The Golden Book of Dutch Navigators Hendrik Willem Van Loon,2006-05-01 The one permanent move for obtaining peace, which has not yet been suggested, with any reasonable chance of attaining its object, is by an agreement among the great powers, in which each should pledge itself not only to abide by the decisions of a common tribunal but to back with force the decisions of that common tribunal. The great civilized nations of the world which do possess force, actual or immediately potential, should combine by solemn agreement in a great World League for the Peace of Righteousness. -from World Peace Theodore Roosevelt was still a young man when he left the Oval Office, and he remained a vigorous force on the American scene. The great influence he continued to hold over the public allowed him to contest the policies of President Woodrow Wilson, particularly Wilson's conduct in the leadup to America's belated entry into World War I. In this 1915 work, Roosevelt lays out the moral and political case for coming to the aid of the nation's European allies, from the ethics of self-defense to the practicalities of preparing for war. Roosevelt's arguments are compelling and humane, but agree with him or not, here is an essential part of the powerful basis for his place in American history as the architect of the American Century, as well as a revealing picture of the character of one of the great American personalities. Also available from Cosimo Classics: Roosevelt's Letters to His Children, A Book-Lover's Holidays in the Open, Through the Brazilian Wilderness and Papers on Natural History, Ranch Life and the Hunting Trail, The Strenuous Life: Essays and Addresses, and Historic Towns: New York OF INTEREST TO: Roosevelt fans, students of the American presidency, readers of World War I Politician and soldier, naturalist and historian, American icon THEODORE ROOSEVELT (1858-1919) was 26th President of the United States, serving from 1901 to 1909, and the first American to win a Nobel Prize, in 1906, when he was awarded the Peace Prize for mediating the Russo-Japanese War. He is the author of 35 books.

Pieter Saenredam, The Utrecht Work Liesbeth M. Helmus,2002-01-01 Pieter Saenredam (1597–1665) was one of the magical painters of 17th-century Holland, a time known as the Golden Age of Dutch Art. He spent his career immortalizing the churches of Holland in drawings and paintings. Working through a series of perspective drawings to the finished painting, he made innumerable fine adjustments to architectural details to create what may be justly called spaces of wondrous perfection of proportion and luminosity. Pieter Saenredam, The Utrecht Work is published to coincide with an exhibition of Saenredam's drawings and paintings, originally held at the Centraal Museum, Utrecht, and on view from April 16 through July 7, 2002 at the Getty Museum. This elegant volume brings together more than sixty drawings and paintings depicting the beautiful and historically venerable churches of the Dutch city of Utrecht.

History of Military Cartography Elri Liebenberg,Imre Josef Demhardt,Soetkin Vervust,2016-01-28 This volume gathers 19 papers first presented at the 5th International Symposium of the ICA Commission on the History of Cartography, which took place at the University of Ghent, Belgium on 2-5 December 2014. The overall conference theme was 'Cartography in Times of War and Peace', but preference was given to papers dealing with the military cartography of the First World War (1914-1918). The papers are classified by period and regional sub-theme, i.e. Military Cartography from the 18th to the 20th century; WW I Cartography in Belgium, Central Europe, etc.

European Drawings 2 George R. Goldner,Lee Hendrix,Kelly Pask,1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Abraham Ortelius and the First Atlas M. P. R. van den Broecke,P. C. J. van der Krogt,Peter H. Meurer,1998 With an introduction by Leon Voet, and with 20 contributions by Günter Schilder, Rodney Shirley, Dennis Reinhartz, H.A.M. van der Heijden, Marijke Spies and others.

The Orient in Utrecht: Adriaan Reland (1676-1718), Arabist, Cartographer, Antiquarian and Scholar of Comparative Religion Bart Jaski,Christian Lange,Anna Pytlowany,Henk J. van Rinsum,2021-07-05 Adriaan Reland (1676-1718), Arabist, Cartographer, Antiquarian and Scholar of Comparative Religion covers the intellectual achievements of a remarkable man: Adriaan Reland, professor of Oriental languages (1701) and Hebrew Antiquities (1713) at the University of Utrecht from 1701 to 1718. Although he never travelled beyond the borders of his home country, he had an astonishingly broad worldview. The contributions in this volume illuminate Reland's many accomplishments and follow his scholarly trajectory as an Orientalist, a linguist, a cartographer, a poet, and a historian of comparative religions. Reland, although a devout Protestant, believed that religions should be examined objectively on their own terms with the help of reliable and authentic documents, which would dispel the prejudices of the past. Contributors: Lot Brouwer, Ulrich Groetsch,Toon van Hal, Jason Harris, Bart Jaski, Christian Lange, Richard van Leeuwen, Remke Kruk, Anna Pytlowany, Henk J. van Rinsum, Dirk Sacré, Arnoud Vrolijk, Tobias Winnerling and Jan Just Witkam

Vauban and the French Military Under Louis XIV Jean-Denis G.G. Lepage,2009-12-21 A man of inventiveness, versatility and reformist ideas, Marshal Sébastien Le Preste de Vauban built a formidable ring of fortresses to protect France's national frontiers. More than just a fortification designer, Vauban was also a gifted economist, author, and political strategist. This book tells the complete story of Vauban's exceptional career, placing him within the framework of Louis XIV's reign and revealing his lasting influences in France and other nations. With the aid of numerous detailed drawings, 17th century bastioned fortification, artillery, and siege warfare are described in detail. Vauban's fortifications that are still standing today are particularly highlighted.

5000 Years of Geometry Christoph J. Scriba,Peter Schreiber,2015-04-22 The present volume provides a fascinating overview of geometrical ideas and perceptions from the earliest cultures to the mathematical and artistic concepts of the 20th century. It is the English translation of the 3rd edition of the well-received German book "5000 Jahre Geometrie," in which geometry is presented as a chain of developments in cultural history and their interaction with architecture, the visual arts, philosophy, science and engineering. Geometry originated in the ancient cultures along the Indus and Nile Rivers and in Mesopotamia, experiencing its first "Golden Age" in Ancient Greece. Inspired by the Greek mathematics, a new germ of geometry blossomed in the Islamic civilizations. Through the Oriental influence on Spain, this knowledge later spread to Western Europe. Here, as part of the medieval Quadrivium, the understanding of geometry was deepened, leading to a revival during the Renaissance. Together with parallel achievements in India, China, Japan and the ancient American cultures,

the European approaches formed the ideas and branches of geometry we know in the modern age: coordinate methods, analytical geometry, descriptive and projective geometry in the 17th an 18th centuries, axiom systems, geometry as a theory with multiple structures and geometry in computer sciences in the 19th and 20th centuries. Each chapter of the book starts with a table of key historical and cultural dates and ends with a summary of essential contents of geometr y in the respective era. Compelling examples invite the reader to further explore the problems of geometry in ancient and modern times. The book will appeal to mathematicians interested in Geometry and to all readers with an interest in cultural history. From letters to the authors for the German language edition I hope it gets a translation, as there is no comparable work. Prof. J. Grattan-Guinness (Middlesex University London) Five Thousand Years of Geometry - I think it is the most handsome book I have ever seen from Springer and the inclusion of so many color plates really improves its appearance dramatically! Prof. J.W. Dauben (City University of New York) An excellent book in every respect. The authors have successfully combined the history of geometry with the general development of culture and history. ... The graphic design is also excellent. Prof. Z. Nádenik (Czech Technical University in Prague)

New Curriculum History ,2019-02-11 Rereading the historical record indicates that it is no longer so easy to argue that history is simply prior to its forms. Since the mid-1990s a new wave of research has formed around wider debates in the humanities and social sciences, such as decentering the subject, new analytics of power, reconsideration of one-dimensional time and three-dimensional space, attention to beyond-archival sources, alterity, Otherness, the invisible, and more. In addition, broader and contradictory impulses around the question of the nation - transnational, post-national, proto-national, and neo-national movements—have unearthed a new series of problematics and focused scholarly attention on traveling discourses, national imaginaries, and less formal processes of socialization, bonding, and subjectification. New Curriculum History challenges prior occlusions in the field, building upon and departing from previous waves of scholarship, extending the focus beyond the insularity of public schooling, the traditional framework of the self-contained nation-state, and the psychology of the schooled individual. Drawing on global studies, historical sociology, postcolonial studies, critical race theory, visual culture theory, disability studies, psychoanalytics, Cambridge school structuralisms, poststructuralisms, and infra- and transnational approaches the volume holds together not despite but because of differences and incommensurabilities in rereading historical records.

Merchants, Missionaries & Migrants Ineke van Kessel,2002 In November 1701, David van Nyendael, an envoy of the Dutch West India Company (WIC) was the first European to visit the royal court in Kumasi, capital of the emerging Ashanti empire in the hinterland of the Gold Coast. Three hundred years of Dutch-Ghanaian relations have passed since then. Merchants, missionaries and migrants focuses on various aspects of this long-standing and intricate economic, political and cultural relationship between the Ghanaians and the Dutch.
