Persuasion Jasper Kim, 2018-03-28 *Persuasion: The Hidden Forces That Influence Negotiations* represents the first book of its kind to package and present persuasion principles in an innovative, international, and interdisciplinary fashion. This easy-to-understand book is the culmination of seminal research findings spanning across decades and disciplines – psychology, philosophy, negotiations, decision-making, logic, law, and economics, among others – from esteemed experts around the world. *Persuasion* provides a series of short, simple-to-use intellectual tools to go above and beyond merely describing what to think – but how to think in a persuasion, influence, and negotiation context – across a diverse array of disciplines, sectors, and situations from boardrooms to classrooms for the twenty-first century.

Alphaville Chris Darke, 2005 It uses new interviews with Godard's main collaborators on the film to reveal new aspects and explores its multiple influences, on 'Blade Runner', for example, or 'Code 46'. This is the first ever full appraisal of Godard's highly influential classic of sci-fi noir. Chris Darke writes about how, working without sets, special effects, or even a script, Godard made a dystopian vision of a technocratic future city. He explores the film's unique combination of genres and styles, its remarkable creation the secret agent Lemmy Caution, and uses his new interviews with the director's collaborators to chronicle the film's production. He also relates *Alphaville* to Godard's later work, setting it in the context of his wider career and of its influence on other filmmakers and artists. .

Europe's Income, Wealth, Consumption, and Inequality Georg Fischer, Robert Strauss, 2021 *Europe's Income, Wealth, Consumption, and Inequality* offers a novel approach to the analysis of social and economic

trends, and the resulting book identifies major policy challenges applicable in the EU and beyond. Georg Fischer, Robert Strauss, and their contributors focus on explaining how policy makers and the media focus on national trends to measure progress among the nations in Europe.

Law and the Utopian Imagination Austin Sarat, Lawrence Douglas, Martha Merrill Umphrey, 2014-05-21
Law and the Utopian Imagination seeks to explore and resuscitate the notion of utopianism within current legal discourse. The idea of utopia has fascinated the imaginations of important thinkers for ages. And yet—who writes seriously on the idea of utopia today? The mid-century critique appears to have carried the day, and a belief in the very possibility of utopian achievements appears to have flagged in the face of a world marked by political instability, social upheaval, and dreary market realities. Instead of mapping out the contours of a familiar terrain, this book seeks to explore the possibilities of a productive engagement between the utopian and the legal imagination. The book asks: is it possible to re-imagine or revitalize the concept of utopia such that it can survive the terms of the mid-century liberal critique? Alternatively, is it possible to re-imagine the concept of utopia and the theory of liberal legality so as to dissolve the apparent antagonism between the two? In charting possible answers to these questions, the present volume hopes to revive interest in a vital topic of inquiry too long neglected by both social thinkers and legal scholars.

The Second Life Herald Peter Ludlow, Mark Wallace, 2007
When a virtual journalist for a virtual newspaper reporting on the digital world of an online game lands on the real-world front page of the New York Times, it just might signal the dawn of a new era. Virtual journalist Peter Ludlow was banned from The Sims Online for being a bit too good at his job—for reporting in his virtual tabloid The Alphaville

Herald on the cyber-brothels, crimes, and strong-arm tactics that had become rife in the game--and when the Times, the BBC, CNN, and other media outlets covered the story, users all over the Internet called the banning censorship. Seeking a new virtual home, Ludlow moved the Herald to another virtual world--the powerful online environment of Second Life--just as it was about to explode onto the international mediascape and usher in the next iteration of the Internet. In *The Second Life Herald*, Ludlow and his colleague Mark Wallace take us behind the scenes of the Herald as they report on the emergence of a fascinating universe of virtual spaces that will become the next generation of the World Wide Web: a 3-D environment that provides richer, more expressive interactions than the Web we know today. In 1992, science fiction writer Neal Stephenson imagined the Metaverse, a virtual space that we would enter via the Internet and in which we would conduct important parts of our daily lives. According to Ludlow and Wallace, that future is coming sooner than we may think. They chronicle its chaotic, exhilarating, frightening birth, including the issue that the mainstream media often ignore: conflicts across the client-server divide over who should write the laws governing virtual worlds.

Platform Capitalism Nick Srnicek, 2017-05-23 What unites Google and Facebook, Apple and Microsoft, Siemens and GE, Uber and Airbnb? Across a wide range of sectors, these firms are transforming themselves into platforms: businesses that provide the hardware and software foundation for others to operate on. This transformation signals a major shift in how capitalist firms operate and how they interact with the rest of the economy: the emergence of platform capitalism. This book critically examines these new business forms, tracing their genesis from the long downturn of the 1970s to the boom and bust of the 1990s and the

aftershocks of the 2008 crisis. It shows how the fundamental foundations of the economy are rapidly being carved up among a small number of monopolistic platforms, and how the platform introduces new tendencies within capitalism that pose significant challenges to any vision of a post-capitalist future. This book will be essential reading for anyone who wants to understand how the most powerful tech companies of our time are transforming the global economy.

Tech-Noir Paul Meehan, 2015-08-13 This critical study traces the common origins of film noir and science fiction films, identifying the many instances in which the two have merged to form a distinctive subgenre known as Tech-Noir. From the German Expressionist cinema of the late 1920s to the present-day cyberpunk movement, the book examines more than 100 films in which the common noir elements of crime, mystery, surrealism, and human perversity intersect with the high technology of science fiction. The author also details the hybrid subgenre's considerable influences on contemporary music, fashion, and culture.

Ken Jennings's Trivia Almanac Ken Jennings, 2008-01-15 Ken Jennings's Trivia Almanac is the ingeniously organized book where, for a change, the all-time Jeopardy! champ gets to ask the questions—and where every day of the year will give you the chance to test your trivia mettle. For example—February 21: In 1912, on this day, Teddy Roosevelt coined the political phrase “hat in the ring,” so Ken Jennings fires off a series of “ring” questions. What two NFL quarterbacks have four Super Bowl rings each? * What rings are divided by the Cassini Division? ** Also on this date, in 1981, the “goth” music

scene was born in London, so here's a quiz on black-clad icons like Darth Vader, Johnny Cash, and Zorro. Do you know the secret identities of Ivanhoe's Black Knight*** or Men in Black's Agent M****? In this ultimate book for trivia buffs and other assorted know-it-alls, the 365 entries feature "This Day in History" factoids, trivia quizzes, and questions categorized by Jennings as "Easy," "Hard," and "Yeah, Good Luck." Topics cover every subject under the sun, from paleontology to mixology, sports feats to Bach suites, medieval popes to daytime soaps. This addictive gathering of facts, oddities, devilishly clever quizzes, and other flights of fancy will make each day a fun and intriguing new challenge.

Cult Films Allan Havis, 2021-01-15 Cult Films: Taboo and Transgression looks at nine decades of cult films history within American culture. By highlighting three films per decade including a brief summary of the decade's identity and sensibility, the book investigates the quality, ironies, and spirit of cult film evolution. The twenty-seven films selected for this study are analyzed for story content and in their respective transgressions regarding social, aesthetic, and political codes. Characteristic of this book is the notion that many exciting genres make up cult films-including horror, sci-fi, fantasy, film noir, and black comedy. Further, the book reaches out to several foreign film directors over the decades in order to view cult films as an intentional art form. Political and ideological controversies are covered; arresting back-story details that lend perspective on a film fill out the analysis and the historic framework for many film titles. The book, by emphasizing the condensed survey over decades and by choosing outstanding titles, differs from other general studies on cult films.

Metafilm Music in Jean-Luc Godard's Cinema Michael Baumgartner,2022 This monograph explores the under-researched use of music in Jean-Luc Godard's films and video essays from the early 1960s to the late 1990s. While Godard is largely hailed as a leading innovator of visual montage, unique storytelling style, and ground-breaking cinematography, his achievements as a leading pioneer in sculpting complex soundtracks altering the familiar relationship between sound and image have been mainly overlooked. On these soundtracks, music assumes the unique role of metafilm music. Metafilm music self-consciously refers to its own role as film music and disrupts the primary function of film music as an essential filmic device creating cinematic illusion. The concept of metafilm music describes how Godard thinks with film music about film music. Metafilm music manifests itself in Godard's work in four distinct manners: as fragmentized musical cues; as the same fragment verbatim repeated several times; as extrapolated, short excerpts from classical or popular music; and as music mixed unusually loudly into the soundtrack. With a detailed analysis of these parameters, the book explores fragmented and repeated music as Godard's critique of the leitmotif technique. Godard further self-reflexively investigates genre-specific music in musical comedies, films noir, and melodramas, as well as prototypical film music as arguably its own musical genre. His last foray into metafilm music entails music-making as a metaphor for filmmaking. By thinking with music about the function of film music, Godard has created throughout his career multi-layered soundtracks which challenge the conventional norms of film music and sound--

The Cinema Alone Michael Temple,James S. Williams,2000 This volume of essays constitutes a comprehensive and interdisciplinary engagement with Jean-Luc Godard's current film and video work. Its key focus is the eight-part magnum opus Histoire(s) du cinma (1988-1998), an extraordinary experiment in film history that attempts to tell 'all the stories of cinema' whilst remaining true to the specificity of what 'the cinema alone' contributed to twentieth-century culture. The Cinema Alone features contributors from France, Britain and America who discuss Godard's recent work both in the context of his earlier corpus and in relation to subjects such as literature, art history, philosophy, silent cinema, European culture, film theory, video and digital technology. The collection will make an important contribution to critical debates

on the past, present and future of Film and Media Studies as cinema enters its second century.

Before Babylon, Beyond Bitcoin David Birch, 2017-06-15 Technology is changing money: it has been transformed from physical objects to intangible information. With the arrival of smart cards, mobile phones and Bitcoin it has become easier than ever to create new forms of money. Crucially, money is also inextricably connected with our identities. Your card or phone is a security device that can identify you – and link information about you to your money. To see where these developments might be taking us, David Birch looks back over the history of money, spanning thousands of years. He sees in the past, both recent and ancient, evidence for several possible futures. Looking further back to a world before cash and central banks, there were multiple ‘currencies’ operating at the level of communities, and the use of barter for transactions. Perhaps technology will take us back to the future, a future that began back in 1971, when money became a claim backed by reputation rather than by physical commodities of any kind. Since then, money has been bits. The author shows that these phenomena are not only possible in the future, but already upon us. We may well want to make transactions in Tesco points, Air Miles, Manchester United pounds, Microsoft dollars, Islamic e-gold or Cornish e-tin. The use of cash is already in decline, and is certain to vanish from polite society. The newest technologies will take money back to its origins: a substitute for memory, a record of mutual debt obligations within multiple overlapping communities. This time though, money will be smart. It will be money that reflects the values of the communities that produced it. Future money will know where it has been, who has been using it and what they have been using it for.
