Image Analysis and Processing Carlo Braccini,Leila DeFloriani,Gianni Vernazza,1995-08-30 This book presents the proceedings of the 8th International Conference on Image Analysis and Processing, ICIAP '95, held in Sanremo, Italy in September 1995 under the sponsorship of the International Association of Pattern Recognition IAPR. The volume presents 108 papers selected from more than 180 submissions together with six invited contributions. The papers are written by a total of 265 contributing authors and give a comprehensive state-of-the-art report on all current issues of image analysis and processing. Theoretical aspects are addressed as well as systems design and advanced applications, particularly in medical imaging.

20th Century Photographers Grace Schaub,2014-11-13 This book is a compilation of interviews and essays that cover a broad range of photographers and photographic disciplines. Each photographer profiled made a living by concentrating on a specific aspect of the craft, but in doing so transcended their livelihood to become recognized for more than the type of images they created. Each had a distinct style, creative approach, dedication to the craft, point of view about themselves and the world. These interviews were conducted during a seminal period in the shift from film to digital and from print reproduction to global distribution on the Internet. Just like their photographs continue to inspire today, now these pros’ words can live on as an invaluable reference for the photographers of the future. The truth and wisdom in this collection transcend time and technology.

Museums and Photography Elena Stylianou,Theopisti Stylianou-Lambert,2016-12-08 Museums and Photography combines a strong theoretical approach with international case studies to investigate the display of death in various types of museums–history, anthropology, art, ethnographic, and science museums – and to understand the changing role of photography in museums. Contributors explore the politics and poetics of displaying death, and more specifically, the role of photography in representing and interpreting this difficult topic. Working with nearly 20 researchers from different cultural backgrounds and disciplines, the editors critically engage the recent debate on the changing role of museums, exhibition meaning-making, and the nature of photography. They offer new ways for understanding representational practices in relation to contemporary visual culture. This book will appeal to researchers and museum professionals, inspiring new thinking about death and the role of photography in making sense of it.

Time, Narrative & the Fixed Image / Temps, narration & image fixe ,2021-10-18 This volume focuses on the relationship between time, narrative and the fixed image. As such, it highlights renewed interest in the temporality of the fixed image, probably one of the most important trends in the formal and semiotic analysis of visual media in the past decade. The various essays discuss paintings, the illustrated covers of books, comics or graphic novels, photo-stories, postcards, television and video art, as well as aesthetic practices that defy categorization such as Chris Marker’s masterpiece La Jetée. The range of works and practices examined is reflected in the different theoretical approaches and methods used, with an emphasis on semiology and narratology, and, to a lesser extent, aesthetics and psychoanalysis. The interest of this book, however, does not stem exclusively from the range and scope of the artefacts examined, or the methodological issues that are addressed; its fundamental importance rests in the contributors’ readiness to question the differentiation between fixed and moving images which all too often provides a convenient, if not altogether convincing, starting point for image analysis. . The originality and value of the contribution that Time, Narrative and the Fixed Image/Temps, Narration et image fixe makes to the body of theoretical writing on visual media lies in this challenging and comprehensive approach.
