Pragmatic Internet of Everything (IOE) for Smart Cities: 360-Degree Perspective Satya Prakash Yadav,Sansar Singh Chauhan,Sanjeev Kumar Pippal,Victor Hugo C. De Albuquerque,2023-10-13 Pragmatic Internet of Everything (IOE) has emerged as a powerful paradigm for representing and solving complex problems. This reference demonstrates how to coordinate behaviour among a collection of semi-autonomous problem-solving agents: how they can coordinate their knowledge, goals and plans to act together, to solve joint problems, or to make individually or globally rational decisions in the face of uncertainty and multiple, conflicting perspectives. The book presents a collection of articles surveying several major recent developments in Pragmatic Internet of Everything (IOE). The book focuses on issues and challenges that arise in building IOE systems for smart cities in real-world settings. It also presents solutions to the issues faced by system architects. The synthesis of recent thinking, both theoretical and applied, on major IOE problems makes this essential reading for anyone involved in the design and planning of IOT systems for smart cities. Key Features - Summarizes available literature and practical ventures with reference - Merges different perspectives on IoT technology thereby giving a 360-degree perspective to the reader - Gives some tips for implementation of practical ventures in this space - Includes an analysis of information gathered from citizens of smart cities

Internet of Things Security and Data Protection Sébastien Ziegler,2019-03-19 This book provides an overview of the most recent developments in Internet of Things (IoT) security and data protection. It presents the results of several international research projects addressing this topic from complementary angles. It starts by analyzing the main privacy and security threats on IoT, as well as the evolution of data protection norms, such as the European General Data Protection Regulation (GDPR), and their impact on IoT. Through a comprehensive and systematic approach, the contributors present new perspectives on IoT & Cloud Computing security requirements. They discuss the most recent approach to support trusted IoT, including new models of privacy risk assessment, labeling and certification, and contractual tools (such as Privacy PACT). Practical implementations, such as in the European Large Scale Pilots on IoT for Smart Cities (Synchronicity), are presented, explaining how they address security, privacy and data protection. Finally, innovative models to secure IoT systems are presented for the network and end-nodes security, including network threats analysis.

Assistive Technologies in Smart Cities Alejandro Rafael Garcia Ramirez,Marcelo Gitirana Gomes Ferreira,2018-12-13 Cities are the places where the greatest technological advances will take place in the near future, and important efforts are being directed towards autonomy and independence for each and every citizen. However, these efforts are rarely coordinated or integrated among governments, citizens, and private firms. In this book, assistive technology solutions are approached considering the smart cities scenario. The book discusses how assistive technologies can be adapted to this new reality. In fact, several challenges arise, stimulating the evolution of current technologies, relying on ubiquitous sensing, big data, and anytime/anywhere access and control. The book presents research under development, not necessarily with consolidated results. Even though the idea of smart cities is still not a recognized concept in most countries, its relevance and application are spreading rapidly.

Mercosur Francisco Domínguez,2004 This collection of essays aims to contribute to our understanding of the process of regional integration currently underway in South America. Mercosur is a regional manifestation of a world-wide process of globalisation whose driving force is economic, but which is potentially much more than that. It involves a variety of political, social and cultural processes, some of them barely at an embryonic stage, though each advancing at its own rate of progress. Mercosur's neo-liberal matrix, however, has led to the economic decision-making process being taken outside the realm of politics, thus leaving large sections of the population with no mechanism to influence the integration process so that it addresses their urgent needs and demands.

Plastic Neurosurgery Ken Rose Winston,Lawrence L. Ketch,2023-09-23 This is the definitive text for the intersection of neurosurgery and plastic surgery, a crucial and undertreated subject. It is a comprehensive, stand-alone and topically organized book that provides a synthesis of information, experience and wisdom for practitioners of adult and pediatric neurosurgery, including all subspecialties. The first of the three parts of the book includes foundational information on normal and abnormal anatomy, wound healing and surgical details for the management of skin, fascia, muscle, bone and dura, important subjects which receive little attention in neurosurgical literature. The second part of the book consists of descriptions of the plastic components - i.e., the opening and closing for neurosurgical approaches. Neurosurgical approaches are presented in three groups: intracranial, spinal and exposure of peripheral nerves. The plastic neurosurgical concerns for each approach are emphasized, and each chapter includes citations of relevant sources. The third part of the book presents the plastic neurosurgery of cranial and craniofacial disorders and the role of neurosurgeons in these surgeries, which are often performed with plastic surgeons. All neurosurgeons, particularly in the formative years of their residencies and fellowships, should learn and never forget not only the what and how but also the why of the plastic components of neurosurgery. This text fills this important gap in the literature.
