Comeback Kids: Three Animals Who Overcame the Impossible

(*The Dodo*) Aubre Andrus, 2022-03-01 These adorable little animals -- as seen in *The Dodo's* viral videos -- have the BIGGEST personalities! Angel the miniature zebu calf couldn't even stand months after she was born. Potato, an especially tiny Munchkin cat, was born with a body that was too small. And Bueller, a bulldog puppy, had weak legs that made it too hard for him to walk. What do these three animals have in common? They all overcame the impossible. Luckily, Angel, Potato, and Bueller all had the help of supportive humans to help them beat the odds -- from vets and foster parents to their very own forever homes! These three inspiring true stories show that with a little love and kindness -- and a lot of hard work -- we can get through anything together. Each short story in this collection is the perfect length for middle-grade readers. This book also includes a 16-page full-color insert, featuring photos of all three animals. Angel, Potato, and Bueller's stories have been featured on *The Dodo*, one of social media's most popular animal brands, with over 33 million followers! Their inspiring stories are the perfect example of just how far an animal can go when they have the love of a supportive human by

their side.

Animals That Are Pets Lisa Benjamin,2020-05-01 Why do we have animals in our homes? You know about dogs and cats. But why might you choose a pig as a pet? How about a snake? The answer is “traits.” Learn about traits and why they matter. Learn all about animals that live with us! Animals That Are Pets is part of the It’s All Animals series. This high-interest series uses fascinating facts about animals to introduce life-science vocabulary and concepts, including traits, inheritance, and the survival value of animal behaviors. Read-UP! with 3 levels of readability. Each level (set of 5 books) contains a book on a different life science subject so a student can keep reading in one content area if he or she prefers.

All About Animals! Hannah Eliot,2018-05-01 Learn all about your favorite animals with this nonfiction lift-the-flap board book! Did you know that bees have eyes but they don’t have ears? Veterinary Medicine – E-BOOK Peter D. Constable,Kenneth W

Hinchcliff, Stanley H. Done, Walter Gruenberg, 2016-10-25 Treat the diseases affecting large animals! Veterinary Medicine, 11th Edition provides up-to-date information on the diseases of horses, cattle, sheep, goats, and pigs. Comprehensive coverage includes the principles of clinical examination and making a diagnosis, along with specific therapy recommendations. For easier use, this edition has been divided into two volumes and restructured into a logical, anatomically based approach to disease. From internationally known veterinary experts Peter Constable, Kenneth Hinchcliff, Stanley Done, and Walter Grünberg, this book is the definitive, one-stop reference for farm animal and equine care.

Comprehensive coverage includes information essential to any large-animal veterinarian, especially those working with horses, cattle, sheep, goats, or pigs. Coverage of diseases addresses major large-animal diseases of all countries, including foreign animal and emerging diseases. User-friendly format makes it easier to quickly absorb key information. Quick review/synopsis sections make important information on complex diseases easy to find.

NEW! Convenient, easy-access format is organized by organ systems, and divides the content into two compact volumes with the same authoritative coverage. Nearly 200 new color

photographs and line drawings are included in this edition. NEW full-color design improves navigation, clarifies subject headings, and includes more boxes, tables, and charts for faster reference. New Diseases Primarily Affecting the Reproductive System chapter is added. Updated and expanded chapter on pharmacotherapy lists therapeutic interventions and offers treatment boxes and principles of antibiotic use. Expanded sections on herd health include biosecurity and infection control, and valuable Strength of Evidence boxes. NEW or extensively revised sections include topics such as the Schmallenberg and Bluetongue viral epidemics of ruminants in Europe, Wesselbron disease in cattle, hypokalemia in adult cattle, equine multinodular pulmonary fibrosis, Hendra virus infection, porcine reproductive and respiratory syndrome, torque teno virus, and numerous recently identified congenital and inherited disorders of large animals. Additional content is provided on lameness in cattle and the diseases of cervids.

Animal Cruelty Investigations Linda Fielder, Emily Lewis, Kris Otteman, 2022-02-02 *Animal Cruelty Investigations: A Collaborative Approach from Victim to Verdict* provides a framework for the experts who respond to animal cruelty cases: veterinarians, law enforcement agencies, animal care and control organizations, and

prosecutors. This book is a practical guide which provides insight and direction for every phase of an animal cruelty investigation. The step-by-step guidance on responding to particular issues and challenges related to animal cruelty cases is bolstered by the extensive library of checklists, form templates, specific case protocols, and lists of available resources. This book is designed to empower readers to respond to animal cruelty cases confidently and effectively by: Introducing veterinarians to their critical role in animal cruelty investigations including forensic examination and necropsy, crime scene response, report writing, and testimony. Included are detailed Specific Case Protocols for common animal cruelty scenarios. Helping animal shelters navigate the challenges of holding animals in protective custody, housing unusual species, and placing evidence animals in foster care. Offering law enforcement agencies useful methods for investigating animal cruelty such as search and seizure protocols, witness interview techniques, and valuable forms and templates necessary to strengthen and ensure proper search warrant execution, evidence collection and handling, and chain of custody; all with a focus on animals as both victims and evidence. Guiding prosecutors through the steps necessary to utilize the veterinarian's findings during trial

and providing insight into issues to be considered when reviewing search warrants, filing charges, proposing plea agreements, or filing pre-conviction forfeiture motions. This book is a must-have reference and guide for veterinarians, technicians, law enforcement officers, prosecutors, and all those involved in the protection of animals' health and wellbeing. The successful investigation of animal crimes relies on each of these disciplines, not only carrying out their professional duties, but having a collective understanding of what each other needs in order to meet that expectation.

That's Why We Don't Eat Animals Ruby Roth,2009-05-26

That's Why We Don't Eat Animals uses colorful artwork and lively text to introduce vegetarianism and veganism to early readers (ages six to ten). Written and illustrated by Ruby Roth, the book features an endearing animal cast of pigs, turkeys, cows, quail, turtles, and dolphins. These creatures are shown in both their natural state—rooting around, bonding, nuzzling, cuddling, grooming one another, and charming each other with their family instincts and rituals—and in the terrible conditions of the factory farm. The book also describes the negative effects eating meat has on the environment. A separate section entitled “What Else Can We Do?” suggests ways children can learn more about the vegetarian and

vegan lifestyles, such as: “Celebrate Thanksgiving with a vegan feast” or “Buy clothes, shoes, belts, and bags that are not made from leather or other animal skins or fur.” This compassionate, informative book offers both an entertaining read and a resource to inspire parents and children to talk about a timely, increasingly important subject. If All the Animals Came Inside Eric Pinder, 2012-04-17 The walls would tremble. The dishes would break. Oh, what a terrible mess we would make! If all the animals came inside, bears would run down the stairs, kangaroos would bounce on the couch, and hippos would play hide-and-seek through the halls! Join one family's wild romp as animals of all shapes and sizes burst through the front door and make themselves right at home. Extraordinary collage artwork from beloved illustrator Marc Brown (Arthur series)

pairs with Eric Pinder's hilarious rhyming verse to make this the perfect book to read aloud again and again.

Chinchilla Facts

Many animal babies are born with all their fur, or complete with feathers, but the chinchilla kit is one of the few animals that is born with its eyes wide open. Even puppies are born with their eyes closed! Chinchillas cannot get their fur wet, so instead of bathing in water, chinchillas use

volcanic ash to clean their fur. This ash is found in the mountains where chinchillas live in the wild. When chinchillas are kept as pets, the chinchillas owner must purchase ash for the chinchilla to bathe in several times a week. Chinchillas have very special little hands that can grab and hold items in much the same way that a human grabs and holds items. Chinchillas are highly unique because they are one of the few species in the wild that are monogamous. This means that they choose a partner, and keep that same partner for life. While all chinchillas are small in size, especially compared to more common mammals like dogs and cats, the chinchilla's body size is interesting because unlike most other mammal groups, the chinchilla females are usually a bit larger than the males. This is seen more often in spiders, and even birds, but very rarely in mammals. Most wild chinchillas are grey or brown in color, while domestic (pet) chinchillas are the more colorful, with white, beige, and violet being common. Wild chinchillas in the Andes mountains rarely actually drink water because they eat a lot of fruits and succulent plants. Succulent plants are plants in the cactus family that hold a lot of water in them. The water inside the fruits and plants that the chinchilla eats gives them most of the water they need to live.

TIME for Kids Big Book of Why Editors of TIME For Kids
Magazine,2015-12-01

Why do we have eyebrows? What's a black hole and what happens if you fall into one? What's the fastest a human is capable of running? Why do wet fingers stick to metal in the freezer? Where is the deepest point on Earth?

Divided by subject area - humans, animals, environment/nature, technology, and space - and written in an upbeat manner, each answer is accompanied by either a photo or an illustration to show the reasons why. Of course, TIME for Kids goes beyond answering the question by dipping into the science or history to further explain the answer in an easy-to-follow, straightforward manner. This is a must-have book to satisfy the most curious of kids and provokes a great way to encourage interest and knowledge about a wide range of subjects, as well as to stimulate reading. Kids will be desperate to share what they've learned with their parents, teachers, and friends...and anyone else who will listen.

Vaccines for Veterinarians E-Book Ian R Tizard, 2019-11-19

Both a theoretical text and a practical handbook, *Vaccines for Veterinarians* is the first of its kind to bring the basic science of animal vaccination and the practical details of vaccine use together in one single volume. From the first chapter on the history of vaccination and the triumph of rinderpest eradication to the last chapter on the rapidly emerging field of cancer vaccines, this book offers a truly comprehensive grounding in established and emerging vaccines for both major and minor species. Specific topics include viral vectored vaccines, DNA-plasmid vaccines, RNA vaccines, reverse vaccinology, the complexities of adjuvant use, vaccine failures and adverse events, vaccine production and regulation, robotic vaccination machines, contraceptive and production-enhancing vaccines, and so much more. At a time when resistance to human vaccination is receiving much publicity, this evidence-based book is the ideal counter to ill-informed speculation – serving as a timely reminder that vaccination is essential for the control of infectious diseases in animals. Well-respected and experienced veterinary author, Ian Tizard, provides expert guidance on the topic of vaccinations and immunology in veterinary medicine. Expert Consult site offers an online version of the book,

making it easy to search the entire book electronically. The latest information on viral vectored vaccines keeps you up-to-date on the topic as well as the properties and relative advantages of currently used vectors in animal vaccines. Survey of vaccine responses covers the different mechanisms by which the immune system responds to different types of vaccines. Inclusion of the latest vaccine technologies discusses the advantages and disadvantages of DNA-plasmid vaccines, RNA vaccines, and more. Coverage of adverse events and hypersensitivities includes the best ways to treat them and report them. Coverage of passive immunization discusses the growing use of therapeutic monoclonal antibodies in veterinary medicine. Coverage of immunotherapy includes recent improvements and new products in both active and passive immunotherapy against animal cancers.
