So keep every one of your cards and get started for the next Holiday season, because 40 million recycled cards save 13 600 trees! Reuse, remake, repurpose, reduce, recycle and rethink!

Early in the history of the Walt Disney Studios, annual Christmas themed greeting cards were created, their designs and illustrations by such legendary Disney Studio artists as Tom Wood, Hank Porter, Bob Moore, Mary Blair, John Hench, and Paul Wenzel. Over eight decades, the artists also fashioned annual seasonal art for merchandise and advertisements, and in support of motion pictures, television programs, and the Disney Parks and Resorts. From All of Us to All of You: The Disney Christmas Card features beloved characters and moments from these rarely seen and seldom-published examples of vintage Disney imagery. Gift-wrapped and sparkling in the spirit of the season, this one-of-a-kind collection of familiar, festive, fun, and feeling holiday art shines a light on a remarkable body of work and the people who created it, all while celebrating that most wonderful time of the year.

As he puts his heart and soul into designing the card, he fills it with warmth, love, and the spirit of Christmas. Little does he know that this simple card will have a profound impact on the lives of several individuals. The card finds its way to a cozy little village where it is purchased by the kind-hearted Miss Delia, who immediately falls in love with its beautiful design. Upon receiving the card, she decides to send it to her friend, the wealthy Mrs. Wheeler, who lives in a grand mansion in the city. When the card arrives at Mrs. Wheeler's home, it catches the eye of the lonely and reclusive Mr. Austin, a boarder in the house. Intrigued by its charm, he secretly borrows the card to admire it in solitude. As he gazes at the card, memories of happier times flood his heart, and he begins to rediscover the joy and warmth of

the Christmas season. Meanwhile, back in the village, Miss Delia's brother, Donald, a struggling artist, comes across a duplicate of the Christmas card in a shop. Inspired by its beauty and meaning, he decides to create his own version of the card and sends it to his sweetheart, Rosamond. The card becomes a symbol of their love and dreams for a bright future together. As the Christmas card continues its journey, it touches the lives of many more people, spreading love, hope, and joy wherever it goes. From bringing comfort to a grieving widow to rekindling the spirit of Christmas in a lonely heart, the card's magic weaves through each person's life, making this holiday season truly special for everyone involved. The Great Creation Debate Brad Freckleton,2012-07 Why isn't the evolution of flight shown in the fossil record? Bugs, birds, bats and dinosaurs flew and are shown fully formed in the fossil record, but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals. What is desperately wrong with the Grand Canyon if evolution is true? Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time? Why does massive erosion only show up at the top? Animals with well-developed eyes show up suddenly in the fossil record as do flying animals. It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today. The second law of thermodynamics is a law of science that says everything left to its own will wear out, run down. It is a fundamental law of science. So how did evolution accidentally go up? How could a DNA molecule fumble together? The cell needs DNA; DNA needs the cell ñ which came first? 'Beneficial' mutations also weaken in other areas, and don't write evolutionary advancing DNA code. Spiral galaxies (which have the shape of a star fish that is spinning quickly) throughout our universe, like our Milky Way galaxy, are supposed to be over 10 billion years old. If they were over a billion years old they would lose their spiral arm shape. The arms of our galaxy, the Milky Way, only show a maximum age of 0.3 billion years. People want to know why they're here now and where they're going to go. They want surety of truth also. Read this book and see how well evolution holds up in all the sciences. Read this book and see if life can have meaning, direction and hope ñ with surety. For those who claim to be open minded, put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems!

Creating an online community of action researchers Josef Huber,Branko Bognar,Pascale Mompont-Gaillard,2017-01-01 A community of practice of the professionals of the education around the values and the principles of the Council of Europe. The Council of Europe's Pestalozzi Programme promotes the message of the Organisation and its values – human rights, democracy and the rule of law – in the practice of education (formal, non-formal and informal) and aims to support member states in including these ideals in their education systems. Basing its approach to professional development firmly on social constructivism and social constructionism, it invests in educators who create new practices. This book represents an example of a transformational enterprise in which several practitioners from different parts of Europe gather in the Pestalozzi Programme community of practice and set out to learn how to become action researchers. While many books focus on how to carry this out, this publication is action research in action. In addition, it features examples of how participants can use online social platforms and affordable web applications in their collaboration and learning practices.
