Gabe Zichermann, Christopher Cunningham

Revenue Management in the Lodging Industry Ben Vinod,2022-10-31 This book provides an end-to-end view of revenue management in the hospitality industry. The book highlights the origins of hotel reservations systems and revenue management, challenges unique to hotels, revenue management models, new generation retailing, and personalization and steps required to remain competitive in the marketplace. This book is intended for practitioners to understand the basics and have a comprehensive view of the impacts of revenue management on product distribution, reservations, inventory control, including the latest advances in the field of attribute-based room pricing and inventory control. There are several aspects of revenue management that are not covered in books and journal articles such as hotel pricing, hotel fully allocated costs, content parity, impact of Online Travel Agencies on hotels, competitive revenue management and attribute-based room pricing and inventory control which represents the last frontier in hotel revenue management with intelligent retailing. Leveraging emerging technologies, such as Artificial Intelligence and Blockchain and the future state of revenue management, are also addressed.

Traveling Indian Arizona Anne Hughes O'Brien,2006 In collaboration with the Heard Museum, this book is a practical introduction to visiting Native American communities in Arizona. Covering the etiquette, present-day culture, traditions, and arts of contemporary Arizona's native inhabitants, tourists will be prepared to explore the heart of tribal populations. See how the twenty-one federally recognized tribal communities continue to evolve. Enjoy this rare invitation to sample the food, view the performing arts, and purchase the visual arts as you witness today's Native American cultural regeneration.

The Oxford Handbook of the Digital Economy Martin Peitz,Joel Waldfogel,2012-08-23 The

economic analysis of the digital economy has been a rapidly developing research area for more than a decade. Through authoritative examination by leading scholars, this Handbook takes a closer look at particular industries, business practices, and policy issues associated with the digital industry. The volume offers an up-to-date account of key topics, discusses open questions, and provides guidance for future research. It offers a blend of theoretical and empirical works that are central to understanding the digital economy. The chapters are presented in four sections, corresponding with four broad themes: 1) infrastructure, standards, and platforms; 2) the transformation of selling, encompassing both the transformation of traditional selling and new, widespread application of tools such as auctions; 3) user-generated content; and 4) threats in the new digital environment. The first section covers infrastructure, standards, and various platform industries that rely heavily on recent developments in electronic data storage and transmission, including software, video games, payment systems, mobile telecommunications, and B2B commerce. The second section takes account of the reduced costs of online retailing that threatens offline retailers, widespread availability of information as it affects pricing and advertising, digital technology as it allows the widespread employment of novel price and non-price strategies (bundling, price discrimination), and auctions, as well as better tar. The third section addresses the emergent phenomenon of user-generated content on the Internet, including the functioning of social networks and open source. Finally, the fourth section discusses threats arising from digitization and the Internet, namely digital piracy, privacy and internet security concerns.

Singlejack Solidarity Stan Weir, 2004 Written throughout Stan Weir's decades as a blue-collar worker and labour educator, 'Singlejack Solidarity' offers a rare look at modern life and social relations as seen from the factory, dockside and the shop floor.

Entanglements Simone Tosoni, 2016-11-11 Conversations with a founder of the influential Social Construction of Technology (SCOT) approach in science and technology studies offer an introduction to the field. Science and technology studies (STS) is a relatively young but influential field. Scholars from disciplines as diverse as urban studies, mobility studies, media studies, and body culture studies are engaging in a systematic dialogue with STS, seeking to enrich their own investigations. Within STS, the Social Construction of Technology (SCOT) theory has proved to be one of the most influential in its neighboring fields. Yet the literature has grown so large so quickly, it is difficult to get an overview of SCOT. In this book, conversations with Trevor Pinch, a founder of SCOT, offer an introduction and genealogy for the field. Pinch was there at the creation—as coauthor of the groundbreaking 1984 article that launched SCOT—and has remained active through subsequent developments. Engaging and conversational, Pinch charts SCOT's important milestones. The book describes how Pinch and Wiebe Bijker adapted the “empirical program of relativism,” developed by the Bath School to study the social construction of scientific facts, to apply to the social construction of artifacts. *Entanglements* addresses five issues in depth: relevant social groups, and SCOT's focus on groups of users; the intertwining of social representation and practices; the importance of tacit knowledge in SCOT's approach to the nonrepresentational; the controversy over nonhuman agency; and the political implications of SCOT.

2010 ADA Standards for Accessible Design Department Justice, 2014-10-09 (a) Design and construction. (1) Each facility or part of a facility constructed by, on behalf of, or for the use of a public entity shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities, if the construction was commenced after January 26, 1992. (2) Exception for structural impracticability. (i) Full compliance with the requirements of this section is not required where a public entity can demonstrate that it is structurally impracticable to meet the requirements. Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features. (ii) If full compliance with this section would be structurally impracticable, compliance with this section is required to the extent that it is not structurally impracticable. In that case, any portion of the facility that can be made accessible shall

be made accessible to the extent that it is not structurally impracticable. (iii) If providing accessibility in conformance with this section to individuals with certain disabilities (e.g., those who use wheelchairs) would be structurally impracticable, accessibility shall nonetheless be ensured to persons with other types of disabilities, (e.g., those who use crutches or who have sight, hearing, or mental impairments) in accordance with this section.

Cycling Futures Jennifer Bonham,Marilyn Johnson,2015-12-04 The focus of the first half of the book is largely on the current engagement with cycling, challenges faced by existing and would-be cyclists and the issues cycling might address. The second half of the book is concerned with strategies and processes of change. Contributors working from different ontological positions reflect on changing socio-spatial relations to enable the broadest possible participation in cycling.

Intelligent Human Systems Integration 2021 Dario Russo,Tareq Ahram,Waldemar Karwowski,Giuseppe Di Bucchianico,Redha Taiar,2021-01-26 This book presents cutting-edge research on innovative human systems integration and human-machine interaction, with an emphasis on artificial intelligence and automation, as well as computational modeling and simulation. It covers a wide range of applications in the area of design, construction and operation of products, systems and services. The book describes advanced methodologies and tools for evaluating and improving interface usability, new models, and case studies and best practices in virtual, augmented and mixed reality systems, with a special focus on dynamic environments. It also discusses various factors concerning the human user, hardware, and artificial intelligence software. Based on the proceedings of the 4th International Conference on Intelligent Human Systems Integration (IHSI 2021), held on February 22-24, 2021, the book also examines the forces that are

currently shaping the nature of computing and cognitive systems, such as the need to reduce hardware costs; the importance of infusing intelligence and automation; the trend toward hardware miniaturization and optimization; the need for a better assimilation of computation in the environment; and social concerns regarding access to computers and systems for people with special needs. It offers a timely survey and a practice-oriented reference guide for policy- and decision-makers, human factors engineers, systems developers and users alike.
