The Fall Line: America's Rise to Ski Racing's Summit Nathaniel Vinton,2015-02-02 "Great sports writing. . . . [Vinton] is taking us inside a world few ever visit."—James Hill, Washington Post Harnessing nature's most powerful forces, elite downhillers descend icy, rugged slopes at speeds cresting 90 miles per hour. For decades, American skiers struggled to match their European counterparts, and until this century the US Ski Team could not claim a lasting foothold on the roof of the Alps, where the sport's legends are born. Then came a fledgling class of American racers that disrupted the Alpine racing world order. Led by Bode Miller and Lindsey Vonn, Julia Mancuso and Ted Ligety, this band of iconoclasts made a place for their country on some of the world's most prestigious race courses. Even as new technology amplified the sport's inherent danger, the US Ski Team learned how to win, and they changed downhill racing forever. The Fall Line is the story of how it all came together, a deeply reported reconstruction of ski racing's most dramatic season. Drawing on more than a decade of research and candid interviews with some of the sport's most elusive figures, award-winning journalist Nathaniel Vinton reveals the untold story of how skiers like Vonn and Miller, and their peers and rivals, fought for supremacy at the Olympic Winter Games. Here is an authoritative portrait of a group of men and women taking mortal risks in a bid for sporting glory. A white-knuckled tour through skiing's deep traditions and least-accessible locales, The Fall Line opens up the sexy, high-stakes world of downhill skiing—its career-ending crashes, million-dollar sponsorship deals, international intrigue, and showdowns with nature itself. With views from the starting gate, the finish line, and treacherous turns in between, The Fall Line delivers the adrenaline of one of the world's most beautiful and perilous sports alongside a panoramic view of skiing's past, present, and future.

The Story of Modern Skiing John Fry,2006 Fry writes authoritatively of alpine skiing in North America and Europe, of Nordic skiing and of newer variations in the sport: freestyle skiing, snowboarding and extreme skiing.

Microserfs Douglas Coupland,2011-06-21 From the era-defining author of Generation X comes a novel of overworked coders who escape the serfdom of Bill Gates to forge their own path. They are Microserfs—six code-crunching computer whizzes who spend upward of sixteen hours a day "coding" and eating "flat" foods (food which, like Kraft singles, can be passed underneath closed doors) as they fearfully scan company e-mail to learn whether the great Bill is going to "flame" one of them. But now there's a chance to become innovators instead of cogs in the gargantuan Microsoft machine. The intrepid Microserfs are striking out on their own—living together in a shared digital flophouse as they desperately try to cultivate well-rounded lives and find love amid the dislocated, subhuman whir and buzz of their computer-driven world.

Sailing Out of Retirement MATTS DJOS,JEANINE DJOS,2012-08-26 This is a book for retirees, armchair sailors, dreamers, and lovers of the wind and sea. Sailing couple, Matts and Jeanine Djos, will suggest how to find just the right pre-owned boat by their own example and describe from personal experience what may be involved in buying and refitting a boat, shaking it down, and finding just the right marina. Also included are tactics for heavy weather sailing, common sense seamanship, the pleasures (and advantages) of seniority, personal health and safety, and onboard ambiance and comfort. As the poet, Tennyson, wrote, There lies the ort, the vessel puffs her sail, and while much is taken, much still abides. So come join them, and perhaps you too shall discover something unexpected and remarkable about the rollicking sea, the wayward heavens, and the wonder of discovering a well-found boat that suits your needs perfectly!

Making Meaning Out of Mountains Mark C. J. Stoddart, 2012 Mountains bear the imprint of human activity. Deep scars from logging and surface mining crosscut the landmarks of sports and recreation - national parks and lookout areas, ski slopes and lodges. Although the environmental effects of extractive industries are well known, skiing is more likely to bring to mind images of luxury, wealth, and health. In *Making Meaning out of Mountains*, Mark Stoddart draws on interviews, field observations, and media analysis to explore how the ski industry in British Columbia has helped transform mountain environments and, in turn, how skiing has come to be inscribed with multiple, often conflicted meanings informed by power struggles rooted in race, class, and gender. Corporate leaders promote the skiing industry as sustainable development, while environmentalists and some First Nations argue that skiing sacrifices wildlife habitats and traditional lands to tourism and corporate gain. Skiers themselves appreciate the opportunity to commune with nature but are concerned about skiing's environmental effects. Stoddart not only challenges us to reflect more seriously on skiing's negative impact on mountain environments, he also reveals how certain groups came to be viewed as the natural inhabitants and legitimate managers of mountain environments.

The Everything Store Brad Stone, 2013-10-15 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the *Seattle Times* as the definitive account of how a tech icon came to life. Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The *Everything Store* is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Practical Ethics Peter Singer, 2011-02-21 For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Obsessed by a Dream Aashild Sørheim, 2019-01-01 This Open Access biography chronicles the life and achievements of the Norwegian engineer and physicist Rolf Widerøe. Readers who meet him in the pages of this book will wonder why he isn't better known. The first of Widerøe's many pioneering contributions in the field of accelerator physics was the betatron. He later went on to build the first radiation therapy machine, an advance that would eventually revolutionize cancer treatment. Hospitals worldwide installed his machine, and today's modern radiation treatment equipment is based on his inventions. Widerøe's story also includes a fair share of drama, particularly during World War II when both Germans and the Allies vied for his collaboration. Widerøe held leading positions in multinational industry groups and was one of the consultants for building the world's largest nuclear laboratory, CERN, in Switzerland. He gained over 200 patents, received several honorary doctorates and a number of international awards. The author, a professional writer and maker of TV documentaries, has gained access to hitherto restricted archives in several countries, which provided a wealth of new material and insights, in particular in relation to the war years. She tells here a gripping and illuminating story.
