**America's Alligator** Doug Alderson,2020-04-01 People have long been fascinated by the American alligator. Ever since humans arrived on the continent more than 15,000 years ago, the American alligator has been both feared and revered, celebrated and scorned, and often hunted for food and hide. Once tourism began to take hold in the South as a real industry, especially in Florida, the alligator took on iconic and even mythical status. "One of the most picturesque features of Florida has always been that uncouth and fierce-looking reptile called the alligator," wrote Nevin O. Winter in 1918. "Everybody who comes down here to the peninsula has an ambition to see one in the wild." Seminole Indians wrestled alligators for show. Alligator souvenirs and mascots often took what people feared—a sharp-toothed predator—and made it into something cute and cuddly. Alligator-themed songs were recorded and released, including "See You Later Alligator" by Bill Haley and His Comets. Hollywood into created alligator-themed movies such as Alligator People. Alligators were also reportedly kept in the White House under two presidencies. And perhaps the most unusual alligator story was one that helped to nab Ma Barker and her son Fred when they were hiding out along Florida's Lake Weir. America's Alligator examines the colorful and sometimes conflicted relationship our species has had with Alligator mississippiensis. Doug Alderson explores the country's rich alligator mythology and how it inspired various forms of art, stories, photography, tourism and even humor.

American Alligators Scott E. Henke, 2018-04 The American alligator is an icon of conservation and biological science in the United States. This species has arguably one of the most volatile, yet rich histories in terms of conservation, wildlife management, and scientific research. Due to this, American alligators often serve as a model for crocodilian science on a global scale. *American Alligators: Habitats, Behaviors, and Threats* is an essential addition to the library of vertebrate scientists, herpetologists, and most importantly crocodilian biologists. The book contains the most comprehensive, up-to-date knowledge about American alligator biology, behavior, distribution, diet, ecology, genetics, habitat use, physiology, parasitology, toxicology, and management by the leading experts of alligator professionals from around the world. Each chapter contains a comprehensive description of past research concerning each topic, new knowledge and interpretations of the topic, and suggestions of future research needs. This all-encompassing approach to the synthesis of past, present, and future knowledge of American alligators will make this a highly sought and referenced volume of work. Authors are a mix of next-generation scientists who have distinguished themselves as crocodilian biologists, as well as those who are well-established within herpetological circles. Chapter authors include Kimberly Andrews, Richard Bauer, Gary Calkins, Warren Conway, Ted Joanen, Michelle Lawing, Abigail Lawson, Mark Merchant, Chris Murray, Brent Newman, James Nifong, Adam Rosenblatt, Wade Ryberg, David Saalfeld, Gregory Skupien, Bradley Strickland, Helen Sung, William Sutton, Marisa Tellez, and Jonathan Warner, as well as chapters written by the co-editors Cord Eversole and Scott Henke. Cord B. Eversole received his Ph.D. from Texas A and M University-Kingsville and has 15 years of experience working with alligators and other herpetofauna. He has

worked as a wildlife researcher for the Caesar Kleberg Wildlife Research Institute at Texas A and M University-Kingsville since 2010. Scott E. Henke is a research scientist with the Caesar Kleberg Wildlife Research Institute and a Regents Professor and Chair within the Department of Animal, Rangeland and Wildlife Sciences with Texas A and M University-Kingsville. He also is co-editor of the book *Becoming a Wildlife Professional*. The two researchers have teamed up and published extensively within herpetological journals, with the main emphasis of their collaborative research concerning the American alligator. (Nova)

*The Nick of Time* Rosmarie Waldrop, 2021-09-07 A philosophical tour de force melding astrophysics and grief by the American maestra of the prose poem “If memory serves, it was five years ago that yours began to refuse,” Rosmarie Waldrop writes to her husband in *The Nick of Time*. “Does it feel like crossing from an open field into the woods, the sunlight suddenly switched off? Or like a roof without edge or frame, pushed sideways in time?” Ten years in the making, Waldrop’s phenomenally beautiful new collection explores the felt nature of existence as well as gravity and velocity, the second hemisphere of time, mortality and aging, language and immigration, a Chinese primer, the artist Hannah Höch, and dwarf stars. Of one sequence, “White Is a Color,” first published as a chapbook, the Irish poet Billy Mills wrote, “In what must be less than 1000 words, Waldrop says more about the human condition and how we explore it through words than most of us would manage in a thousand pages.” Love blooms in the cut, in the gap, in the nick between memory and thought, sentence and experience. Like the late work of Cézanne, Waldrop’s art has found a new way of seeing and thinking that “vibrates on multiple registers through endless, restless exploration” (citation for the Los Angeles Times Book Prize).
