La Folie des chats Claude Béata, 2022-10-12 Nous sommes nombreux à être fous de nos chats et cette passion peut être réciproque. Le chat est un être d'attachement. Il nous séduit, nous fascine, mais les relations avec lui peuvent se révéler parfois déconcertantes. Il nous invite à l'empathie et au respect de la différence. Doté d'un cerveau exceptionnel qui lui permet de s'adapter à toutes les situations, de savoir se protéger comme une proie ou bien d'établir des stratégies comme un prédateur, comment, alors, ne pas penser que le chat subtil et complexe puisse parfois sombrer dans la folie ? C'est à partir de sa propre expérience, de sa vie avec les chats, et des données les plus récentes de l'éthologie et de la psychiatrie animale que Claude Béata nous fait découvrir dans ce livre les secrets des comportements de cette espèce féline, tout en contradictions apparentes qui se comprennent au filtre de la connaissance. C'est aussi un message d'espoir et un appel à ne pas laisser cet animal, à la réputation parfois néfaste d'indépendance, en butte à des souffrances psychiques qui aujourd'hui connaissent une solution. Amateurs et amoureux des chats, mais aussi propriétaires parfois désarmés par des troubles qui paraissent insolubles ou incompréhensibles, vous trouverez ici les réponses à toutes vos questions. Comprendre son chat, ses forces, ses bizarreries, ses fragilités, pour mieux vivre avec lui et assurer son bien-être... et le vôtre ! Claude Béata est vétérinaire, spécialiste en médecine du comportement, diplômé du Collège européen. Praticien reconnu, il consacre son activité à tenter d'apaiser la souffrance des animaux, parmi lesquels, aujourd'hui, de nombreux chats. Il parcourt aussi la France et le monde pour accompagner l'essor de la psychiatrie vétérinaire. Il a notamment publié *La Psychologie du chien* et *Au risque d'aimer*, qui ont été des grands succès.

The Marking Enterprise Jean-Claude Thoenig, Charles Waldman, 2006-10-12 Based on their studies of successful firms, the authors highlight two main paths to success. As well as delivering a groundbreaking new analytical framework, they also provide practical advice to practitioners on avoiding pitfalls and taking decisions while elaborating their marking discipline.

The Cat in Art Stefano Zuffi, 2007-04 Almost from the beginning of art, humans have portrayed cats. The animal originally domesticated for the humble purpose of catching mice was already a goddess in ancient Egypt and a beloved household pet in ancient Rome. Throughout history, cats have been a beautiful vessel for symbolic meanings, ranging from dark unruly sensuality to perfect domestic tranquillity. In this book, cats inhabit 170 art masterpieces. Sometimes they are the stars of the work and sometimes they are working their magic from the corners of rooms (in which case both the whole work and a detail showing the cat are both illustrated). Here are paintings by Van Eyck, Raphael, Leonardo, Bruegel, Rembrandt, Chardin, Gainsborough, Manet, Renoir, Bonnard, Gauguin, Matisse, Balthus, Picasso, Warhol and many other famous artists. Stefano Zuffi's charming text tells us what it all means. The cats, meanwhile, are beautiful, seductive and mysterious.

The Neurobiology of Autism Margaret L. Bauman, Thomas L. Kemper, 2005 In the decade since the first edition of *The Neurobiology of Autism* was published, research has revealed valuable new information about the nature and origins of autism, including genetics and abnormalities in such neurotransmitters as acetylcholine and serotonin. For this long-anticipated new edition, neurologists Margaret L. Bauman and Thomas L. Kemper bring together leading researchers and clinicians to present the most current scientific knowledge and theories about autism. The contributors cover genetics, imaging studies, physiology, neuroanatomy and neurochemistry, immunology, brain function, the epidemiology of the disease, and related disorders. Thoroughly updated, *The Neurobiology of Autism* remains the best single-volume work on the wide array of research being conducted into the causes, characteristics, and treatment of autism. Ze French Do It Better Valérie de Saint-Pierre,Frédérique Veysset,2022-02-01 Eternally slim, natural beauties, with well-behaved children and perfect soufflés--how do the French do it? Steal all their tricks (without becoming a snob!) with this humorous lifestyle guide. In all areas--from fashion to cuisine to the art of seduction--the French reign supreme in their ability to enjoy life to the fullest. So why do we love to hate the French, yet still covet their singular joie de vivre? A duo of saavy authors breaks it down for readers by dividing the French populace into relatable tribes--each of which offer keys to a life well-lead. To demystify the French enigma, each chapter opens with a short quiz to help readers determine their level of kinship with that particular tribe: Classic Frog, AristoChic, Vintage Bourgeois, Modern Bourgeois, Intellectual, Feel-Good Bohemian, or Foodie. With tongue-in-cheek humor, the authors divulge the enviable Gallic secrets so that readers can integrate elements of an iconic French wardrobe, infallible recipes, life-enhancing rituals, cult products, and personal style tips into their daily routine. Offering insight with verve and wit, this book is replete with facts and practical tips for assimilating the best of what France has to offer. The volume is completed by a guide to the best addresses in France and online for quintessentially French inspiration.

Hybrid Communities Charles Stépanoff,Jean-Denis Vigne,2018-08-06 Domestication challenges our understanding of human-environment relationships because it blurs the dichotomy between what is artificial and what is natural. In domestication, biological evolution, environmental change, techniques and practices, anthropological trajectories and sociocultural choices are inextricably interconnected. Domestication is essentially a hybrid phenomenon that needs to be explored with hybrid scientific approaches. *Hybrid Communities: Biosocial Approaches to Domestication and Other Trans-species Relationships* attempts for the first time to explore domestication viewed from across disciplines both in its origins and as an ongoing process. This edited collection proposes new biosocial approaches and concepts which integrate the methods of social sciences, archaeology and biology to shed new light on domestication in diachrony and in synchrony. This book will be of great interest to all scholars working on human-environment relationships, and should also attract readers from the fields of social anthropology, archaeology, genetics, ecology, botany, zoology, history and philosophy.

Animals and Human Society Aubrey Manning,James Serpell,2002-11-01 Modern society is beginning to re-examine its whole relationship with

animals and the natural world. Until recently issues such as animal welfare and environmental protection were considered the domain of small, idealistic minorities. Now, these issues attract vast numbers of articulate supporters who collectively exercise considerable political muscle. Animals, both wild and domestic, form the primary focus of concern in this often acrimonious debate. Yet why do animals evoke such strong and contradictory emotions in people - and do our western attitudes have anything in common with those of other societies and cultures? Bringing together a range of contributions from distinguished experts in the field, *Animals and Society* explores the importance of animals in society from social, historical and cross-cultural perspectives.
