Friedman Redux Mr.Atish R. Ghosh, Miss Mahvash Qureshi, Mr. Charalambos G. Tsangarides, 2014-08-08 Milton Friedman argued that flexible exchange rates would facilitate external adjustment. Recent studies find surprisingly little robust evidence that they do. We argue that this is because they use composite (or aggregate) exchange rate regime classifications, which often mask very heterogeneous bilateral relationships between countries. Constructing a novel dataset of bilateral exchange rate regimes that differentiates by the degree of exchange rate flexibility, as well as by direct and indirect exchange rate relationships, for 181 countries over 1980-2011, we find a significant and empirically robust relationship between exchange rate flexibility and the speed of external adjustment. Our results are supported by several “natural experiments” of exogenous changes in bilateral exchange rate regimes.

Organizing Political Parties Susan E. Scarrow,Paul D. Webb,Thomas Poguntke,2017-06-23 Political party organizations play large roles in democracies, yet their organizations differ widely, and their statutes change much more frequently than constitutions or electoral laws. How do these differences, and these frequent changes, affect the operation of democracy? This book seeks to answer these questions by presenting a comprehensive overview of the state of party organization in nineteen contemporary democracies. Using a unique new data collection, the book's chapters test propositions about the reasons for variation and similarities across party organizations. They find more evidence of within-country similarity than of cross-national patterns based on party ideology. After exploring parties' organizational differences, the remaining chapters investigate the impact of these differences. The volume considers a wide range of theories about how party organization may affect political life, including the impact of party rules on the selection of female candidates, the links between party decision processes and the stability of party programmes, the connection between party finance sources and public trust in political parties, and whether the strength of parties' extra-parliamentary organization affects the behaviour of their elected legislators. Collectively these chapters help to advance comparative studies of elections and representation by inserting party institutions and party agency more firmly into the centre of such studies. Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.ecprnet.eu. The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, Chair of the Department of Political Science, University of Houston.
