Red, White, and Drunk All Over Natalie MacLean, 2009-02-24 Award-winning writer Natalie MacLean sweeps readers behind the scenes of the international wine world, visiting its most evocative places and meeting its most charismatic personalities. *Red, White, and Drunk All Over* showcases the engaging wit, investigative curiosity, and sharp eye for obsessive passion that has made her free e-newsletter *Nat Decants* one of the most popular in North America. Natalie tastes sensuous pinot noir in the ancient cellars of Burgundy while discovering the mysterious tenets of biodynamic viticulture from such colourful characters as the tiny, ferocious Lalou Bize-Leroy, part-owner of France's acclaimed *Domaine de la Romanée-Conti*. She pulls on sturdy boots to help with the grape harvest at California's Bonny Doon Vineyards—and gets to the root of the anti-establishment philosophy of owner Randall Grahm, notorious for his experimental wine techniques, love for unfashionable grapes, and fondness for naming his wines “Cardinal Zin,” “Heart Has its Rieslings,” and “Big House Red” (whose grapes are grown just down the road from one of California's state prisons). Natalie takes a job as undercover sommelier at a five-star French restaurant, spends a day helping customers

in a high-end New York wine shop, wades into a famous feud between Robert Parker and Jancis Robinson, two of the world's best-known critics and, back home, invites friends over for a casual wine tasting. Along the way she teaches us—painlessly and often hilariously—how to face a telephone directory-sized wine list without fear, what questions to ask to get exactly the wine you are looking, what those scores out of 100 really mean, and how properly to expectorate (it's best to start out in the shower!) This wine-soaked blend of Kitchen Confidential and Sideways is a fascinating tour from the grape to the glass that will drive readers to drink. And think. And laugh.

Tracking the Weretiger Patrick Newman, 2012-09-19
Drawing on dramatic accounts by European colonials, and on detailed studies by folklorists and anthropologists, this work explores intriguing age-old Asian beliefs and claims that man-eating tigers and little tigers, or leopards alike, were in various ways supernatural. It is a serious work based on extensive research, written in a lively style. Fundamental to the book is the evocation of a long-vanished world. When a man-eater struck in colonial times, people typically said it was a demon sent by a deity, or even the deity itself in animal form, punishing transgressors and being guided by its victims' angry spirits. Colonials typically dismissed this as superstitious nonsense but given traditional ideas about the close links between people, tigers and the spirit world, it is quite understandable. Other man-eaters were said to be shapeshifting black magicians. The result is a rich fund of tales from India and the Malay

world in particular, and while some people undoubtedly believed them, others took advantage of man-eaters to persecute minorities as the supposed true culprits. The book explores the prejudices behind these witch-hunts, and also considers Asian weretiger and wereleopard lore in a wider context, finding common features with the more familiar werewolves of medieval Europe in particular.

Oceanic Birds of the World Steve N. G.

Howell, Kirk Zufelt, 2019-08-20 A state-of-the-art photographic field guide to the world's oceanic birds Oceanic birds are among the most remarkable but least known of all birds, living at sea, far from the sight of most people. They offer unusual identification challenges—many species look similar and it can be difficult to get good views of fast-flying birds from a moving boat. The first field guide to the world's oceanic birds in more than two decades, this exciting and authoritative book draws on decades of firsthand experience on the open seas. It features clear text filled with original insights and new information and more than 2,200 carefully chosen color images that bring the ocean and its remarkable winged

inhabitants to life. Never before have oceanic birds been presented in such an accessible and comprehensive way. The introduction discusses the many recent developments in seabird taxonomy, which are incorporated into the species accounts, and these accounts are arranged into groups that aid field identification. Each group and species complex has an introductory overview of its identification challenges, illustrated with clear comparative photos. The text describes flight manner, plumage variation related to age and molt, seasonal occurrence patterns, migration routes, and many other features. The result is an indispensable guide for exploring birding's last great frontier. A comprehensive, authoritative, and accessible guide to oceanic birds Covers more than 270 species Includes more than 2,200 color photos with concise captions noting key features Features careful species comparisons, overviews of the latest taxonomy, tips on how to observe and ID birds at sea, and much more

The Wheels of Friend Eric Norland, 2020-04-23

This book is one mans attempt to make peace with a world that was on the brink of mutually agreed upon destruction. He chose a bicycle as his medium of expression and named it Friend. His intent was to go from California and head east until going to The Soviet Union. He wanted to meet Soviets and show others that they were alright. He made it as far as East Germany but was not allowed travel any farther east. From there the traveling cyclist heades for the Mediterranean and the Middle East. And then onward around the world. He ran out of money after one year of traveling. He traveled

across large continents like Australia and China and circumvented the Philippines, Taiwan, South Korea and Japan. In all he comes away with a world experience and a new way of looking at the planet.

Friends Like These Danny Wallace, 2009-09-02 Danny Wallace has friends. He has a wife and goes to brunch, and his new house has a couch with throw pillows. But as he nears 30, he can't help wondering about his best childhood friends, whose names he finds in a long-forgotten address book. Where are they now-and where, really, is he? Acting on an impulse we've all had at least once, he travels from London to Berlin, Tokyo, Australia, and California, risking rejection and ridicule to show up on his old pals' doorsteps.

Memories of his 1980s childhood—from Michael Jackson to Ghostbusters—overwhelm him as he meets former buddies who have blossomed into rappers and ninjas, time-traveling pioneers, mediocre restaurant managers, and even Fijian royalty. Danny's attempt to re-befriend them all gives remarkable new resonance to the age-old mantra, friends forever!

Watching Earth from Space Pat Norris, 2010-11-15
Our planet is constantly monitored by hundreds of space-borne instruments. This book describes the technology of those instruments and the sciences that provide useful information from them. It also discusses the political implications of space-borne monitoring. From the moment satellites were launched into orbit their ability to see what was happening on a global scale was appreciated – and feared. This well researched book strives to answer such diverse questions as: Are satellites really a threat to individual privacy? How bad, really, is climate change and global warming? Why can't we find Osama bin Laden? Does the world have enough fresh water? The military side of the story is linked to the big security issues that we face, such as terrorism and civil wars. The civilian side of the story involves numerous successful collaborations in weather forecasting, navigation, communications, and other such peaceful uses of satellite surveillance. How the world handles the knowledge gained from these Earth watchers will be critical in the years to come, and Norris skillfully leads us through the issues and possible paths we can take.

Stolen Masterpiece Tracker Thomas McShane, 2006
Legendary FBI undercover agent Thomas McShane is one of the world's foremost authorities on the billion-dollar art theft business, and here he presents a unique memoir that provides a thrilling ride through the underworld of stolen art and historical artifacts. His expertise and indefatigable determination prompted FBI Director William H. Webster to name McShane as the Senior Investigator of the FBI's expanding Art Squad.

Blood of the Tiger J. A. Mills, 2015-01-06
Blood of the Tiger takes readers on a wild ride to save one of the world's rarest animals from a band of Chinese billionaires. Many people think wild tigers are on the road to recovery, but they are in greater danger than ever—from a menace few experts saw coming. There may be only three thousand wild tigers left in the entire world. More shocking is the fact that twice that many—some six thousand—have been bred on farms, not for traditional medicine but to supply a luxury-goods industry that secretly sells tiger-bone wine, tiger-skin décor, and exotic cuisine enjoyed by China's elite. Two decades ago,

international wildlife investigator J. A. Mills went undercover to expose bear farming in China and discovered the plot to turn tigers into nothing more than livestock. Thus begins the story of a personal crusade in which Mills mobilizes international forces to awaken the world to a conspiracy so pervasive that it threatens every last tiger in the wild. In this memoir of triumph, heartbreak, and geopolitical intrigue, Mills and a host of heroic comrades try to thwart a Chinese cadre's plan to launch billion-dollar industries banking on the extinction of not just wild tigers but also elephants and rhinos. Her journey takes her across Asia, into the jungles of India and Nepal, to Russia and Africa, traveling by means from elephant back to presidential motorcade, in the company of man-eaters, movie stars, and world leaders. She finds reason for hope in the increasing number of Chinese who do not want the blood of the last wild tigers to stain their beloved culture and motherland. Set against the backdrop of China's ascendance to world dominance, *Blood of the Tiger* tells of a global fight to rein in the forces of greed on behalf of one of the world's most treasured and endangered animals. From the Hardcover edition.

The Gemini Room Christopher Gordon, 2013-02-27
Nineteenth Century British archaeologist Sir Austin Henry Layard discovers twenty-five thousand clay tablets buried deep in an ancient Sumerian Library. After years of tedious study of the tablets, Sir Henry begins to pen a journal, evidencing Man's birthplace and manipulation by a ruling class of Blue Bloods. Today in the midst of

a deadly H1N2 outbreak, twelve elite Financiers hold a Summit in Western Europe, headed by the Marquis de Illuminati. Their secret agenda for a microchipped population takes shape until the World Bank refuses to back the loans needed for the human implantation process. When Doc Mitchell, Senior Intelligence Officer with the National Security Agency, learns of the Illuminati's agenda, he assigns Guy Fox, a mind controlled assassin, to eliminate key players at the Summit. Doc knows this mission will implicate the President of the United States (his close friend and Masonic Brother) in a vast criminal conspiracy involving top politicians and investors. At the same time, Guy Fox fights for freewill, the truth about his past and his own life when he becomes the target of the Illuminati's madness. His world unfolds into the vast global conspiracy reaching back to ancient Sumeria. Meanwhile, millions are dying daily from the flu outbreak and something must be done.

When China Sneezes Cynthia McKinney, 2020-11-30
The 2019 novel Corona Virus, now COVID-19, stole global headlines in the opening months of 2020, and its many impacts are still to play out. The common adage, "If the US sneezes, the world catches a cold" is now demonstrable in a multiplicity of ways, but it is China that has sneezed. This anthology provides insight into the nature of global pandemics such as SARS, MERS, Ebola and HIV/AIDs, then focuses on Wuhan, where COVID-19 broke out -- though patient zero is as yet unknown. It examines the massive effort that China has undertaken since the outbreak to contain

its spread, and includes personal stories of the first lockdown experiences. But the impact may be even more grave on the global economy than it is on global health. National and international analysts address the economic impact both within China's industrial heartland and on global business, as borders close, entire regions are on lockdown, world airlines cancel flights, major US corporations in China shut their doors, factory floors empty. and global supply chains break down, millions lose their jobs and small businesses tank.. Stocks and the prices of gold and oil are impacted. Soon after the COVID-19 outbreak was announced and the extraordinary quarantine response by China was effected, it was learned that Event 201, a global coronavirus pandemic simulation was held just months earlier, in which a global coronavirus pandemic killed 65 million people. Many questions arise concerning BIG Pharma's push for vaccines, and the mainstream dismissal of the possibility of alternative treatments such as HCQ. Other disturbing questions have arisen: Has the disruption been overblown to inflict damage on China as part of a trade war? On the United States, which faces massive damage to its economy in the midst of an increasingly bitter political divide? What are the biowarfare implications –in the Wuhan instance, where China's first BSL-4 level laboratory is situated, or in the future in general, given the spread of BSL-4 level laboratories worldwide and most extensively the US, as states and private entities conduct research into germ warfare, including the use of bat-generated viruses, for both offensive and

defensive purposes, putting the entire world at risk of accidental leakage or worse? Is this truly a pandemic -- or is it a plandemic, and if so, to what end? What are the likely consequences, intended and not.
