*Genetic Counseling for Adult Neurogenetic Disease* Jill S. Goldman, 2014-12-01 The adult patient diagnosed with or at risk for a neurogenetic disease has many questions and concerns for the genetic counselor, the neurologist, and other practitioners. Because of the emotional and potentially life-altering impact of these diseases on the patient and family, counseling can be especially challenging. A rare hands-on guide to the subject, *Genetic Counseling for Adult Neurogenetic Disease* deals with core issues that differentiate adult neurogenetic counseling from its more familiar pediatric counterpart. This innovative book with accompanying videos is designed to fill in deficits in this area typical of training programs in genetic counseling (which have pediatrics and prenatal concentrations) and neurology (which rarely cover genetic counseling). For each condition featured, chapters include a detailed overview of genetic symptoms, diagnostic criteria, and management, plus guidelines for asking, and answering, pertinent questions. The major concentration, however, is on genetic counseling issues and case histories illustrating these issues. As an added dimension, the accompanying videos depict representative issues and challenges in genetic counseling for specific diseases in addition to the basics of a neurological examination. Among the conditions discussed: Movement disorders, including Parkinson's disease. Dementias, including Alzheimer's disease. Stroke. Motor neuron diseases. Neuropathies and channelopathies. Adult muscular dystrophies. Neurocutaneous syndromes. Plus a section on neurological and neuropsychological evaluation. This is information that will stay relevant as technologies change and genetic understanding evolves. *Genetic Counseling for Adult Neurogenetic Disease* offers advanced clinical wisdom for genetic counselors as well as neurologists, neuropsychologists, and other referring clinicians.

**Green Nanoremediation** Fernanda Maria Policarpo Tonelli, Arpita Roy, H C Ananda Murthy, 2023-06-22 This book focuses on green nanoremediation addressing aspects related to the use of nanomaterials generated through green synthesis protocols to efficiently restore polluted environs. Nanomaterials' characteristics such as large surface area, capacity to easily reach into contaminated sites, good reactivity, and possibility of being developed to present photocatalytic activity and/or to deal with targeted substances by chemical surface modification are useful specially to perform remediation. As an alternative to conventional physicochemical methods, the green-based synthesis protocols reject the use of harmful reagents, prevent waste production, apply renewable energy source and/or materials, and consider in first place offering the smallest negative impact possible to living beings and to the ecosystem. Green synthesis in nanotechnology field involves the use of seaweeds, bacteria, cyanobacteria, yeasts, fungi, plants (living ones, biomass, extracts) and/or bio-derived products to generate the nanomaterials. The introductory chapter will be dedicated to nanomaterials' characteristics that enable them to be used in environmental remediation. The first part of the book will be dedicated to organic and inorganic pollution and the threats they pose to living forms; advantages, disadvantages and mechanisms of nanoremediation; comparison between conventional strategies of environmental pollution remediation and the green nanoremediation; carbon-based and non-carbon-based green nanomaterials capable of promoting environs' remediation; cost/benefits of using nanomaterials and nanoinformatics to a safe nanotechnology. The second part will be dedicated to green nanoremediation of water and soil, microbe-based, algae-based and plant-based synthesis of nanomaterials to nanoremediation. This part will also contain chapters dedicated to relevant nanomaterials for green nanoremediation protocols, nano-phytoremediation strategies, strategies to evaluate the efficiency of protocols related to this kind of remediation, main interactions of green nanomaterials and microbes during nanoremediation and, as a consequence of it, biocompatibility of green nanomaterials. This book's main purpose is to offer readers extensive knowledge on green nanoremediation as a feasible strategy to fight pollution's harmful consequences and clean environmental pollution, but also present the challenges that should be surpassed.

*Neural Dynamics of Neurological Disease* Christopher A. Shaw, 2017-04-17 The emerging understanding of age-related neurological disorders suggests that notions of a single causal gene/toxin being responsible is likely incorrect. Neurological disorders probably arise due to a unique intersection of multiple genetic and toxic factors, combined with additional contributions of age, stage of development, immune system actions, and more. This perspective leads to the view that rather than reflecting only one pathway to end-state disease, each is a spectrum disorder, and every individual case is therefore unique. *Neural Dynamics of Neurological Disease* argues for a fundamental rethinking of what we think we know about neurological disorders, how they arise and progress, and, crucially, what might be done to cure them. It first introduces the concept of neural dynamics of neurological disease, then examines various diseases and gives examples of the interplay of elements such as neural systems, cell types, and biochemical pathways that can contribute to disease. The concluding chapters point the way to how the emerging notion of neurological disease as a dynamic process may lead to more successful treatment options. Providing a cross-disciplinary approach to understanding the origin and progression of neurological disease, *Neural Dynamics of Neurological Disease* is a timely and valuable resource for neuroscientists, researchers, and clinicians.

**Fast Facts: Diagnosing Amyotrophic Lateral Sclerosis** Martin Turner, Liberty Jenkins, 2019-11-26 A diagnosis of amyotrophic lateral sclerosis (also known as Lou Gehrig's disease or motor neuron disease) is a progressive neurodegenerative disorder that exerts a notorious life-shortening physical toll. Understandably, clinicians are keen to avoid a wrong diagnosis when there are such serious consequences, but any delay in diagnosis can result in unnecessary, and sometimes harmful, interventions, and prevents prompt implementation of much-needed physical and emotional support. Starting from

the premise that ALS is not one disease but a syndrome, with a spectrum of upper and lower motor neuron involvement, this highly readable resource examines the causes of diagnostic delay and how to avoid them. With no diagnostic test to confirm the disease, no mandatory investigations and very few plausible 'ALS mimics', the authors take a pragmatic approach to what must always be a clinical diagnosis. With case presentations and teaching points to aid understanding, 'Fast Facts: ALS' will give clinicians the confidence to confirm or exclude a diagnosis of ALS, so that individuals facing this most challenging of conditions can receive rapid multidisciplinary support to maximize the quality of their remaining life. Contents: • Defining the syndrome • Epidemiology and pathophysiology • The first symptoms • Differential diagnosis • Investigations • Emerging diagnostic biomarkers

Nuclear War and Environmental Catastrophe Noam Chomsky, Laray Polk, 2013-04-30 “There are two problems for our species’ survival—nuclear war and environmental catastrophe, ” says Noam Chomsky in this new book on the two existential threats of our time and their points of intersection since World War II. While a nuclear strike would require action, environmental catastrophe is partially defined by willful inaction in response to human-induced climate change. Denial of the facts is only half the equation. Other contributing factors include extreme techniques for the extraction of remaining carbon deposits, the elimination of agricultural land for bio-fuel, the construction of dams, and the destruction of forests that are crucial for carbon sequestration. On the subject of current nuclear tensions, Chomsky revisits the long-established option of a nuclear-weapon-free zone (NWFZ) in the Middle East, a proposal set in motion through a joint Egyptian Iranian General Assembly resolution in 1974. Intended as a warning, *Nuclear War and Environmental Catastrophe* is also a reminder that talking about the unspeakable can still be done with humor, with wit and indomitable spirit.

**Biogeochemistry and the Environment** Michael O'Neal Campbell, 2023-12-14 Biogeochemistry may be defined as the science that combines biological and chemical perspectives for the examination of the Earth’s surface, including the relations between the biosphere, lithosphere, atmosphere, and hydrosphere. Biogeochemistry is a comparatively recently developed science, that incorporates scientific knowledge and findings, research methodologies, and models linking the biological, chemical, and earth sciences. Therefore, while it is a definitive science with a strong theoretical core, it is also dynamically and broadly interlinked with other sciences. This book examines the complex science of biogeochemistry from a novel perspective, examining its comparatively recent development, while also emphasizing its interlinked relationship with the earth sciences (including the complementary science of geochemistry), the geographical sciences (biogeography, oceanography, geomatics, earth systems science), the biological sciences (ecology, wildlife studies, biological aspects of environmental sciences) and the chemical sciences (including environmental chemistry and pollution). The book covers cutting-edge topics on the science of biogeochemistry, examining its development, structure, interdisciplinary, multidisciplinary, and transdisciplinary relations, and the future of the current complex knowledge systems, especially in the context of technological, developments, and the computer and data fields.

**Model Rules of Professional Conduct** American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**European Environmental Law** Ludwig Krämer, 2017-09-08 European Environmental Law pulls together the most significant material on the subject from legal and other periodicals to form an essential compendium for those wishing to study the role of law in protecting and conserving the environment. The studies are arranged in three sections which examine the Europeanisation of law and policy, analyse the application and enforcement of law and discuss the improvement of standards in Europe.

**Ageing and Life Extension of Offshore Structures** Gerhard Ersdal, John V. Sharp, Alexander Stacey, 2019-02-04 A comprehensive overview of managing and assessing safety and functionality of ageing offshore structures and pipelines A significant proportion, estimated at over 50%, of the worldwide infrastructure of offshore structures and pipelines is in a life extension phase and is vulnerable to ageing processes. This book captures the central elements of the management of ageing offshore structures and pipelines in the life extension phase. The book gives an overview of: the relevant ageing processes and hazards; how ageing processes are managed through the life cycle, including an overview of structural integrity management; how an engineer should go about assessing a structure that is to be operated beyond its original design life, and how ageing can be mitigated for safe and effective continued operation. Key Features: Provides an understanding of ageing processes and how these can be mitigated. Applies engineering

methods to ensure that existing structures can be operated longer rather than decommissioned unduly prematurely. Helps engineers performing these tasks in both evaluating the existing structures and maintaining ageing structures in a safe manner. The book gives an updated summary of current practice and research on the topic of the management of ageing structures and pipelines in the life extension phase but also meets the needs of structural engineering students and practicing offshore and structural engineers in oil & gas and engineering companies. In addition, it should be of value to regulators of the offshore industry.

**IAN Textbook of Neurology** Arabinda Mukherjee, 2018-07-31 This book is a comprehensive guide to the diagnosis and management of both common and rare neurological disorders, for practising neurologists and trainees. Divided into twelve chapters, each section is dedicated to a subspecialty of neurology, including movement disorders, headache, epilepsy, neurotoxicology, stroke and more. Topics are presented with a broad overview and include recent advances in the field. Content is further enhanced by tables, clinical images, boxes and flow charts to assist learning. Key points Comprehensive guide to neurological disorders for clinicians and trainees Each section dedicated to a subspecialty of neurology Includes recent advances in the field Highly illustrated with tables, clinical images, boxes and flow charts

**Bradley's Neurology in Clinical Practice E-Book** Joseph Jankovic, John C. Mazziotta, Scott L. Pomeroy, 2021-03-23 A practical, dynamic resource for practicing neurologists, clinicians and trainees, Bradley and Daroff's Neurology in Clinical Practice, Eighth Edition, offers a straightforward style, evidence-based information, and robust interactive content supplemented by treatment algorithms and images to keep you up to date with all that's current in this fast-changing field. This two-volume set is ideal for daily reference, featuring a unique organization by presenting symptom/sign and by specific disease entities—allowing you to access content in ways that mirror how you practice. More than 150 expert contributors, led by Drs. Joseph Jankovic, John C. Mazziotta, Scott L. Pomeroy, and Nancy J. Newman, provide up-to-date guidance that equips you to effectively diagnose and manage the full range of neurological disorders. Covers all aspects of today's neurology in an easy-to-read, clinically relevant manner. Allows for easy searches through an intuitive organization by both symptom and grouping of diseases. Features new and expanded content on movement disorders, genetic and immunologic disorders, tropical neurology, neuro-ophthalmology and neuro-otology, palliative care, pediatric neurology, and new and emerging therapies. Offers even more detailed videos that depict how neurological disorders manifest, including EEG and seizures, deep brain stimulation for PD and tremor, sleep disorders, movement disorders, ocular oscillations, EMG evaluation, cranial neuropathies, and disorders of upper and lower motor neurons, as well as other neurologic signs.

*Neurotherapeutics in the Era of Translational Medicine* Richard A. Smith, Brian K. Kaspar, Clive N. Svendsen, 2020-11-28 For the first time in history, there is now hope for treating neurological disorders that had previously been considered untreatable. The remarkable confluence of events that has heralded this is the focus of Neurotherapeutics in the Era of Translational Medicine. This anthology, written by many of the prominent scientists and researchers in the field of biotechnology, recounts the breathtaking advances that are revolutionizing treatment for disorders such as amyotrophic lateral sclerosis?, spinal muscular atrophy, multiple sclerosis, Parkinson's disease, myasthenia gravis, migraine, and glioblastoma. The story behind the story of these translational efforts is told, with authors depicting the ups and downs encountered on the path of their drug discovery and development effort. In parallel with this path, advances in identifying novel biomarkers and disease models are summarized, as are contemporary issues focusing on clinical trial design, bioethics, innovative funding strategies, and collaborations between government and academia in an effort to facilitate breakthrough treatments. The book is written by members of the biotech and pharmaceutical ecosystem for those who belong to it and aspire to become part of it. Comprehensive review on the progress of translational research in neurotherapeutics for neurologic disorders Discusses important issues in clinical trials such as design and ethical issues Written for neuroscientists, neurologists and pharmacologists

**Maxwell's Understanding Environmental Health: How We Live in the World** Deborah Alma Falta, 2021-03-25 Offering a unique approach to presenting environmental health, Maxwell's Understanding Environmental Health: How We Live in the World is structured around the choices we make as individuals that result in environmental hazards. By detailing the hazards of energy production, industry, food production, and our modern lifestyle in the context of our place within the local and global community, the author tells a connected narrative that makes the text both engaging and accessible to a broad range of students with a variety of scientific backgrounds Updated thoroughly, the Third Edition offers: Full color design that brings charts, graphs, and photos to life. New chapter on managing environmental health risks, New appendix provides an overview of the U.S. Regulatory Framework for Environmental Health.
