Air Commandos Against Japan William T. Y'Blood, 2008 1943, General Henry H. Hap Arnold, the commanding general of U.S. Army Air Forces, wanted to demonstrate that Allied forces could use ships in the air (just like the Navy used ships on the sea) to stage an aerial invasion of Burma. *Air Commandos against Japan* tells the story of how within a few short months these daring aviators trained and equipped an entirely new kind of organization, moved it to India, established bases, and then led it into combat in support of an eccentric and combative British officer named Orde C. Wingate. In Japanese-occupied Burma, where terrain made a textbook frontal assault on the Japanese impossible, the Air Commandos took an unorthodox approach to the fight, using unconventional hit-and-run tactics to confuse the enemy and to destroy their lines of communication and supply. This book describes how the unit successfully attacked the enemy from the air, resupplied British commandos on the ground, and airlifted the wounded out of the battle area - eventually driving the Japanese out of Burma.--BOOK JACKET.

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

A Concise History of the U.S. Air Force Stephen Lee McFarland, 1997 Except in a few instances, since World War II no American soldier or sailor has been attacked by enemy air power. Conversely, no enemy soldier or sailor has acted in combat without being attacked or at least threatened by American air power. Aviators have brought the air weapon to bear against enemies while denying them the same prerogative. This is the legacy of the U.S. Air Force, purchased at great cost in both human and material resources. More often than not, aerial pioneers had to fight technological ignorance, bureaucratic opposition, public apathy, and disagreement over purpose. Every step in the evolution of air power led into new and untrodden territory, driven by humanitarian impulses; by the search for higher, faster, and farther flight; or by the conviction that the air way was the best way. Warriors have always coveted the high ground. If technology permitted them to reach it, men, women and an air force held and exploited it-from Thomas Selfridge, first among so many who gave that last full measure of devotion; to Women's Airforce Service Pilot Ann Baumgartner, who broke social barriers to become the first American woman to pilot a jet; to Benjamin Davis, who broke racial barriers to become the first African American to command a flying group; to Chuck Yeager, a one-time non-commissioned flight officer who was the first to exceed the speed of sound; to John Levittow, who earned the Medal of Honor by throwing himself over a live flare to save his gunship crew; to John Warden, who began a revolution in air power thought and strategy that was put to spectacular use in the Gulf War. Industrialization has brought total war and air power has brought the means to overfly an enemy's defenses and attack its sources of power directly. Americans have perceived air power from the start as a more efficient means of

waging war and as a symbol of the nation's commitment to technology to master challenges, minimize casualties, and defeat adversaries.

The Second World War Antony Beevor,2012-06-05 A masterful and comprehensive chronicle of World War II, by internationally bestselling historian Antony Beevor. Over the past two decades, Antony Beevor has established himself as one of the world's premier historians of WWII. His multi-award winning books have included Stalingrad and The Fall of Berlin 1945. Now, in his newest and most ambitious book, he turns his focus to one of the bloodiest and most tragic events of the twentieth century, the Second World War. In this searing narrative that takes us from Hitler's invasion of Poland on September 1st, 1939 to V-J day on August 14, 1945 and the war's aftermath, Beevor describes the conflict and its global reach -- one that included every major power. The result is a dramatic and breathtaking single-volume history that provides a remarkably intimate account of the war that, more than any other, still commands attention and an audience. Thrillingly written and brilliantly researched, Beevor's grand and provocative account is destined to become the definitive work on this complex, tragic, and endlessly fascinating period in world history, and confirms once more that he is a military historian of the first rank.

Multi-Domain Battle in the Southwest Pacific Theater of World War II Combat Studies Institute Press,Christopher M Rein,2019-07-29 Multi-Domain Battle in the Southwest Pacific Theater of World War II provides a historical account of how US forces used synchronized operations in the air, maritime, information, and land domains to defeat the Japanese Empire. This work offers a historical case that illuminates current thinking about future campaigns in which coordination among all domains will be critical for success.

War in the Shallows John Darrell Sherwood,2015 War in the Shallows, published in 2015 by the Naval History and Heritage Command, is the authoritative account of the U.S. Navy's hard-fought battle along Vietnam's rivers and coastline from 1965-1968. At the height of the U.S. Navy's involvement in the Vietnam War, the Navy's coastal and riverine forces included more than 30,000 Sailors and over 350 patrol vessels ranging in size from riverboats to destroyers. These forces developed the most extensive maritime blockade in modern naval history and fought pitched battles against Viet Cong units in the Mekong Delta and elsewhere. War in the Shallows explores the operations of the Navy's three inshore task forces from 1965 to 1968. It also delves into other themes such as basing, technology, tactics, and command and control. Finally, using oral history interviews, it reconstructs deckplate life in South Vietnam, focusing in particular on combat waged by ordinary Sailors. Vietnam was the bloodiest war in recent naval history and War in the Shallows strives above all else to provide insight into the men who fought it and honor their service and sacrifice. Illustrated throughout with photographs and maps. Author John Darrell Sherwood has served as a historian with the Naval History and Heritage Command (NHHC) since 1997. -- Provided by publisher.

American Airpower Comes Of Age—General Henry H. “Hap” Arnold’s World War II Diaries Vol. II [Illustrated Edition] Gen. Henry H. “Hap.” Arnold,2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. “Hap.” Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold’s travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold’s final seven journeys and the diaries he kept therein.

Sierra Hotel : flying Air Force fighters in the decade after Vietnam ,2001 In February 1999, only a few weeks before the U.S. Air Force spearheaded NATO's Allied Force air campaign against Serbia, Col. C.R. Anderegg, USAF (Ret.), visited the commander of the U.S. Air Forces in Europe. Colonel Anderegg had known Gen. John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier. From the vantage point of 1999, they looked back to the day in February 1970, when they first controlled a laser-guided bomb strike. In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War. Always central in Anderegg's account of those changes are the people who made them. This is a very personal book by an officer who participated in the transformation he describes so vividly. Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base (AFB), Nevada, where he served two tours as an instructor pilot specializing in guided munitions.

Sicily and the Surrender of Italy Lieutenant Albert Garland,Howard Smyth,2015-07-16 (Includes maps) This volume, the second to be published in the Mediterranean Theater of Operations subseries, takes up where George F. Howe's Northwest Africa: Seizing the Initiative in the West left off. It integrates the Sicilian Campaign with the complicated negotiations involved in the surrender of Italy. The Sicilian Campaign was as complex as the negotiations, and is equally instructive. On the Allied side it included American, British, and Canadian soldiers as well as some Tabors of Goums; major segments of the U.S. Army Air Forces and of the Royal Air Force; and substantial contingents of the U.S. Navy and the Royal Navy. Opposing the Allies were ground troops and air forces of Italy and Germany, and the Italian Navy. The fighting included a wide variety of operations: the largest amphibious assault of World War II; parachute jumps and air landings; extended overland marches; tank battles; precise and remarkably successful naval gunfire support of troops on shore; agonizing struggles for ridge tops; and extensive and skillful artillery support. Sicily was a testing ground for the U.S. soldier, fighting beside the more experienced troops of the British Eighth Army, and there the American soldier showed what he could do. The negotiations involved in Italy's surrender were rivaled in complexity and delicacy only by those leading up to the Korean armistice. The relationship of tactical to diplomatic activity is one of the most instructive and interesting features of this volume. Military men were required to double as diplomats and to play both roles with skill.

The War in the Air, 1914-1994 Alan Stephens,2001 This book contains the proceedings of a conference held by the Royal Australian Air Force (RAAF) in Canberra in 1994. Since its publication by the RAAF's Air Power Studies Center in that year, the book has become a widely used reference at universities, military academies, and other educational institutions around the world. The application of aerospace power has seen significant developments since 1994, most notably through American-led operations in Central Europe and continuing technological advances with weapons, uninhabited vehicles, space-based systems, and information systems. But notwithstanding those developments and the passing of six years, the value of this anthology of airpower in the twentieth century seems undiminished.

With Courage Bernard C. Nalty,John F. Shiner,George M. Watson,2005-01-01 The four years between 1941 and 1945 were years in which the nation

raised and trained an air armada and committed it to operations on a scale unknown to that time. *With Courage: The U.S. Army Air Forces in World War II* retells the story of sacrifice, valor, and achievements in air campaigns against tough determined adversaries. It describes the development of a uniquely American doctrine for the application of air power against an opponent's key industries and centers of national life, a doctrine whose legacy today is the Global Reach - Global Power strategic planning framework of the modern U.S. Air Force. The narrative integrates aspects of strategic intelligence, logistics, technology, and leadership to offer a full yet concise account of the contributions of American air power to victory in that war.

Allies in Wartime Alexander B. Dolitsky, 2007 This book is a collection of articles, essays and speeches that together illuminate a remarkable chapter in human history: the Alaska-Siberia Airway during World War II.
