World War II Sea War, Vol 7: The Allies Strike Back Donald A Bertke, Gordon Smith, Don Kindell, 2014-12-23 From September through November 1942, the Allies defeated the Axis forces on all active fronts. On land, the British defeated Rommel in Operation SUPERCHARGE, the US Marines defeated the Japanese on Guadalcanal, and the Russians trapped the German Sixth Army at Stalingrad and disrupted the entire Axis southern front in Russia. At sea, the Royal Navy landed desperately needed supplies on Malta in Operations PEDESTAL and STONEAGE; the USN defended the US Marines on Guadalcanal from a Japanese attack in the Battle of Cape Esperance; the Allies landed troops at Morocco and Algeria in Operation TORCH; USN cruisers sank a Japanese battleship in the 1st Battle of Savo Island; the 2nd Battle of Savo Island was the only battleship-to-battleship engagement of the war in the Pacific; the Battle of the North Atlantic increased in intensity; and the Germans tried to capture the French Fleet at Toulon, France, in Operation ANTON, only to arrive as the ships sank beneath the sea.

The Allies Strike Back, 1941-1943 James Holland, 2017-10-03 Volume two in this "expert, anecdote-filled, thoroughly entertaining" history of WWII follows The Rise of Germany as the Allied forces turn the tides (Kirkus). James Holland's The Rise of Germany, the first volume in his War in the West trilogy, was widely praised for his impeccable research and lively narrative. Covering the dawn of World War II, it ended at a point when the Nazi war machine appeared to be unstoppable. Germany had taken Poland and France with shocking speed. London was bombed, and U-boats harried shipping on the Atlantic. But Germany hadn't actually won the Battle of Britain or the Battle of the Atlantic. It was not producing airplanes or submarines fast enough. And what looked like victory in Greece and Crete had expended crucial resources in short supply. The Allies Strike Back continues the narrative as Germany's invasion of Russia unfolds in the east, while in the west, the Americans formally enter the war. In North Africa, following major setbacks at the hands of Rommel, the Allies storm to victory. Meanwhile, the bombing of Germany escalates, aiming to not only destroy the its military, industrial, and economic system, but also relentlessly crush civilian morale. Comprehensive and impeccably researched, "Holland brings a fresh eye to the ebb and flow of the conflict" in this "majestic saga" of 20th century history (Literary Review, UK).

Desert Raiders Andrea Molinari, 2013-02-20 Although harsh and inhospitable, the North African theatre of World War II proved to be a perfect environment for irregular warfare and the deployment of Special Forces. Following Italy's entry into the war in June 1940, the Western Desert became the background for a long conflict dominated by motorized units. The major combatants Great Britain, Free France, Italy and Germany all developed irregular units to exploit the unique conditions of the region with varying degrees of success. This book details the genesis, organization and tactics of these forces, including such famous units as the Long Range Desert Group and the Special Air Service.

Interoperability of U.S. and NATO Allied Air Forces Eric Victor Larson,2003 The United States conducts air operations with other willing NATO allies, including non-NATO members. The objective of this background research for a larger RAND study, *Interoperability: A Continuing Challenge in Coalition Air Operations*, is twofold: (1) to help the U.S. Air Force identify potential interoperability problems that may arise in coalition air operations involving the United States and its NATO allies, as well as non-NATO countries, over the next decade and (2) to suggest solution directions to mitigate those problems. The study focus is on command, control, communications, intelligence, surveillance, and reconnaissance (C3ISR) systems and out-of-NATO-area operations. The authors present a data-based historical overview of the U.S. experience in coalition operations with NATO allies up to 1999 and seek to provide a deeper understanding of interoperability through the answers to several key questions: For what missions is interoperability required? With which NATO allies is interoperability required? For what capabilities and services is interoperability required? Detailed case-study analyses of coalition operations in Southwest Asia, Bosnia, Somalia, and Rwanda identify key interoperability challenges and workarounds (short-term solutions) at the strategic, operational, tactical, and technological levels, and provide relevant lessons for meeting these challenges and improving the interoperability of U.S. and NATO air and C3ISR capabilities.

Fighting Rommel Kaushik Roy,2019-09-10 *Fighting Rommel* examines how and why some armies innovate under pressure while others do not. Focusing on the learning culture of the British Imperial Forces, it looks at the Allied campaign during the Second World War against the Afrika Korps of Rommel. The volume highlights the hitherto unexplored yet key role of the British Indian Army, the largest volunteer force in the world. It also introduces 'learning culture' as a heuristic device. Further, it goes on to analyze military innovation on the battlefield, in victory and defeat. A major intervention in the study of the Second World War, this book will be indispensable to scholars and researchers of military history, especially British and German, battlefield history, and defence and strategic studies.
