien Oceans Kevin Hand,2021-09-21 Inside the epic quest to find life on the water-rich moons at the outer reaches of the solar system Where is the best place to find life beyond Earth? We often look to Mars as the most promising site in our solar system, but recent scientific missions have revealed that some of the most habitable real estate may actually lie farther away. Beneath the frozen crusts of several of the small, ice-covered moons of Jupiter and Saturn lurk vast oceans that may have existed for as long as Earth, and together may contain more than fifty times its total volume of liquid water. Could there be organisms living in their depths? Alien Oceans reveals the science behind the thrilling quest to find out. Kevin Peter Hand is one of today's leading NASA scientists, and his pioneering research has taken him on expeditions around the world. In this captivating account of scientific discovery, he brings together insights from planetary science, biology, and the adventures of scientists like himself to explain how we know that oceans exist within moons of the outer solar system, like Europa, Titan, and Enceladus. He shows how the exploration of Earth's oceans is informing our understanding of the potential habitability of these icy moons, and draws lessons from what we have learned about the origins of life on our own planet to consider how life could arise on these distant worlds. Alien Oceans describes what lies ahead in our search for life in our solar system and beyond, setting the stage for the transformative discoveries that may await us.

American Cosmic D.W. Pasulka,2019-01-18 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. American Cosmic examines the mechanisms at work behind the thriving

belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like The X-Files, which can influence memory, and the believability lent to that media by the search for planets that might support life. American Cosmic explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.
